CANADIAN JOURNAL OF CHEMISTRY, VOLUME 44

SUBJECT INDEX

The titles of articles published in Volume 44 are listed below under the following categories.

Amino acids and peptides
Carbohydrates
Catalysis
Chromatography and extraction
Crystal structure
Electrochemistry
Electron spin resonance
Experimental methods
Free radicals
Inorganic compounds: reaction and synthesis
Kinetics and mechanisms
Magnetic resonance
Mechanisms of organic reactions
Molecular complexes
Natural products
Nuclear chemistry
Organometallic compounds
Photochemistry
Physical properties
Polarography
Polymers
Radiation chemistry
Solutions
Spectroscopy
Surfaces
Synthesis of organic compounds
Terpenes and steroids
Theoretical studies
Thermochemistry

Amino acids and peptides

Addendum: Improved synthesis of *N*-alkyl-aspartic acids. C. J. Abshire and L. Berlinguet, 2354.
Synthesis and chromatographic properties of *N*-alkyl-L-asparagines. R. Walter, I. L. Schwartz, L. J. Trauth, M. C. Berman, and D. H. Schlesinger, 2348.
Synthesis of possible actinomycin D precursors. J. P. Marsh, Jr. and L. Goodman, 799.

Carbohydrates

Cholla gum. I. Structure of the degraded cholla gum. V. M. Parikh and J. K. N. Jones, 327.
Cholla gum. II. Structure of the undegraded cholla gum. V. M. Parikh and J. K. N. Jones, 1531.
Cyclizations of dialdehydes with nitromethane. XIII. Synthesis of trehalose-type disaccharides containing nitrogenous heptuloses. H. H. Baer and A. Ahammad, 2893.
Erratum: Proton magnetic resonance spectra of D-glucopyranose polymers. C. A. Glass, 852.
Erratum: Synthesis of 4-acetamido-4-deoxy-sugars. A. J. Dick and J. K. N. Jones, 639.
Estimated molecular weight of amylose from the yeast *Rhodotorula peneaus*. P. A. J. Gorin, J. F. T. Spencer, and S. L. MacKenzie, 2087.
Exocellular alginic acid from *Azotobacter vinelandii*. P. A. J. Gorin and J. F. T. Spencer, 993.
Hydroxyl proton magnetic resonance in relation to ring size, substituent groups, and mutarotation of carbohydrates. A. S. Perlin, 539.
Long carbon chain carbohydrate polymers. 1,3-(Bis-5-aldoxylosylidene-1)-acetone and its polymer with 1,3-dicarbethoxyacetone. P. E. Papadakis and S. M. Philip, 1841.
A new galactobiosyl glucose formed from lactose by *Chaetomium globosum*. P. A. J. Gorin, R. H. Haskins, and D. W. S. Westlake, 2083.
Nuclear magnetic resonance spectra of glycol-cleavage oxidation products of methyl aldopentopyranosides. A. S. Perlin, 1757.
The oxidation of 1,2;5,6-di-*O*-isopropylidene-D-glucose by dimethyl sulfoxide – acetic anhydride. W. Sowa and G. H. S. Thomas, 836.
Oxidation of polysaccharides by lead tetraacetate in dimethyl sulfoxide. V. Zitko and C. T. Bishop, 1749.
Preparation and stereochemistry of 1,2-*O*-(2′-hydroxyethylidene)- and 1,2-*O*-(hydroxyisopropylidene)-glycerols. P. A. J. Gorin and T. Ishikawa, 1787.
The preparation of 4,6-*O*-benzylidene-D-glucal and the reaction of methyllithium with methyl 2,3-anhydro-4,6-*O*-benzylidene-α-D-allopyranoside. M. Sharma and R. K. Brown, 2825.
The proton magnetic resonance spectra and tautomeric equilibria of aldoses in deuterium oxide. R. U. Lemieux and J. D. Stevens, 249.
Pyranose–furanose and anomeric equilibria. Influence of solvent and of partial methylation. W. Mackie and A. S. Perlin, 2039.
Reactions of 2-acetoxy-4,6-di-*O*-acetyl-3-*O*-(2,6-dichlorobenzoyl)-D-glucal, tri-*O*-acetyl-3-deoxy-α-D-*erythro*-hex-2-enopyranosyl chloride, and related compounds. R. U. Lemieux and R. J. Bose, 1855.
Reactions of sugar chlorosulfates. VII. Some conformational aspects. A. G. Cottrell, E. Buncel, and J. K. N. Jones, 1483.
Reductive cleavage with metal in liquid ammonia. I. The selective cleavage of the benzylthio C—S bond versus the benzylidenedioxy C—O bond in methyl *S*-benzyl-4,6-*O*-benzylidene-2-thio-α-D-altropyranosides; the influence of the cosolvent 1,2-dimethoxyethane on the course of the reaction. U. G. Nayak and R. K. Brown, 591.
Selective nucleophilic substitution and preferential epoxide formation. A. J. Dick and J. K. N. Jones, 79.
Selective reduction of substituted aldonolactones to aldose derivatives. R. K. Hulyalkar, 1594.

The separation of aldopentose and aldohexose diethyl dithioacetal derivatives by gas–liquid partition chromatography. D. T. Williams and J. K. N. Jones, 412.
Structural components in methyl vinyl sulfone modified cotton cellulose. S. P. Rowland, V. O. Cirino, and A. L. Bullock, 1051.
Structure of a galacturonan from sunflower pectic acid. V. Zitko and C. T. Bishop, 1275.
Studies on chitan (β-(1 → 4)-linked 2-acetamido-2-deoxy-D-glucan) fibers of the diatom *Thalassiosira fluviatilis* Hustedt. II. Proton magnetic resonance, infrared, and X-ray studies. M. Falk, D. G. Smith, J. McLachlan, and A. G. McInnes, 2269.
Substitution of acyclic sugar acetals. Rate of perchloric acid catalyzed acetolysis of 2,3,4,5,6-penta-*O*-acetyl-D-glucose diethyl dithioacetal and 1,2,3,4,5,6-hexa-*O*-acetyl-D-glucose *S*-ethyl monothioacetal. N. H. Kurihara and E. P. Painter, 1773.
Sugar esters. III. New reagent for deoxyhalo sugar preparation. J. B. Lee and T. J. Nolan, 1331.
Synthesis and nuclear magnetic resonance spectrum of 3′,4′,6′-tri-O-acetyl-2-(methylthio)-D-glucopyrano-[2′,1′:4,5]-2-thiazoline. T. Ito, 94.
The synthesis of D-*glycero*-L-*altro*-heptose, D-*glycero*-L-*allo*-heptose, and *meso*-*glycero*-*altro*-heptitol. R. Young and G. A. Adams, 32.
Synthesis of 6′-substituted maltoses. G. G. S. Dutton and K. N. Slessor, 1069.
The water-soluble polysaccharides of dermatophytes. V. Galactomannans II from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton schönleinii*. C. T. Bishop, M. B. Perry, and F. Blank, 2291.
The water-soluble polysaccharides of dermatophytes. VI. Glucans from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton Schönleinii*. C. T. Bishop, M. B. Perry, R. K. Hulyalkar, and F. Blank, 2299.

Catalysis

Catalytic hydrodesulfurization of thiophene. VI. Comparisons over molybdenum disulfide, cobalt molybdate, and chromia catalysts. S. Kolboe and C. H. Amberg, 2623.
Electrophilic catalysis in solvolytic reactions. IX. Inductomeric effect. R. Anantaraman and M. R. Nair, 2415.
Homogeneous catalysis of D_2–H_2O exchange by ruthenium(III) chloride: Evidence for the heterolytic splitting of hydrogen. J. Halpern and B. R. James, 671.
Kinetic studies of chloro complexes of rhodium as hydrogenation catalysts. B. R. James and G. L. Rempel, 233.

Chromatography and extraction

Gas chromatography of estrone and related compounds. R. Montalvo and O. H. Wheeler, 100.
Gas–liquid chromatography of terpenes. XV. The volatile oil of *Mentha arvensis* var. *glabrata* Ray. E. von Rudloff and F. W. Hefendehl, 2015.
Rearrangement of allyl 2,6-dichlorophenyl ether on column packings during gas–liquid chromatographic analysis. M. J. Baldwin and R. K. Brown, 1743.
The separation of aldopentose and aldohexose diethyl dithioacetal derivatives by gas–liquid partition chromatography. D. T. Williams and J. K. N. Jones, 412.
A solvent-extraction study of the thermodynamics of aniline and its nitrate. A. Aboul-Seoud and M. Doheim, 521.

Crystal structure

The copper/selenium system. R. D. Heyding, 1233.
A refinement of the crystal structures of $(NH_4)_2TeBr_6$ and Cs_2TeBr_6. A. K. Das and I. D. Brown, 939.

Electrochemistry

Anodic oxide films on indium antimonide. A. C. Harkness and L. Young, 641.
Effect of thermionic emission on electrochemical measurements at high temperatures. S. G. Whiteway and C. R. Masson, 2421.
Electrical properties and structures of solid and liquid GeS, SnS, and PbS. G. Handfield, M. D'Amboise, and M. Bourgon, 853.
The electrolytic conductances of sodium chlorate and of lithium chlorate in water and in water–dioxane. A. N. Campbell, E. M. Kartzmark, and B. G. Oliver, 925.
Electrolytic reduction and Ellingham diagrams for oxy-anion systems. H. E. Bartlett and K. E. Johnson, 2119.
High resistance anodic oxide films on aluminium. A. C. Harkness and L. Young, 2409.
Thermodynamic and electrochemical properties of zirconium chlorides in alkali chloride melts. B. Swaroop and S. N. Flengas, 199.

Electron spin resonance

Electron spin resonance spectra of ^{15}N-centered radicals at low temperatures. II. The radiolysis of potassium sulfamate. J. R. Morton and D. R. Smith, 1951.
Electron spin resonance spectra of $N_2H_4^+$ and PF_2. J. K. S. Wan, J. R. Morton, and H. J. Bernstein, 1957.
Electron spin resonance studies of photolytically generated aromatic ketyls. R. Wilson, 551.
Étude des spectres de résonance paramagnétique électronique de radicaux allyliques polyorientés. C. Chachaty and J. Maruani, 2631.
The isotropic electron paramagnetic resonance spectrum of the 1-hydroxy-2,2,2-trifluoroethyl radical. P. Smith, J. T. Pearson, and R. V. Tsina, 753.
The numerical analysis of electron spin resonance spectra with hyperfine structure. R. Newton, K. F. Schulz, and R. M. Elofson, 752.
Paramagnetic centers in irradiated potassium sulfate. V. V. Gromov and J. R. Morton, 527.

Photolysis of Group VI hydrides. I. Solid H_2S, H_2S_2, and D_2S. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 2149.
Photolysis of solid carbonyl selenide and carbon diselenide. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 1677.
A study by electron paramagnetic resonance spectroscopy of radicals formed from acetamide and formamide. P. Smith and P. B. Wood, 3085.

Experimental methods
A convenient methylation procedure. U. E. Diner, F. Sweet, and R. K. Brown, 1591.
The description and use of a spin-echo spectrometer to study chemical exchange. K. H. Abramson, P. T. Inglefield, E. Krakower, and L. W. Reeves, 1685.
Étude de la fluorescence des dérivés de la phénothiazine. E. A. Martin, 1783.
Free radicals by mass spectrometry. XXXIV. A flow reactor for measurement of fast thermal reactions. I. P. Fisher, J. B. Homer, B. Roberts, and F. P. Lossing, 2205.
An improved method of hydrogen isotopic exchange with deuterium sulfate, and the preparation of 9,10-anthraquinone-d_8. B. Lunelli and C. Pecile, 1633.
A method for the determination of water in nonpolar liquids; the solubility of water in benzene. D. C. Moule and W. M. Thurston, 1361.

Free radicals
Comment: Definition of a biradical. G. R. Freeman, 245.
Electron spin resonance spectra of ^{15}N-centered radicals at low temperatures. II. The radiolysis of potassium sulfamate. J. R. Morton and D. R. Smith, 1951.
Free radicals by mass spectrometry. XXXIV. A flow reactor for measurement of fast thermal reactions. I. P. Fisher, J. B. Homer, B. Roberts, and F. P. Lossing, 2205.
Free radicals by mass spectrometry. XXXV. The heat of formation of allyl radical from biallyl pyrolysis. J. B. Homer and F. P. Lossing, 2211.
Ionization potentials of alkyl free radicals and *n*-alkanes through $C_{17}H_{36}$ by energy-calibrated molecular orbital methods. C. E. Melton and H. W. Joy, 1455.
The isotropic electron paramagnetic resonance spectrum of the 1-hydroxy-2,2,2-trifluoroethyl radical. P. Smith, J. T. Pearson, and R. V. Tsina, 753.
Kinetics of the abstraction of hydrogen atoms from hydrogen sulfide by trifluoromethyl radicals. N. L. Arthur and T. N. Bell, 1445.
Radicals derived from heteroaromatic systems. I. Thienyl radicals. D. Mackay, 2881.
Reactions of alkoxy radicals. I. Hydrogen atom abstraction from substituted toluenes. B. R. Kennedy and K. U. Ingold, 2381.
A study by electron paramagnetic resonance spectroscopy of radicals formed from acetamide and formamide. P. Smith and P. B. Wood, 3085.
The thermal decomposition of ethane. Part I. Initiation and termination steps. M. C. Lin and M. H. Back, 505.

Inorganic compounds: reaction and synthesis
Aqueous solutions of "sodium pernitrite" from alkaline hydrogen peroxide and nitric oxide. G. L. Petriconi and H. M. Papee, 977.
Arsenides of the transition metals. VIII. Some binary and ternary Group VIII diarsenides and their magnetic and electrical properties. S. L. Bennett and R. D. Heyding, 3017.
The cleavage of phosphorus to nitrogen bonds with hydrogen fluoride. R. Greenhalgh and J. R. Blanchfield, 501.
The copper/selenium system. R. D. Heyding, 1233.
Decarboxylation of strong acids by metal acetylacetonates. N. R. Fetter, 1463.
An improved preparation, analysis, and some properties of tetraoxygen difluoride. A. G. Streng, 1476.
Ion pair effects in the reaction between potassium ferrocyanide and potassium persulfate. R. W. Chlebek and W. M. Lister, 437.
Mass spectrometric study of subliming selenium. H. Fujisaki, J. B. Westmore, and A. W. Tickner, 3063.
A new synthesis of germyl iodide. J. E. Griffiths and A. L. Beach, 1227.
Preparation of Fremy's salt, potassium nitrosodisulfonate. R. P. Singh, 1994.
Preparation of metal nitrides by the exploding wire technique. M. J. Joncich, J. W. Vaughn, and B. F. Knutsen, 137.
The reaction of hexafluoroacetone with silanols. A. F. Janzen and C. J. Willis, 745.
Reactions of hydrazine with alkoxides. M. S. Bains, 534.
The reaction of methanesulfonic acid with sulfur trioxide. E. A. Robinson and V. Silberberg, 1437.
Reactions of organotin compounds. VI. The reactions of tin hydrides with perfluorovinyl tin compounds. A. D. Beveridge, H. C. Clark, and J. T. Kwon, 179.
The reactivity of metal–metal bonds. I. The Sn—Sn bond. H. C. Clark, J. D. Cotton, and J. H. Tsai, 903.
Selenium isotope effects in the reduction of sodium selenite and of sodium selenate. C. E. Rees and H. G. Thode, 419.
Tetrasubstituted-cyclopentadienone and -*p*-benzoquinone complexes of rhodium(I). S. McVey and P. M. Maitlis, 2429.

Kinetics and mechanisms
Absolute rate constants for hydrocarbon autoxidation. III. α-Methylstyrene, β-methylstyrene, and indene. J. A. Howard and K. U. Ingold, 1113.
Absolute rate constants for hydrocarbon autoxidation. IV. Tetralin, cyclohexene, diphenylmethane, ethylbenzene, and allylbenzene. J. A. Howard and K. U. Ingold, 1119.

Calculations of kinetic isotope effects for the iodide exchange and for the solvolysis of methyl iodide. A. V. Willi, 1889.
Chemical reactions in electrical discharges. II. The structure of the positive column in d-c. glow discharges through fast-flowing gases. J. L. Peeters, H. W. Rundle, and J. M. Deckers, 2981.
Chemical reactions in electrical discharges. III. The positive column in d-c. glow discharges through oxygen. H. W. Rundle, K. A. Gillespie, R. M. Yealland, R. Sova, and J. M. Deckers, 2995.
Coordination compounds of olefins with anhydrous silver salts. III. Kinetics of the gas–solid reaction producing $AgBF_4.2C_3H_6$. C. A. Jull, R. J. Kominar, N. K. Mainland, and H. W. Quinn, 2663.
Deuterium isotope effects on hydrogen bonding. S. Singh and C. N. R. Rao, 2611.
Effect of α-methylation on the parameters characterizing hydrolysis in water for a series of halides and sulfonates. R. L. Heppolette and R. E. Robertson, 677.
Electrophilic catalysis in solvolytic reactions. IX. Inductomeric effect. R. Anantaraman and M. R. Nair, 2415.
Energetics of formation of some oxygenated ions and the proton affinities of carbonyl compounds. A. G. Harrison, A. Ivko, and D. Van Raalte, 1625.
Evidence for the influence of traces of hydrogen halides in halogen exchange reactions. M. J. Rand and F. Reizman, 980.
Homogeneous catalysis of D_2–H_2O exchange by ruthenium(III) chloride: Evidence for the heterolytic splitting of hydrogen. J. Halpern and B. R. James, 671.
The hydrolysis of substituted methyl benzenesulfonates in water. R. E. Robertson, A. Stein, and S. E. Sugamori, 685.
The infrared spectrum and thermal decomposition of hydrazine perchlorate hemihydrate. P. W. M. Jacobs and A. Russell-Jones, 2435.
The inhibited autoxidation of styrene. Part V. The kinetics and deuterium isotope effect for inhibition by diphenylamine, phenyl-α-naphthylamine, and phenyl-β-naphthylamine. I. T. Brownlie and K. U. Ingold, 861.
The initiation of propylene pyrolysis. R. M. Marshall, J. H. Purnell, and B. C. Shurlock, 2778.
Ion–molecule reactions in methyl alcohol and methyl-d_3 alcohol. J. C. J. Thynne, F. K. Amenu-Kpodo, and A. G. Harrison, 1655.
Isotope effects in mixtures of liquid H_2O and T_2O. M. Salomon, 689.
Kinetics and mechanism of complex formation between ethylene and ruthenium(II) chloride in aqueous solution. J. Halpern and B. R. James, 495.
Kinetics and mechanisms of reactions catalyzed by pancreatic ribonuclease. E. N. Ramsden and K. J. Laidler, 2597.
Kinetics of hydrogen abstraction from proton donors by DPPH. S. Singh, K. R. Bhaskar, and C. N. R. Rao, 2657.
Kinetics of the abstraction of hydrogen atoms from hydrogen sulfide by trifluoromethyl radicals. N. L. Arthur and T. N. Bell, 1445.
Kinetics of the decompositions of ethane and propane sensitized by azomethane. The decomposition of the normal propyl radical. M. C. Lin and K. J. Laidler, 2927.
Kinetics of the oxidation of glycollic acid by vanadium(V). G. V. Bakore and R. Shanker, 1717.
The kinetics of the thermal decomposition of pyrite. A. W. Coats and N. F. H. Bright, 1191.
Kinetic studies of chloro complexes of rhodium as hydrogenation catalysts. B. R. James and G. L. Rempel, 233.
Kinetic studies of proton transfer from phenols to trinitrobenzyl anion. J. A. Blake, M. J. B. Evans, and K. E. Russell, 119.
On the pressure dependence of reaction rates. H. S. Golinkin, W. G. Laidlaw, and J. B. Hyne, 2193.
The oxidation of phenols. III. The stoichiometries for the oxidation of some substituted phenols with peroxy radicals. E. C. Horswill, J. A. Howard, and K. U. Ingold, 985.
The reaction of hydrogen and ethylene in the gas phase. M. C. Lin, 1237.
Reaction of $N_2(A^3\Sigma_u^+)$ with atomic nitrogen. R. A. Young, 1171.
The reactions of active nitrogen with ethylene and deuterated ethylenes. K. D. Foster, P. Kebarle, and H. B. Dunford, 2691.
Reactions of active nitrogen with organic substrates. IV. Isoprene. T. Hanafusa and N. N. Lichtin, 1230.
Reactions of alkoxy radicals. I. Hydrogen atom abstraction from substituted toluenes. B. R. Kennedy and K. U. Ingold, 2381.
Reactions of thermal energy ions. II. Rates of some hydrogen transfer ion–molecule reactions. A. G. Harrison, A. Ivko, and T. W. Shannon, 1351.
Selenium isotope effects in the reduction of sodium selenite and of sodium selenate. C. E. Rees and H. G. Thode, 419.
Some hydrogen abstraction reactions of perfluoroethyl radicals. G. O. Pritchard, J. R. Dacey, W. C. Kent, and C. R. Simonds, 171.
Studies on hydrogen–oxygen systems in the electric discharge. I. The reactions of hydrogen atoms with hydrogen peroxide. N. Hata and P. A. Giguère, 869.
Theories of inhibition by nitric oxide. M. H. Back and K. J. Laidler, 215.
The thermal decomposition of ethane. Part I. Initiation and termination steps. M. C. Lin and M. H. Back, 505.
The thermal decomposition of ethane. Part II. The unimolecular decomposition of the ethane molecule and the ethyl radical. M. C. Lin and M. H. Back, 2357.
The thermal decomposition of ethane. Part III. Secondary reactions. M. C. Lin and M. H. Back, 2369.
Thermal oxidation of Saran carbon. Part I. Studies under static oxygen system. R. G. Barradas, M. J. Dignam, and D. D. Chadha, 165.
The thermal unimolecular isomerization of 1,2-dichloroethylene. L. D. Hawton and G. P. Semeluk, 2143.

The transmission of polar effects. IV. The kinetics of esterification with diazodiphenylmethane of substituted heterocyclic carboxylic acids. K. Bowden and D. C. Parkin, 1493.

Magnetic resonance

Automatic direct analysis of A_2B_2 nuclear magnetic resonance spectra. T. K. Lim, A. Taurins, and M. A. Whitehead, 1211.
Chemical shift changes in fluoroanions of some diamagnetic salts. R. Haque and L. W. Reeves, 2769.
^{13}C n.m.r. studies. VIII. ^{13}C spectra of some substituted anisoles. K. S. Dhami and J. B. Stothers, 2855.
Cyclohexane compounds. VI. Nuclear magnetic resonance spectra of some derivatives of the stereoisomeric 3-bromo-1,2-cyclohexanediols and the 2-bromo-1,3-cyclohexanediols. R. A. B. Bannard, 775.
The description and use of a spin-echo spectrometer to study chemical exchange. K. H. Abramson, P. T. Inglefield, E. Krakower, and L. W. Reeves, 1685.
Double and triple resonance experiments on 2-bromo-5-chlorotoluene. Signs of the ring and ring-methyl proton coupling constants. G. Kotowycz and T. Schaefer, 2743.
Erratum: ^{35}Cl and ^{37}Cl magnetic resonance of simple chlorine compounds. Y. Saito, 2780.
Erratum: Proton magnetic resonance spectra of D-glucopyranose polymers. C. A. Glass, 852.
The high resolution nuclear magnetic resonance spectrum of the nonrigid AB_2X_2 system. R. G. Jones, 1725.
Hydroxyl proton magnetic resonance in relation to ring size, substituent groups, and mutarotation of carbohydrates. A. S. Perlin, 539.
Molecular motion in weak charge transfer complexes. D. F. R. Gilson and C. A. McDowell, 945.
Nuclear magnetic resonance spectra of glycol-cleavage oxidation products of methyl aldopentopyranosides. A. S. Perlin, 1757.
The nuclear magnetic resonance spectrum of vinylene carbonate. K. A. McLauchlan and T. Schaefer, 321.
Nuclear magnetic resonance studies. VIII. Determination of the thermodynamic parameters governing associations of substituted benzaldehydes in toluene solution. R. E. Klinck and J. B. Stothers, 37.
Nuclear magnetic resonance studies. IX. The chemical shift of the formyl proton in aliphatic aldehydes. R. E. Klinck and J. B. Stothers, 45.
Nuclear magnetic resonance study of 2,3-quinoxalinedicarboxaldehyde and its cyclic monohydrate. E. J. Moriconi, J. W. Young, T. E. Brady, and A. J. Fritsch, 1596.
Organophosphorus–uranyl complexes studied by nuclear magnetic resonance spectroscopy. J. L. Burdett and L. L. Burger, 111.
A paramagnetic resonance study of hindered diarylmethyl radicals and related compounds. I. Analysis of the spectra. H. R. Falle and F. C. Adam, 1387.
A study of hindered diarylmethyl radicals. II. The benzhydryl model. F. C. Adam and H. R. Falle, 1397.
A perturbation calculation of the effect of electric interaction on proton magnetic shielding. T. Yonemoto, 223.
Proton magnetic resonance and infrared spectra of some complexes of N,N-dimethylacetamide. A. J. Carty, 1881.
Proton magnetic resonance line width as a function of polymer tacticity. S. Brownstein and D. M. Wiles, 153.
The proton magnetic resonance spectra and tautomeric equilibria of aldoses in deuterium oxide. R. U. Lemieux and J. D. Stevens, 249.
Reactions of amides and related compounds. III. N.m.r. investigation of the protonation of N,N-dimethylnitrosoamine, N,N-diethylnitrosoamine, and N-nitrosopiperidine. S. J. Kuhn and J. S. McIntyre, 105.
The relative acceptor power of boron trihalides toward acetonitrile by proton nuclear magnetic resonance measurements. J. M. Miller and M. Onyszchuk, 899.
The sign, temperature, and solvent dependence of the proton coupling constant and chemical shift in α-chloroacrylonitrile. K. A. McLauchlan, L. W. Reeves, and T. Schaefer, 1473.
Solvent dependence of ^{29}Si—^{19}F coupling constant in silicon tetrafluoride. The importance of intermolecular dispersion interactions. H. M. Hutton, E. Bock, and T. Schaefer, 2772.
Some studies of slow rotations around bonds in amides. T. H. Siddall III and R. H. Garner, 2387.
Stereochemistry of *o*-substituted formanilides. I. D. Rae, 1334.
The substituent effect on vicinal proton coupling constants in monosubstituted benzenes. R. R. Fraser, 2737.
Synthesis and nuclear magnetic resonance spectrum of 3′,4′,6′-tri-O-acetyl-2-(methylthio)-D-glucopyrano-[2′,1′:4,5]-2-thiazoline. T. Ito, 94.

Mechanisms of organic reactions

Acid-catalyzed reactions of vinyl compounds. IV. Mechanism of formation of the products of the reaction of vinyl acetate and benzene. J. M. Pepper and B. P. Robinson, 1809.
Alkaline permanganate decarboxylation of β-amino- and β-hydroxy-propionic acid. A. M. Unrau and M.-L. Fan, 2090.
Alkylation of cyclic amidines with Mannich bases. C. Podesva and K. Vagi, 1872.
Aromatic substitution. XIV. The homolytic phenylation of 3- and 4-picoline. A quantitative study of isomer and total rate ratios. R. A. Abramovitch and M. Saha, 1765.
Carcinogenicity of lactones. I. The reaction of 4-methylbuteno- and 4-methylbutano-γ-lactones with primary amines. J. B. Jones and J. M. Young, 1059.
The chemistry of episulfides. I. The reactivities of propylene sulfide and propylene oxide towards aniline. N. S. Isaacs, 395.
The chemistry of ylids. XV. Mechanism of the reaction of iminophosphoranes with carbonyl compounds. A. W. Johnson and S. C. K. Wong, 2793.
A comment on the inadequacy of the correlation between phyllo-type spectrum and *meso*-substitution in the porphyrin series. R. Bonnett, I. A. D. Gale, and G. F. Stephenson, 2503.

Concerning the reaction between maleic anyhydride and indene. N. S. Isaacs, 415.
Conversion of neoabietic acid into manool. E. Wenkert, J. R. Mahajan, M. Nussim, and F. Schenker, 2575.
Cycloadditions. X. Kinetics of the thermal decarbonylation of dicyclopentadiene-1,8-dione. J. E. Baldwin, 2051.
Decomposition products of 5-oxo-3,5-seco-A-norcholestan-3-oic acid *p*-toluenesulfonylhydrazone. J. T. Edward, D. L'Anglais, and S. Meyerson, 1866.
Deuterium isotope effect on the racemization of a highly hindered biphenyl derivative. C. Heitner and K. T. Leffek, 2567.
Erratum: Aromatic substitution. XIV. The homolytic phenylation of 3- and 4-picoline. A quantitative study of isomer and total rate ratios. R. A. Abramovitch and M. Saha, 2926.
Étude cinétique de l'oxydation de la tribenzylamine par la *N*-bromosuccinimide. M. Zador, 2031.
Étude quantitative des réactions d'ozonolyse. I. Ozonation du tétraphényléthylène. S. Fliszár, D. Gravel, and E. Cavalieri, 67.
Étude quantitative des réactions d'ozonolyse. II. Ozonation du *trans*-stilbène. S. Fliszár, D. Gravel, and E. Cavalieri, 1013.
Études conformationnelles en série cyclopentanique. II. Sur la stéréochimie des alcools tertiaires dérivés de la *t*-butyl-3 cyclopentanone. J.-C. Richer and P. Bélanger, 2057.
Études conformationnelles en série cyclopentanique. III. L'addition de dérivés organomagnésiens sur la *t*-butyl-3 cyclopentanone. J.-C. Richer and P. Bélanger, 2067.
Études sur les phényl-5 cyclohexanediols-1,3 isomères. J.-C. Richer and Nguyen-Thi-Thanh-Hoa, 403.
Hydrogen exchange in *s*-trinitrobenzene. E. Buncel and E. A. Symons, 771.
Hydrogenolysis by lithium aluminium hydride – aluminium chloride of ether solutions of camphor ethylene ketal and norcamphor ethylene ketal. W. W. Zajac, Jr., B. Rhee, and R. K. Brown, 1547.
The hydrolysis of dimethylsulfate and diethylsulfate in water. R. E. Robertson and S. E. Sugamori, 1728.
The influence of temperature on the stereochemistry of the addition of *p*-chlorobenzenesulfenyl chloride to *cis*- and *trans*-2-butene. G. H. Schmid and V. M. Csizmadia, 1338.
The inhibited autoxidation of styrene. Part V. The kinetics and deuterium isotope effect for inhibition by diphenylamine, phenyl-α-naphthylamine, and phenyl-β-naphthylamine. I. T. Brownlie and K. U. Ingold, 861.
Isotope effect studies on elimination reactions. V. The mechanism of the carbonyl elimination reaction of 9-fluorenyl nitrate with acetate ion. P. J. Smith and A. N. Bourns, 2553.
Kinetic hydrogen isotope effects in aromatic bromodeprotonation. B. T. Baliga and A. N. Bourns, 379.
Kinetic sulfur isotope effects in aromatic bromodesulfonation. B. T. Baliga and A. N. Bourns, 363.
Liquid-phase oxidation of cyclohexene in the presence of benzaldehyde. T. Ikawa, T. Fukushima, M. Muto, and T. Yanagihara, 1817.
Mass spectra and reaction mechanism studies. The Favorsky–Marker rearrangement of 17α-bromopregnenolones in deuterated methanol. R. Deghenghi, G. Schilling, and G. Papineau-Couture, 789.
Molecular rearrangement of diazotized *o*-aminophenylcarbinols. A. J. Sisti and R. L. Cohen, 2580.
Note sur le clivage de l'ozonide primaire du styrène. S. Fliszár, 2351.
A one-step conversion of cyclohexene oxide into *cis*-1,2-dichlorocyclohexane. J. R. Campbell, J. K. N. Jones, and S. Wolfe, 2339.
On the formation of a peroxy phthalazine compound by the autoxidation of 1-methyl-1,2-dihydrophthalazine. A. Hirsch and D. G. Orphanos, 2109.
Organic sulfur compounds. III. Condensations involving *o*-nitrobenzenesulfenyl chloride. R. T. Coutts, K. W. Hindmarsh, and N. J. Pound, 2105.
Organic sulfur mechanisms. III. A brief investigation into the reaction of benzonitrile oxide with sulfenes. J. F. King and T. Durst, 409.
Organic sulfur mechanisms. 5. Photolysis of unsaturated sultams and the question of abnormal addition to sulfenes. T. Durst and J. F. King, 1869.
The Orton rearrangement in aprotic solvents. III. The acid-catalyzed chlorination of anisole by a series of 4-substituted *N*-chloroacylanilides. J. M. W. Scott and J. G. Martin, 2901.
The oxidation of phenols. I. The oxidation of 2,6-di-*t*-butyl-4-methylphenol, 2,6-di-*t*-butylphenol, and 2,6-dimethylphenol with peroxy radicals. E. C. Horswill and K. U. Ingold, 263.
The oxidation of phenols. II. The oxidation of 2,4-di-*t*-butylphenol with peroxy radicals. E. C. Horswill and K. U. Ingold, 269.
A 5-phosphafulvene Wittig reagent. M. B. Hocking, 1581.
Photochemical transformations of dienes. VII. Stereochemistry of addition of alcohol, and effect of substituents and acids on the photochemistry of cholesta-3,5-dienes. G. Bauslaugh, G. Just, and E. Lee-Ruff, 2837.
The photolysis of 4,4-dimethylandrost-5-en-17β-ol-3-one. R. T. Taylor and G. Just, 1847.
Pyrolysis of dimethylethanolamine oxide monohydrate. G. P. Shulman, 1601.
Pyrrole chemistry. V. Friedel–Crafts isopropylations of some pyrrole derivatives. H. J. Anderson and L. C. Hopkins, 1831.
Quinodimethane chemistry. The generation and trapping of quinodimethanes from substituted aromatic hydrocarbons with high-potential quinones. J. W. Lown and A. S. K. Aidoo, 2507.
Reaction of aroyl halides with aromatic aldehydes and acetophenones. R. Filler and F. N. Miller, 838.
The reaction of caryophyllene and diazoacetic ester; some observations on cyclopropanes. E. W. Warnhoff and V. Dave, 621.
The reaction of *n*-butylamine and benzylamine with some β-nitrostyrenes, diethyl benzalmalonates, and cinnamalmalononitriles. C. E. Lough and D. J. Currie, 1563.
The reaction of phenylmethanesulfonyl chloride with tertiary amines: formation of geometrical isomers about a carbon–sulfur double bond. J. F. King and T. Durst, 819.

Reaction of sodium *o*-nitrophenolates with ethyl 2-bromo-2-cyanoacetate. R. T. Coutts and K. W. Hindmarsh, 2092.
The reaction of some compounds containing thioamide groups with 2,4,6-trichloro-1,3,5-triazine. A. Pollak, B. Stanovnik, and M. Tišler, 829.
The reaction of sulfur dichloride with *cis,cis*-1,5-cyclooctadiene. F. Lautenschlaeger, 2813.
Reaction of thiols with epoxides of conjugated 1,4-diketones. H. S. Wilgus III, E. Frauenglass, P. P. Chiesa, G. H. Nawn, F. J. Evans, and J. W. Gates, Jr., 603.
Réactions de l'époxystyrène avec la glycine et ses dérivés. C. Berse and K. Jankowski, 1513.
The reactions of disodium adduct of benzophenone anil. J. G. Smith and C. D. Veach, 2245.
Reactions of ozonides. IV. Ozonization of alkylcycloalkenes. D. G. M. Diaper, 2819.
Reactions of phthalimide and potassium phthalimide with sulfur monochloride. M. V. Kalnins, 2111.
Rearrangement of allyl 2,6-dichlorophenyl ether on column packings during gas–liquid chromatographic analysis. M. J. Baldwin and R. K. Brown, 1743.
Rearrangement studies with ^{14}C. XXVI. Solvolyses of 2-(β-naphthyl)-1-^{14}C-ethyl *p*-toluenesulfonate. C. C. Lee and A. G. Forman, 841.
Rearrangement studies with ^{14}C. XXVIII. Solvolyses of 1-^{14}C-1-propyl *p*-toluenesulfonate. C. C. Lee and J. E. Kruger, 2343.
The reductive dimerization of *N*-benzylidene aniline. J. G. Smith and C. D. Veach, 2497.
Secondary kinetic isotope effects in the solvolyses of 2-(2,4-dimethoxyphenyl)-1,1-d_2-ethyl and 2-(3,5-dimethoxyphenyl)-1,1-d_2-ethyl *p*-bromobenzenesulfonates. C. C. Lee and L. Noszkó, 2491.
Solvolyses of 2-(2,4-dimethoxyphenyl)-1,1-d_2-ethyl and 2-(3,5-dimethoxyphenyl)-1,1-d_2-ethyl *p*-bromobenzenesulfonates; ion-pair returns in solvolyses of 2-arylethyl systems. C. C. Lee and L. Noszkó, 2481.
The stereoselective addition of dihalocarbenes to *cis,trans,trans*-cyclododeca-1,5,9-triene and the synthesis of cyclotridecanone. H. Nozaki, S. Katô, and R. Noyori, 1021.
The structure of succinyl dichloride. G. H. Schmid, 2917.
The structure of the maleic anhydride–acetylacetone adduct. R. D. Bailey and G. M. Strunz, 2584.
A study of the Mannich reaction with propargyl alcohol. R. L. Salvador and D. Simon, 2570.
A study of the substitution reactions of benzo[*b*]thiophene and its derivatives. G. Van Zyl, C. J. Bredeweg, R. H. Rynbrandt, and D. C. Neckers, 2283.
Sulfonate esters of α-chloroaldoximes, aldoximes, and amidoximes via "sulfene" addition. W. E. Truce and A. R. Naik, 297.
Thermal isomerization of hexachlorocyclopropane. W. F. Hale, 1100.
The thermal reversibility of the Michael reaction. V. The effect of the structure of certain thiol adducts on cleavage. C. F. H. Allen and W. J. Humphlett, 2315.
The transmission of polar effects. Part III. The kinetics of the acid-catalyzed esterification of 3-substituted acrylic acids and the alkaline hydrolysis of the methyl esters. K. Bowden, 661.
Treibs' 119° glycol; transannular attack at the tertiary carbon of a secondary–tertiary epoxide. E. W. Warnhoff and V. Srinivasan, 2259.

Molecular complexes

Absorption spectra and configuration of some amine complexes of copper(II) acetate. G. Narain, 895.
Charge-transfer complexes of biphenylene. P. H. Emslie, R. Foster, and R. Pickles, 9.
Chélates du germanium(IV) avec la tropolone, le maltol, la lawsone et la trichlorohydroxy *p*-benzoquinone. I. Propriétés acides–bases des α-hydroxycétones. A. Beauchamp and R. L. Benoit, 1607.
Chélates du germanium(IV) avec la tropolone, le maltol, la lawsone et la trichlorohydroxy *p*-benzoquinone. II. Nature et stabilité des chélates. A. Beauchamp and R. L. Benoit, 1615.
The correlation of absorption spectra and structure of pseudo-octahedral and trigonal bipyramidal copper(II)–1,10-phenanthroline complexes in acetone solutions. G. H. Faye, 2165.
A correlation of stepwise stability constant ratios and some bonding properties of transition metal and zinc complexes. P. G. Manning, 1975.
Étude de la formation des complexes du protactinium avec les acides di- et poly-carboxyliques par la méthode d'échange d'ions. I. Galateanu, 647.
Investigations on some amine complexes of iron(III) phthalimide. Infrared spectroscopic measurements. G. Narain, 975.
Kinetics and mechanism of complex formation between ethylene and ruthenium(II) chloride in aqueous solution. J. Halpern and B. R. James, 495.
Molecular motion in weak charge transfer complexes. D. F. R. Gilson and C. A. McDowell, 945.
Organophosphorus–uranyl complexes studied by nuclear magnetic resonance spectroscopy. J. L. Burdett and L. L. Burger, 111.
Platinum(II) complexes containing α-hydroxyacetylenes. A. D. Allen and T. Theophanides, 2703.
Preparation and characterization of some binary and ternary complexes of benzoyltrifluoroacetone and phosphorus esters. G. N. Rao and N. C. Li, 2775.
Preparation and characterization of some binary and ternary metal complexes of imidazole and amino acids. G. N. Rao and N. C. Li, 1637.
Quinoline N-oxide complexes of titanyl, zirconyl, and thorium perchlorates. V. Krishnan and C. C. Patel, 972.
Rare-earth picolinate and picolinate-N-oxide complexes. P. G. Manning, 1471.
The relative acceptor power of boron trihalides toward acetonitrile by proton nuclear magnetic resonance measurements. J. M. Miller and M. Onyszchuk, 899.
Solvent shifts in charge-transfer spectra. Influence of donor strength. H. M. Rosenberg. E. Eimutis, and D. Hale, 2405.
Some complexes present in aqueous ferric chloride solutions. P. G. Manning, 1993.

A spectrophotometric study of hexa-, penta-, and tetra-coordinated halogenocopper(II) complexes in acetone – hydrohalic acid mixtures. G. H. Faye, 1643.
Studies of metal complexes of pyridine derivatives. The effects of coordination upon infrared intensity of the functional group in β-cyanopyridine. D. G. Brewer and P. T. T. Wong, 1407.
Tetrasubstituted-cyclopentadienone and -*p*-benzoquinone complexes of rhodium(I). S. McVey and P. M. Maitlis, 2429.

Natural products
The absolute configuration of the Iboga alkaloids. J. P. Kutney, R. T. Brown, and E. Piers, 637.
The alkaloids of fumariaceous plants. LV. The structure of cularidine. R. H. F. Manske, 561.
The alkaloids of papaveraceous plants. LV. A new alkaloid, eschscholtzidine, and its structure. R. H. F. Manske and K. H. Shin, 1259.
Alkaloids of the seeds of *Aspidosperma fendleri* Woodson. R. H. Burnell, J. D. Medina, and W. A. Ayer, 28.
The biosynthesis of fusaric acid from ^{14}C-labelled acetate in *Gibberella fujikuroi*. R. D. Hill, A. M. Unrau, and D. T. Canvin, 2077.
Cholla gum. I. Structure of the degraded cholla gum. V. M. Parikh and J. K. N. Jones, 327.
The correlation of chasmanine with browniine. O. E. Edwards, L. Fonzes, and L. Marion, 583.
Delphinium alkaloids. The structures of the alkaloids of *Delphinium cardinale* Hook and the alkaloid delatine. M. H. Benn, 1.
The elucidation of the structures of ochotensine and ochotensimine. S. McLean, M.-S. Lin, and R. H. F. Manske, 2449.
Erratum: The occurrence of 2,3-dibromobenzyl alcohol 4,5-disulfate, dipotassium salt, in *Polysiphonia lanosa*. J. H. Hodgkin, J. S. Craigie, and A. G. McInnes, 1604.
The essential oil of *Illicium anisatum* Linn. W. B. Cook and A. S. Howard, 2461.
Facile methylation of humic acids from organic soils. H. Morita, 1593.
Lignans of western red cedar (*Thuja plicata* Donn). IV. Thujaplicatin and thujaplicatin methyl ether. H. MacLean and K. Murakami, 1541.
Lignans of western red cedar (*Thuja plicata* Donn). V. Hydroxythujaplicatin methyl ether. H. MacLean and K. Murakami, 1827.
Lycopodium alkaloids. XVII. Mass spectra of annotine and some annotine derivatives. D. B. Maclean and M. Curcumelli-Rodostamo, 611.
Metabolites of pathogenic fungi. V. Isolation and tentative structures of vioxanthin and viopurpurin, two colored metabolites of *Trichophyton violaceum*. F. Blank, A. S. Ng, and G. Just, 2873.
The occurrence of 2,3-dibromobenzyl alcohol 4,5-disulfate, dipotassium salt, in *Polysiphonia lanosa*. J. H. Hodgkin, J. S. Craigie, and A. G. McInnes, 74.
Ormosia alkaloids. III. Chemistry of ormosanine and ormojanine; dehydrogenation to 3,6,8-trialkylated quinolines. Z. Valenta, P. Deslongchamps, M. H. Rashid, R. H. Wightman, and J. S. Wilson, 2525.
Ormosia alkaloids. IV. Stereochemistry of ormojanine; structure and stereochemistry of piptanthine, dasycarpine, and ormosinine. P. Deslongchamps, Z. Valenta, and J. S. Wilson, 2539.
Polyoxyphenols of western red cedar (*Thuja plicata* Donn). III. Structure of plicatic acid. J. A. F. Gardner, E. P. Swan, S. A. Sutherland, and H. MacLean, 52.
The role of β-alanine and of glycerate in the biosynthesis of ricinine. P. R. Thomas, M. F. Barnes, and L. Marion, 1997.
The role of aspartic acid in the biosynthesis of ricinine. S. R. Johns and L. Marion, 23.
Some steam-volatile components of the extractives from *Populus tremuloïdes* heartwood. R. A. Abramovitch and O. A. Koleoso, 2913.
Steroids and related natural products. XXVI. Synthesis of 3β-acetoxy-20-oxo-5β-pregna-14,16-diene. G. R. Pettit and D. M. Piatak, 844.
Structures of *Chlorobium* chlorophylls (660). A. S. Holt, J. W. Purdie, and J. W. F. Wasley, 88.
Studies on plants. XI. Alkaloids of *Aspidosperma spegazzinii*. O. O. Orazi, R. A. Corral, and M. E. Stoichevich, 1523.

Nuclear chemistry
Formation of ^{7}Be in nuclear reactions induced by 85-MeV protons. M. S. Lafleur, N. T. Porile, and L. Yaffe, 2749.
Nuclear recoil reactions in cyclopentadienylmanganese tricarbonyl. T. Costea, I. Negoescu, P. Vasudev, and D. R. Wiles, 885.
Xenon yields in the fission of heavy elements by medium-energy protons. J. H. Forster, N. T. Porile, and L. Yaffe, 2951.

Organometallic compounds
Boron sulfide as a source of acyloxyborane. J. M. Lalancette, F. Bessette, and J. M. Cliche, 1577.
Cyclobutadiene–metal complexes. Part VIII. Synthesis of tetraphenylcyclobutadiene nickel halides by ligand-exchange reactions. D. F. Pollock and P. M. Maitlis, 2673.
Dimethylberyllium bis(trimethylamine) and dimethylberyllium tetramethyl-*o*-phenylenediamine. R. A. Bell and G. E. Coates, 744.
Dimethyltrifluoroacetylarsine and related compounds. W. R. Cullen and G. E. Styan, 1225.
Halide alkoxides of samarium. III. Reactions of samarium alkoxides with acetyl chloride and acetyl bromide. B. S. Sankhla and R. N. Kapoor, 2131.
The infrared spectra of some mixed alkylarylarsonium salts. W. R. Cullen, G. B. Deacon, and J. H. S. Green, 717.
Organic compounds of samarium. II. Reactions of samarium isopropoxide with ethyl acetoacetate. B. S. Sankhla and R. N. Kapoor, 1369.

Organic compounds of uranium. Part I. Reactions of uranium pentaethoxide with β-ketoesters. A. M. Bhandari and R. N. Kapoor, 1468.
Proton magnetic resonance and infrared spectra of some complexes of N,N-dimethylacetamide. A. J. Carty, 1881.
The reductive dimerization of *N*-benzylidene aniline. J. G. Smith and C. D. Veach, 2497.
Sur les spectres infrarouges des phtalocyanines. H. F. Shurvell and L. Pinzuti, 125.

Photochemistry

Benzophenone-sensitized photolysis of cyclopentene. Preparation of *meso*- and DL-3,3′-bicyclopentenyl. K. S. Sidhu, O. P. Strausz, and H. E. Gunning, 531.
Chemical deactivation by hydrocarbons in the photolysis of hexafluoroacetone. S. N. Khanna and K. O. Kutschke, 1465.
Effect of CO and N_2 on mercury-photosensitized reactions. J. B. Homer and F. P. Lossing, 143.
The Hg $6(^3P_1)$ photosensitization of spiropentane. G. R. De Maré, L. G. Walker, O. P. Strausz, and H. E. Gunning, 457.
The Hg $6(^3P_1)$ photosensitized decomposition of methylenecyclobutane vapor. G. R. De Maré, O. P. Strausz, and H. E. Gunning, 953.
Intersystem crossing of the electronically excited dideuteroethylene molecules formed in benzene photosensitization. T. Terao, S. Hirokami, S. Sato, and R. J. Cvetanović, 2173.
Lifetime of the phosphorescence of hexafluoroacetone vapor. A. Gandini and K. O. Kutschke, 1720.
On the possible contribution of a molecular mechanism to the photodecomposition of nitrogen dioxide. K. F. Preston and R. J. Cvetanović, 2445.
The photochemical decomposition of sodium azide. P. W. M. Jacobs and A. R. T. Kureishy, 703.
The photoinitiated halogenation reactions of N-bromoacetanilide and N-bromo-2,4,6-trichloroacetanilide. D. D. Tanner and E. Protz, 1555.
The photolysis of CO_2 at 1 470 Å. A.-Y. Ung and H. I. Schiff, 1981.
Photolysis of Group VI hydrides. I. Solid H_2S, H_2S_2, and D_2S. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 2149.
Photolysis of mixes of perfluoroacetone and perfluorodiethyl ketone reactions of CF_3 and C_2F_5 radicals. A. S. Gordon, 529.
The photolysis of perfluoroazoethane at room temperature. J. R. Dacey, W. C. Kent, and G. O. Pritchard, 969.
Photolysis of solid carbonyl selenide and carbon diselenide. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 1677.
The photolytic and photosensitized decomposition of chloroform. I. Unger and G. P. Semeluk, 1427.
Photooxidation of propionaldehyde at low partial pressures of aldehyde. A. P. Altshuller, I. R. Cohen, and T. C. Purcell, 2973.

Physical properties

Electrical properties and structures of solid and liquid GeS, SnS, and PbS. G. Handfield, M. D'Amboise, and M. Bourgon, 853.
The electrolytic conductances of sodium chlorate and of lithium chlorate in water and in water–dioxane. A. N. Campbell, E. M. Kartzmark, and B. G. Oliver, 925.
Equilibrium constants of zinc(II) and copper(II) with hematoporphyrin IX. D. A. Brisbin and R. J. Balahura, 2157.
Excess volumes, vapor pressures, and related thermodynamic properties of the system acetone–chloroform–benzene, and its component binary systems. A. N. Campbell, E. M. Kartzmark, and R. M. Chatterjee, 1183.
The importance of inductive effects in α-silyl and α-germyl ketones. K. Yates and F. Agolini, 2229.
The ionization behavior of amides in concentrated sulfuric acids. III. Indicator activity coefficient variation. L. M. Sweeting and K. Yates, 2395.
Linear free energy relationships concerning equilibria in moderately concentrated mineral acids. A simple method for estimating p*K*'s of weak bases. J. F. Bunnett and F. P. Olsen, 1899.
Linear free energy relationships concerning reaction rates in moderately concentrated mineral acids. J. F. Bunnett and F. P. Olsen, 1917.
Mean molal activity coefficient ratios of mixed Na^+–K^+ solutions of *p*-toluene and polystyrene sulfonates. D. S. Gamble, J. A. Marinsky, and J. P. Guptill, 2181.
Multicomponent diffusion in the ^{85}Kr–SO_2–Kr system. A. Saran and Y. Singh, 2222.
Parachors and other properties of organotins. R. C. Putnam, 1343.
Phase transitions of adsorbates. I. Specific heat and dimensional changes of the porous glass – water system. G. G. Litvan, 2617.
Second virial coefficients and intermolecular forces for the ammonia–acetylene system. H. Y. Cheh, J. P. O'Connell, and J. M. Prausnitz, 429.
La solubilité dans les mélanges éther éthylique – acides inorganiques de certains sels de fer, cobalt et manganèse. R. A. A. Muzzarelli, 747.
A solvent-extraction study of the thermodynamics of aniline and its nitrate. A. Aboul-Seoud and M. Doheim, 521.
The system: aluminium–indium–silver. Part I. The binary and ternary miscibility gaps. A. N. Campbell and R. Wagemann, 657.
The systems sodium chlorate – water – dioxane and lithium chlorate – water – dioxane, at 25°. A. N. Campbell, E. M. Kartzmark, and W. B. Maryk, 935.
Thermodynamic and electrochemical properties of zirconium chlorides in alkali chloride melts. B. Swaroop and S. N. Flengas, 199.

Total cross sections for ionization by electron impact. A. G. Harrison, E. G. Jones, S. K. Gupta, and G. P. Nagy, 1967.

Polarography

The chemistry of iridium in basic aqueous solution. A polarographic study. G. Van Loon and J. A. Page, 515.
Polarographic half-wave potentials of some 1,4-naphthoquinones. D. J. Currie and H. L. Holmes, 1027.
Polarographic half-wave potentials of some β-nitrostyrene and related compounds. R. F. Silver and H. L. Holmes, 1031.
Polarography of 7-benzonorbornenones. H. Tanida, H. Miyazaki, and H. Ishitobi, 98.

Polymers

The anionic polymerization of allyl acrylate and of allyl methacrylate. S. Bywater, P. E. Black, and D. M. Wiles, 695.
Electrolytic formation of living polymers from styrene. B. L. Funt, D. Richardson, and S. N. Bhadani, 711.
Kinetic aspects of the copolymerization of tetrahydrofuran with propylene oxide. I. L. P. Blanchard, J. Singh, and M. D. Baijal, 2679.
Long carbon chain carbohydrate polymers. 1,3-(Bis-5-aldoxylosylidene-1)-acetone and its polymer with 1,3-dicarbethoxyacetone. P. E. Papadakis and S. M. Philip, 1841.
The polymerization of styrene by anhydrous perchloric acid and the spectra of benzylic carbonium ions. S. Bywater and D. J. Worsfold, 1671.
Preparation and characterization of sulfonated polystyrene latexes. F. S. Chan and D. A. I. Goring, 725.
Proton magnetic resonance line width as a function of polymer tacticity. S. Brownstein and D. M. Wiles, 153.

Radiation chemistry

Charge transfer in the radiolysis of binary hydrocarbon mixtures. J. A. Stone, A. R. Quirt, and O. A. Miller, 1175.
^{60}Co γ-radiolysis of hydrogen halides at 77 °K. R. C. Rumfeldt and D. A. Armstrong, 191.
Production of hydrated electrons. D. C. Walker, 2226.
The radiation-induced addition of HBr to olefins in the liquid phase. R. C. Rumfeldt and D. A. Armstrong, 2219.
Radiation-induced bromination of 2,3-dimethylbutane. O. H. Wheeler and H. B. de Pabon, 407.
γ-Radiation-induced hydrogen exchange reaction in liquid cyclohexane – hydrogen chloride solutions. J. W. Fletcher and G. R. Freeman, 2645.
The radiolysis of alkaline aqueous solutions containing hydrogen and oxygen. W. A. Armstrong, 737.
The radiolysis of trifluoroethanol. J. C. Russell and K. J. McCallum, 243.
The ranges of interactions in the radiolysis of solid hydrocarbon mixtures. P. J. Dyne and J. Denhartog, 461.

Solutions

The deuterium isotope effect and the molecular dynamics of water in benzene. D. C. Moule, 3009.
Diffusion in multicomponent aqueous systems. J. E. Lane and J. S. Kirkaldy, 477.
The energy of hydrogen bonding in the system: acetone–bromoform. A. N. Campbell and E. M. Kartzmark, 917.
Europium oxalate ion association in water. P. G. Manning, 3057.
The ionization behavior of amides in concentrated sulfuric acids. III. Indicator activity coefficient variation. L. M. Sweeting and K. Yates, 2395.
Linear free energy relationships concerning equilibria in moderately concentrated mineral acids. A simple method for estimating pK's of weak bases. J. F. Bunnett and F. P. Olsen, 1899.
Linear free energy relationships concerning reaction rates in moderately concentrated mineral acids. J. F. Bunnett and F. P. Olsen, 1917.
A method for the determination of water in nonpolar liquids; the solubility of water in benzene. D. C. Moule and W. M. Thurston, 1361.
Partition coefficients of some conjugated heteroenoid compounds and 1,4-naphthoquinones. D. J. Currie, C. E. Lough, R. F. Silver, and H. L. Holmes, 1035.
La solubilité dans les mélanges éther éthylique – acides inorganiques de certains sels de fer, cobalt et manganèse. R. A. A. Muzzarelli, 747.
The solvent isotope effect and the partial molar volume of ions. R. E. Robertson, S. E. Sugamori, R. Tse, and C.-Y. Wu, 487.
The sulfuric acid solvent system. Part VII. Solutions of some tin(IV) and lead(IV) compounds. R. J. Gillespie, R. Kapoor, and E. A. Robinson, 1197.
The sulfuric acid solvent system. Part VIII. Solutions of some phosphorus(V) and vanadium(V) compounds. R. J. Gillespie, R. Kapoor, and E. A. Robinson, 1203.
Ultraviolet, infrared, and Raman spectra of protonated carboxylic acids. S. Hoshino, H. Hosoya, and S. Nagakura, 1961.

Spectroscopy

A comparison of optimization methods for fitting curves to infrared band envelopes. J. Pitha and R. N. Jones, 3031.
Complexes of alkyl and aryl cyanides. Part III. The far-infrared spectra (500–200 cm^{-1}) and assignment of the metal–nitrogen stretching frequency in complexes with palladium(II), platinum(II), and rhodium-(III) halides. R. A. Walton, 1480.
Contribution à l'étude des spectres de vibration du dibenzofuranne. G. Davidovics, J. Chouteau, and H. Reymond, 3073.

The correlation of absorption spectra and structure of copper(II and I)–2,2′-biquinoline complexes in acetone media. G. H. Faye, 2729.
Effect of intramolecular hydrogen bonding on ionization constants of substituted salicylic acids. G. E. Dunn and F. Kung, 1261.
Infrared absorption of single crystals of anhydrous sodium formate. T. L. Charlton and K. B. Harvey, 2717.
Infrared spectra of GeH_3Br_2 and GeD_3Br_3. A. L. Beach and J. E. Griffiths, 743.
The infrared spectra of some mixed alkylarylarsonium salts. W. R. Cullen, G. B. Deacon, and J. H. S. Green, 717.
Infrared spectrum and structure of liquid water. M. Falk and T. A. Ford, 1699.
The infrared spectrum and thermal decomposition of hydrazine perchlorate hemihydrate. P. W. M. Jacobs and A. Russell-Jones, 2435.
Mass spectra of oxygenated quinolines. D. M. Clugston and D. B. MacLean, 781.
Organic and biological spectrochemical studies. XXII. The infrared, ultraviolet, and nuclear magnetic resonance spectra of some substituted 2-indanones and reference compounds. E. J. Moriconi, J. P. St. George, and W. F. Forbes, 759.
Organic and biological spectrochemical studies. XXIII. Conformation of the *p*-dimethoxybenzene cation radical in concentrated sulfuric acid. W. F. Forbes and P. D. Sullivan, 1501.
Polyfluorinated aromatic esters. Preparation and carbonyl stretching frequencies. R. Filler, J. F. White, A. J. Kacmarek, and I. J. Solomon, 2346.
Protonated carbonyl groups. VIII. Alkyluracil salts. D. Cook, 335.
Solvent effects on the ultraviolet spectra of N,N-dimethylformamide. M. F. Mayahi, A. H. Al-Taiar, S. A. Al-Baldawi, and H. A. Hussain, 2224.
Solvent shifts in charge-transfer spectra. Influence of donor strength. H. M. Rosenberg, E. Eimutis, and D. Hale, 2405.
The specificity of hydrogen bond formation between derivatives of nucleic acid bases and some analogues. J. Pitha, R. N. Jones, and P. Pithova, 1045.
Studies of metal complexes of pyridine derivatives. The effects of coordination upon infrared intensity of the functional group in *β*-cyanopyridine. D. G. Brewer and P. T. T. Wong, 1407.
The study of hydrogen bonding and related phenomena by spectroscopic methods. Part IX. The ultraviolet absorption spectrum of 3-trifluoromethyl-2-nitrophenol. A. Balasubramanian, W. F. Forbes, and J. C. Dearden, 961.
Sur les spectres infrarouges des phtalocyanines. H. F. Shurvell and L. Pinzuti, 125.
Ultraviolet, infrared, and Raman spectra of protonated carboxylic acids. S. Hoshino, H. Hosoya, and S. Nagakura, 1961.
Visible and ultraviolet absorption spectra of rhodium(III) in fused alkali chlorides and nitrates. F. B. Ogilvie and O. G. Holmes, 447.

Surfaces

Adsorption of cyclohexane and benzene on mixed hydroxides and oxides of magnesium and aluminium. R. I. Razouk, Sh. Nashed, and F. N. Antonious, 877.
Anodic oxide films on indium antimonide. A. C. Harkness and L. Young, 641.
The dielectric constant of ethyl chloride adsorbed on porous silica glass treated to remove silanol groups. R. Shigeishi and R. McIntosh, 1153.
Erratum: Studies of the dissociation of oxide surfaces at the liquid–solid interface. S. M. Ahmed, 2769.
A gravimetric study of hydration of polynucleotides. M. Falk, 1107.
High resistance anodic oxide films on aluminium. A. C. Harkness and L. Young, 2409.
The kinetics of sorption and desorption of water vapor by lead styphnate. T. B. Flanagan, 2941.
Phase transitions of adsorbates. I. Specific heat and dimensional changes of the porous glass – water system. G. G. Litvan, 2617.
Simultaneous analysis of two-component systems by diffuse reflectance spectroscopy. R. W. Frei, D. E. Ryan, and V. T. Lieu, 1945.
Some adsorption phenomena of nitroanilines on alkaline earth compounds. R. W. Frei, H. Zeitlin, and G. Fujie, 3051.
Sorption of hydrogen and oxygen by cadmium oxide. M. J. D. Low and A. M. Kamel, 1147.
Studies of the dissociation of oxide surfaces at the liquid–solid interface. S. M. Ahmed, 1663.
Thermal oxidation of Saran carbon. Part I. Studies under static oxygen system. R. G. Barradas, M. J. Dignam, and D. D. Chadha, 165.

Synthesis of organic compounds

Action des organomagnésiens sur les composés *β*-dicarbonylés. I. Obtention des *β*-diols bitertiaires par action des arylmagnésiens et des alkylmagnésiens sur les *β*-dicétones symetriques. P. Canonne and H. Bilodeau, 2849.
The addition of carboxylic acids to acetylenic compounds. J. DiPietro and W. J. Roberts, 2241.
2-Alkoxy-3-hydroxytetrahydropyrans and 2-alkoxy-3-hydroxytetrahydrofurans. I. Preparation, structure, and some derivatives. F. Sweet and R. K. Brown, 1571.
Amélioration de la synthèse des di- et tri-bromhydrines du pentaérythritol. M. Saucier, C. Sauriol, and R. L. Salvador, 1599.
Antineoplastic agents. XVII. N-(2-Bromoethyl)-N-(2-chloroethyl)amines. G. R. Pettit and M. R. Chamberland, 813.
Arylation des quinones par les sels de diazonium. VIII. Sur les 3-aryl-1,2-naphtoquinones. J. Asselin, P. Brassard, and P. L'Ecuyer, 2563.
Azaindoles. I. Preparation of 7-azaindoles by thermal indolization of 2-pyridylhydrazones. A. H. Kelly and J. Parrick, 2455.

The biosynthesis of fusaric acid from ^{14}C-labelled acetate in *Gibberella fujikuroi*. R. D. Hill, A. M. Unrau, and D. T. Canvin, 2077.
Carbonyl and thiocarbonyl compounds. X. Synthetic experiments with coumarin-2-thione and benzoxanthiones. N. Latif and I. Fathy, 1075.
Chemistry and synthesis of some dihydro-2*H*-1,4-benzothiazine derivatives. R. N. Parasad and K. Tietje, 1247.
Chemistry of tetrahydrofuranone derivatives. II. A convenient procedure for the synthesis of 3-alkyl-substituted furans. M. A. Gianturco and P. Friedel, 1083.
The chemistry of the aminochromes. IX. The reactions of glutathione with some halogenated aminochromes. G. L. Mattok and R. A. Heacock, 565.
The chemistry of the indole Grignard reagent. I. The reaction of indole magnesium iodide with ethyl chloroformate. S. Kašpárek and R. A. Heacock, 2805.
Chloromethyl–phosphorus compounds. Synthesis and infrared spectra. A. W. Frank and I. Gordon, 2593.
Concerning *cis*- and *trans*-3-thiocyanopropenal and the synthesis of isothiazole. R. Raap, 1324.
Configuration of Diels–Alder adduct of furan and acetylene dicarboxylic acid. J. Kallos and P. Deslongchamps, 1239.
A convenient method for the preparation of optically active benzyl-α-*d* alcohol. S. Wolfe and A. Rauk, 2591.
Cyanoesters and dinitriles. I. Synthesis of malononitriles from methylene ethers. N. Latif and N. Mishriky, 1271.
The dehydration of amides to nitriles with lithium aluminium hydride. L. G. Humber and M. A. Davis, 2113.
Derivatives of 4-amino-1-naphthol. M. A. Abdelkader, M. Khalifa, and Y. M. Abou-Zeid, 2915.
Derivatives of isotrithiocyanuric acid. D. L. Garmaise, 1801.
1,8-Diacetylnaphthalene and 3-methylphenalenone. D. F. Tavares and J. P. Borger, 1323.
1,4-Diarylphthalazines and 1,3-diarylisobenzofurans. W. W. Zajac, Jr. and D. E. Pichler, 833.
Diimide reduction of 12-membered cyclic olefins. H. Nozaki, Y. Simokawa, T. Mori, and R. Noyori, 2921.
The electrolysis of *o*-halogenophenyl substituted acids. R. G. Woolford and W. S. Lin, 2783.
Erratum: The alcoholysis of trialkylalkoxysilanes. Part II. The preparation and chemistry of methyl 2,3,4-tri-*O*-trimethylsilyl-α-D-glucopyranoside. D. T. Hurst and A. G. McInnes, 103.
Études sur la triméthyl-2,4,4 cyclohexanone et ses produits de réduction. J.-C. Richer and D. Perelman, 2003.
A general method for selective N-methylation of substituted tryptamines. J. K. Horner and W. A. Skinner, 315.
A general method of preparation of substituted 2-hydroxy-1,4-quinones. T. R. Kasturi and T. Arunachalam, 1086.
4-Hydroxyquinaldines in the Mannich reaction. I. Nabih and M. Nasr, 1863.
The interconversion of 5-chloro- and 5-hydroxy-dipyrrylmethenes. A. Markovac, B. D. Kulkarni, K. B. Shaw, and S. F. MacDonald, 2329.
Investigation of the structure of 1,5-methylene-quinolizidinium ion. O. E. Edwards, G. Fodor, and L. Marion, 13.
α-Nerol and α-geraniol. B. M. Mitzner, V. J. Mancini, and S. Lemberg, 2103.
A novel synthesis of some mixed arylmethyl–alkyl ethers. K. G. Rutherford, O. A. Mamer, J. M. Prokipcak, and R. A. Jobin, 2337.
On the condensation of *p*-cresol with glyoxal. B. S. Thyagarajan, K. K. Balasubramanian, and R. Bhima Rao, 633.
Organic sulfur compounds. II. Catalyzed sodium borohydride reductions of selected α-(*o*-nitrophenylthio) acids. R. T. Coutts, D. L. Barton, and E. M. Smith, 1733.
Polyfluorinated aromatic esters. Preparation and carbonyl stretching frequencies. R. Filler, J. F. White, A. J. Kacmarek, and I. J. Solomon, 2346.
Potential anticancer agents. III. Urethane-type nitrogen mustards of some synthetic estrogens. I. Niculescu-Duvăz, V. Feyns, E. Grant, and E. Tărnăuceanu, 1102.
The preparation and characterization of *cis*- and *trans*-2-hydro-3-chlorohexafluoro-2-butene. D. J. Burton, R. L. Johnson, and R. T. Bogan, 635.
Preparation and reactions of some pyrrylthiol esters. E. Bullock, T.-S. Chen, and C. E. Loader, 1007.
The preparation of 5-alkylthio, branched tryptamines. J. K. Horner, J. I. DeGraw, and W. A. Skinner, 307.
Preparation of *cis*- and *trans*-ocimene from catalytic pyrolysis of linalyl acetate. B. M. Mitzner, S. Lemberg, and E. T. Theimer, 1090.
The preparation of 9-hydroxypyrazolo[3,4-*b*]quinolines. R. T. Coutts and J. B. Edwards, 2009.
Preparation of 3,4-methylenedioxy- and 3,4-dimethoxy-6-aminophenol. D. G. Orphanos and A. Taurins, 1875.
The reaction of chloral with halobenzenes and with 2,4-dichlorophenol. Synthesis of halogenated ethylbenzenes and of α-methoxyphenylacetic acids. W. Reeve, J. P. Mutchler, and C. L. Liotta, 575.
The reaction of some compounds containing thioamide groups with 2,4,6-trichloro-1,3,5-triazine. A. Pollak, B. Stanovnik, and M. Tišler, 829.
The reaction of sulfur dichloride with *cis*,*cis*-1,5-cyclooctadiene. F. Lautenschlaeger, 2813.
Réactions de l'époxystyrène avec la glycine et ses dérivés. C. Berse and K. Jankowski, 1513.
Reductive cleavage with metal in liquid ammonia. I. The selective cleavage of the benzylthio C—S bond versus the benzylidenedioxy C—O bond in methyl *S*-benzyl-4,6-*O*-benzylidene-2-thio-α-D-altropyranosides; the influence of the cosolvent 1,2-dimethoxyethane on the course of the reaction. U. G. Nayak and R. K. Brown, 591.
The role of aspartic acid in the biosynthesis of ricinine. S. R. Johns and L. Marion, 23.
Some new routes for the synthesis of aromatic fluorine compounds. H. L. Sharma, V. N. Sharma, and R. L. Mital, 1327.

Stereochemical studies. V. Rearrangements accompanying attempts to epimerize 4-oxa-3-oxo-5α-cholestane and 4-oxa-3-oxo-5β-cholestane by Brewster and Kucera's method. W. H. Lunn, J. T. Edward, and S. Meyerson, 279.
The structures of two self-condensation products from *o*-aminobenzaldehyde. S. G. McGeachin, 2323.
Substitutions électrophiles en série naphtalènique. III. Sur le di-*t*-butyl-2,7 naphtalène. L. Erichomovitch, M. Ménard, F. L. Chubb, Y. Pépin, and J.-C. Richer, 2305.
Sur les présumés *cis*-dihalogénures de quinones. J. Y. Savoie and P. Brassard, 2867.
La synthèse de quelques nouvelles pyridazines bicycliques. L. Erichomovitch and F. L. Chubb, 2095.
Synthesis of chlorinated 2-(3-benzofuranyl)phenols. E. C. M. Coxworth, 1092.
The synthesis of 1-chloro-1-nitroalkenes. F. I. Carroll and J. A. Kepler, 2909.
The synthesis of 1,4-dichloro-1,4-dinitro-1,3-butadiene. F. I. Carroll, S. C. Kerbow, and M. E. Wall, 2115.
The synthesis of 5-dimethylaminoindole and derivatives. J. I. DeGraw, 387.
The synthesis of porphyrins derived from *Chlorobium* chlorophylls. J. L. Archibald, D. M. Walker, K. B. Shaw, A. Markovac, and S. F. MacDonald, 345.
Synthesis of quinazolone hydrazides as monoamine oxidase inhibitors. S. S. Parmar and R. C. Arora, 2100.
The synthesis of some iodophthalazines and phthalazinecarbonitriles. A. Hirsch and D. G. Orphanos, 1551.
The synthesis of some 6,7-methylenedioxy- and 6,7-dimethoxy-1,4-benzoxazin-2-ones. D. G. Orphanos and A. Taurins, 1795.
The synthesis of substituted biurets. H. Stollar, R. J. Ranz, and F. L. Chubb, 846.
1,2,3,4-Tetraphenyldiazetidine. A reexamination. J. G. Smith, 59.
Thiazoloisoquinolines. I. The synthesis of thiazolo[4,5-*c*]isoquinoline. C. E. Hall and A. Taurins, 2465.
Thiazoloisoquinolines. II. The synthesis of thiazolo[5,4-*c*]isoquinoline. C. E. Hall and A. Taurins, 2473.
Utilization of sulfur. Synthesis of symmetrical thiiranes from ketohydrazones. N. Latif, I. Fathy, N. Mishriky, and B. Haggag, 629.

Terpenes and steroids

Electrophilic reactions of steroidal and other α-phenyl dienes. M. Douek and G. Just, 2233.
Gas–liquid chromatography of terpenes. XV. The volatile oil of *Mentha arvensis* var. *glabrata* Ray. E. von Rudloff and F. W. Hefendehl, 2015.
The photolysis of 4,4-dimethylandrost-5-en-17β-ol-3-one. R. T. Taylor and G. Just, 1847.
Stereochemical studies. VI. Reactions of 3β-hydroxy-4-oxa-5α-estrane and 3α,17β-dihydroxy-4-oxa-5α-estrane. J. T. Edward and J.-M. Ferland, 1299.
Stereochemical studies. VII. Hydrogenation of some steroidal ketones over Adams' catalyst. J. T. Edward and J.-M. Ferland, 1311.
Stereochemical studies. VIII. Synthesis of *cis*-1-oxa-10-methyldecal-2-one. J. T. Edward and J.-M. Ferland, 1317.
Steroids and related natural products. XXVI. Synthesis of 3β-acetoxy-20-oxo-5β-pregna-14,16-diene. G. R. Pettit and D. M. Piatak, 844.
Steroids and related natural products. XXVIII. Stereochemistry of 3-hydroxy-4-oxa-5α-cholestane and related hemiacetals. G. R. Pettit, J. C. Knight, and W. J. Evers, 807.
Steroids and related natural products. XXIX. Sodium borohydride – boron trihalide reduction of 3-oxo-4-oxa-5α-cholestane. G. R. Pettit and W. J. Evers, 1097.
Steroids and related natural products. XXX. Selective reduction of esters. Part A. Benzoates. G. R. Pettit, B. Green, G. L. Dunn, P. Hofer, and W. J. Evers, 1283.
Steroids and related natural products. XXXI. Selective reduction of esters. Part B. Carbonates. G. R. Pettit and W. J. Evers, 1293.
Steroids and steroidases. I. Long-range effects and the preparation of A-homosteroids. J. B. Jones and P. Price, 999.
Steroids and steroidases. III. Dicyclohexylcarbodiimide – dimethyl sulfoxide oxidations of alcohols and thiols. J. B. Jones and D. C. Wigfield, 2517.
Structural biochemistry. II. Synthesis of 3β-hydroxy-17β-(L-prolyl-L-prolyl)amino-5α-androstane. G. R. Pettit, A. K. Das Gupta, and R. L. Smith, 2023.
Synthesis of 6-methylcholesta-3,5-diene; solvolysis of 6-methylcholesteryl iodide. G. Just and E. Lee-Ruff, 2587.

Theoretical studies

Addendum: Stereochemistry and seven coordination. T. A. Claxton and G. C. Benson, 1730.
The collision rate in a dilute classical gas. R. J. C. Brown, 1421.
Coulomb parameters in simple Hückel and omega technique molecular orbital methods. N. C. Baird and M. A. Whitehead, 1933.
A critique of Pauli repulsions and molecular geometry. R. F. W. Bader and H. J. T. Preston, 1131.
Dependence of bond angles on overlap integrals for some covalent hydrides. D. A. Hutchinson, 2711.
Étude des spectres de résonance paramagnétique électronique de radicaux allyliques polyorientés. C. Chachaty and J. Maruani, 2631.
Kihara potential and Lennard-Jones and Devonshire equation of state of liquids and dense gases. I. Nagata, 2651.
A perturbation calculation of the effect of electric interaction on proton magnetic shielding. T. Yonemoto, 223.
Relation between electrons and holes, and the vector-coupling coefficients for $p^m f^q$ and $d^n f^q$ configurations. G. L. Malli, 1451.
Stereochemistry and seven coordination. T. A. Claxton and G. C. Benson, 157.

Thermochemistry

Energetics of formation of some oxygenated ions and the proton affinities of carbonyl compounds. A. G. Harrison, A. Ivko, and D. Van Raalte, 1625.

The energy of hydrogen bonding in the system: acetone–bromoform. A. N. Campbell and E. M. Kartzmark, 917.

Excess volumes, vapor pressures, and related thermodynamic properties of the system acetone–chloroform–benzene, and its component binary systems. A. N. Campbell, E. M. Kartzmark, and R. M. Chatterjee, 1183.

Free radicals by mass spectrometry. XXXV. The heat of formation of allyl radical from biallyl pyrolysis. J. B. Homer and F. P. Lossing, 2211.

Heats of association of aqueous copper, nickel, and cobalt ions with halide ions. M. B. Kennedy and M. W. Lister, 1709.

Heats of potassium–lithium ion exchange on sulfonated polystyrene resins. W. R. Heumann and D. Patterson, 2139.

Thermal decomposition of molecular complexes. IV. Further studies of the β-quinol clathrates. H. G. McAdie, 1373.

The thermodynamic properties of hydrogen selenide. J. R. Rawling and J. M. Toguri, 451.

AUTHOR INDEX

Under each name are listed, in chronological order of publication, all articles in which an author has participated.

Abdelkader, M. A.
Derivatives of 4-amino-1-naphthol. M. A. Abdelkader, M. Khalifa, and Y. M. Abou-Zeid, 2915.
Aboul-Seoud, A.
A solvent-extraction study of the thermodynamics of aniline and its nitrate. A. Aboul-Seoud and M. Doheim, 521.
Abou-Zeid, Y. M.
Derivatives of 4-amino-1-naphthol. M. A. Abdelkader, M. Khalifa, and Y. M. Abou-Zeid, 2915.
Abramovitch, R. A.
Aromatic substitution. XIV. The homolytic phenylation of 3- and 4-picoline. A quantitative study of isomer and total rate ratios. R. A. Abramovitch and M. Saha, 1765.
Some steam-volatile components of the extractives from *Populus tremuloïdes* heartwood. R. A. Abramovitch and O. A. Koleoso, 2913.
Erratum: Aromatic substitution. XIV. The homolytic phenylation of 3- and 4-picoline. A quantitative study of isomer and total rate ratios. R. A. Abramovitch and M. Saha, 2926.
Abramson, K. H.
The description and use of a spin-echo spectrometer to study chemical exchange. K. H. Abramson, P. T. Inglefield, E. Krakower, and L. W. Reeves, 1685.
Abshire, C. J.
Addendum: Improved synthesis of *N*-alkyl-aspartic acids. C. J. Abshire and L. Berlinguet, 2354.
Adam, F. C.
A paramagnetic resonance study of hindered diarylmethyl radicals and related compounds. I. Analysis of the spectra. H. R. Falle and F. C. Adam, 1387.
A study of hindered diarylmethyl radicals. II. The benzhydryl model. F. C. Adam and H. R. Falle, 1397.
Adams, G. A.
The synthesis of D-*glycero*-L-*altro*-heptose, D-*glycero*-L-*allo*-heptose, and *meso*-*glycero*-*altro*-heptitol. R. Young and G. A. Adams, 32.
Agolini, F.
The importance of inductive effects in α-silyl and α-germyl ketones. K. Yates and F. Agolini, 2226.
Ahammad, A.
Cyclizations of dialdehydes with nitromethane. XIII. Synthesis of trehalose-type disaccharides containing nitrogeneous heptuloses. H. H. Baer and A. Ahammad, 2893.
Ahmed, S. M.
Studies of the dissociation of oxide surfaces at the liquid–solid interface. S. M. Ahmed, 1663.
Erratum: Studies of the dissociation of oxide surfaces at the liquid–solid interface. S. M. Ahmed, 2769.
Aidoo, A. S. K.
Quinodimethane chemistry. The generation and trapping of quinodimethanes from substituted aromatic hydrocarbons with high-potential quinones. J. W. Lown and A. S. K. Aidoo, 2507.
Al-Baldawi, S. A.
Solvent effects on the ultraviolet spectra of N,N-dimethylformamide. M. F. Mayahi, A. H. Al-Taiar, S. A. Al-Baldawi, and H. A. Hussain, 2224.
Allen, A. D.
Platinum(II) complexes containing α-hydroxyacetylenes. A. D. Allen and T. Theophanides, 2703.
Allen, C. F. H.
The thermal reversibility of the Michael reaction. V. The effect of the structure of certain thiol adducts on cleavage. C. F. H. Allen and W. J. Humphlett, 2315.
Al-Taiar, A. H.
Solvent effects on the ultraviolet spectra of N,N-dimethylformamide. M. F. Mayahi, A. H. Al-Taiar, S. A. Al-Baldawi, and H. A. Hussain, 2224.
Altshuller, A. P.
Photooxidation of propionaldehyde at low partial pressures of aldehyde. A. P. Altshuller, I. R. Cohen, and T. C. Purcell, 2973.
Amberg, C. H.
Catalytic hydrodesulfurization of thiophene. VI. Comparisons over molybdenum disulfide, cobalt molybdate, and chromia catalysts. S. Kolboe and C. H. Amberg, 2623.
Amenu-Kpodo, F. K.
Ion–molecule reactions in methyl alcohol and methyl-d_3 alcohol. J. C. J. Thynne, F. K. Amenu-Kpodo, and A. G. Harrison, 1655.
Anantaraman, R.
Electrophilic catalysis in solvolytic reactions. IX. Inductomeric effect. R. Anantaraman and M. R. Nair, 2415.

Anderson, H. J.
Pyrrole chemistry. V. Friedel–Crafts isopropylations of some pyrrole derivatives. H. J. Anderson and L. C. Hopkins, 1831.
Antonious, F. N.
Adsorption of cyclohexane and benzene on mixed hydroxides and oxides of magnesium and aluminium. R. I. Razouk, Sh. Nashed, and F. N. Antonious, 877.
Archibald, J. L.
The synthesis of porphyrins derived from *Chlorobium* chlorophylls J. L. Archibald, D. M. Walker, K. B. Shaw, A. Markovac, and S. F. MacDonald, 345.
Armstrong, D. A.
^{60}Co γ-radiolysis of hydrogen halides at 77 °K. R. C. Rumfeldt and D. A. Armstrong, 191.
The radiation-induced addition of HBr to olefins in the liquid phase. R. C. Rumfeldt and D. A. Armstrong, 2219.
Armstrong, W. A.
The radiolysis of alkaline aqueous solutions containing hydrogen and oxygen. W. A. Armstrong, 737.
Arora, R. C.
Synthesis of quinazolone hydrazides as monoamine oxidase inhibitors. S. S. Parmar and R. C. Arora, 2100.
Arthur, N. L.
Kinetics of the abstraction of hydrogen atoms from hydrogen sulfide by trifluoromethyl radicals. N. L. Arthur and T. N. Bell, 1445.
Arunachalam, T.
A general method of preparation of substituted 2-hydroxy-1,4-quinones. T. R. Kasturi and T. Arunachalam, 1086.
Asselin, J.
Arylation des quinones par les sels de diazonium. VIII. Sur les 3-aryl-1,2-naphtoquinones. J. Asselin, P. Brassard, and P. L'Ecuyer, 2563.
Ayer, W. A.
Alkaloids of the seeds of *Aspidosperma fendleri* Woodson. R. H. Burnell, J. D. Medina, and W. A. Ayer, 28.
Back, M. H.
Theories of inhibition by nitric oxide. M. H. Back and K. J. Laidler, 215.
The thermal decomposition of ethane. Part I. Initiation and termination steps. M. C. Lin and M. H. Back, 505.

Polarographic half-wave potentials of some 1,4-naphthoquinones. D. J. Currie and H. L. Holmes, 1027.
Partition coefficients of some conjugated heteroenoid compounds and 1,4-naphthoquinones. D. J. Currie, C. E. Lough, R. F. Silver, and H. L. Holmes, 1035.

The reaction of *n*-butylamine and benzylamine with some β-nitrostyrenes, diethyl benzalmalonates, and cinnamalmalononitriles. C. E. Lough and D. J. Currie, 1563.

Cvetanović, R. J.

Intersystem crossing of the electronically excited dideuteroethylene molecules formed in benzene photosensitization. T. Terao, S. Hirokami, S. Sato, and R. J. Cvetanović, 2173.

On the possible contribution of a molecular mechanism to the photodecomposition of nitrogen dioxide. K. F. Preston and R. J. Cvetanović, 2445.

Dacey, J. R.

Some hydrogen abstraction reactions of perfluoroethyl radicals. G. O. Pritchard, J. R. Dacey, W. C. Kent, and C. R. Simonds, 171.

The photolysis of perfluoroazoethane at room temperature. J. R. Dacey, W. C. Kent, and G. O. Pritchard, 969.

D'Amboise, M.

Electrical properties and structures of solid and liquid GeS, SnS, and PbS. G. Handfield, M. D'Amboise, and M. Bourgon, 853.

Das, A. K.

A refinement of the crystal structures of $(NH_4)_2TeBr_6$ and Cs_2TeBr_6. A. K. Das and I. D. Brown, 939.

Das Gupta, A. K.

Structural biochemistry. II. Synthesis of 3β-hydroxy-17β-(L-prolyl-L-prolyl)amino-5α-androstane. G. R. Pettit, A. K. Das Gupta, and R. L. Smith, 2023.

Dave, V.

The reaction of caryophyllene and diazoacetic ester; some observations on cyclopropanes. E. W. Warnhoff and V. Dave, 621.

Davidovics, G.

Contribution à l'étude des spectres de vibration du dibenzofuranne. G. Davidovics, J. Chouteau, and H. Reymond, 3073.

Davis, M. A.

The dehydration of amides to nitriles with lithium aluminium hydride. L. G. Humber and M. A. Davis, 2113.

Deacon, G. B.

The infrared spectra of some mixed alkylarylarsonium salts. W. R. Cullen, G. B. Deacon, and J. H. S. Green, 717.

Dearden, J. C.

The study of hydrogen bonding and related phenomena by spectroscopic methods. Part IX. The ultraviolet absorption spectrum of 3-trifluoromethyl-2-nitrophenol. A. Balasubramanian, W. F. Forbes, and J. C. Dearden, 961.

Deckers, J. M.

Chemical reactions in electrical discharges. II. The structure of the positive column in d-c. glow discharges through fast-flowing gases. J. L. Peeters, H. W. Rundle, and J. M. Deckers, 2981.

Chemical reactions in electrical discharges. III. The positive column in d-c. glow discharges through oxygen. H. W. Rundle, K. A. Gillespie, R. M. Yealland, R. Sova, and J. M. Deckers, 2995.

Deghenghi, R.

Mass spectra and reaction mechanism studies. The Favorsky–Marker rearrangement of 17α-bromopregnenolones in deuterated methanol. R. Deghenghi, G. Schilling, and G. Papineau-Couture, 789.

DeGraw, J. I.

The preparation of 5-alkylthio, branched tryptamines. J. K. Horner, J. I. DeGraw, and W. A. Skinner, 307.

The synthesis of 5-dimethylaminoindole and derivatives. J. I. DeGraw, 387.

De Maré, G. R.

The Hg $6(^3P_1)$ photosensitization of spiropentane. G. R. De Maré, L. G. Walker, O. P. Strausz, and H. E. Gunning, 457.

The Hg $6(^3P_1)$ photosensitized decomposition of methylenecyclobutane vapor. G. R. De Maré, O. P. Strausz, and H. E. Gunning, 953.

Denhartog, J.

The ranges of interactions in the radiolysis of solid hydrocarbon mixtures. P. J. Dyne and J. Denhartog, 461.

De Pabon, H. B.

Radiation-induced bromination of 2,3-dimethylbutane. O. H. Wheeler and H. B. de Pabon, 407.

Deslongchamps, P.

Configuration of Diels–Alder adduct of furan and acetylene dicarboxylic acid. J. Kallos and P. Deslongchamps, 1239.

Ormosia alkaloids. III. Chemistry of ormosanine and ormojanine; dehydrogenation to 3,6,8-trialkylated quinolines. Z. Valenta, P. Deslongchamps, M. H. Rashid, R. H. Wightman, and J. S. Wilson, 2525.

Ormosia alkaloids. IV. Stereochemistry of ormojanine; structure and stereochemistry of piptanthine, dasycarpine, and ormosinine. P. Deslongchamps, Z. Valenta, and J. S. Wilson, 2539.

Dhami, K. S.

^{13}C n.m.r. studies. VIII. ^{13}C spectra of some substituted anisoles. K. S. Dhami and J. B. Stothers, 2855.

Diaper, D. G. M.

Reactions of ozonides. IV. Ozonization of alkylcycloalkenes. D. G. M. Diaper, 2819.

Dick, A. J.

Selective nucleophilic substitution and preferential epoxide formation. A. J. Dick and J. K. N. Jones, 79.

Erratum: Synthesis of 4-acetamido-4-deoxy-sugars. A. J. Dick and J. K. N. Jones, 639.

Dignam, M. J.
Thermal oxidation of Saran carbon. Part I. Studies under static oxygen system. R. G. Barradas, M. J. Dignam, and D. D. Chadha, 165.
Diner, U. E.
A convenient methylation procedure. U. E. Diner, F. Sweet, and R. K. Brown, 1591.
DiPietro, J.
The addition of carboxylic acids to acetylenic compounds. J. DiPietro and W. J. Roberts, 2241.
Doheim, M.
A solvent-extraction study of the thermodynamics of aniline and its nitrate. A. Aboul-Seoud and M. Doheim, 521.
Douek, M.
Electrophilic reactions of steroidal and other α-phenyl dienes. M. Douek and G. Just, 2233.
Dunford, H. B.
The reactions of active nitrogen with ethylene and deuterated ethylenes. K. D. Foster, P. Kebarle, and H. B. Dunford, 2691.
Dunn, G. E.
Effect of intramolecular hydrogen bonding on ionization constants of substituted salicylic acids. G. E. Dunn and F. Kung, 1261.
Dunn, G. L.
Steroids and related natural products. XXX. Selective reduction of esters. Part A. Benzoates. G. R. Pettit, B. Green, G. L. Dunn, P. Hofer, and W. J. Evers, 1283.
Durst, T.
Organic sulfur mechanisms. III. A brief investigation into the reaction of benzonitrile oxide with sulfenes. J. F. King and T. Durst, 409.
The reaction of phenylmethanesulfonyl chloride with tertiary amines: formation of geometrical isomers about a carbon–sulfur double bond. J. F. King and T. Durst, 819.
Organic sulfur mechanisms. 5. Photolysis of unsaturated sultams and the question of abnormal addition to sulfenes. T. Durst and J. F. King, 1869.
Dutton, G. G. S.
Synthesis of 6′-substituted maltoses. G. G. S. Dutton and K. N. Slessor, 1069.
Dyne, P. J.
The ranges of interactions in the radiolysis of solid hydrocarbon mixtures. P. J. Dyne and J. Denhartog, 461.
Edward, J. T.
Stereochemical studies. V. Rearrangements accompanying attempts to epimerize 4-oxa-3-oxo-5α-cholestane and 4-oxa-3-oxo-5β-cholestane by Brewster and Kucera's method. W. H. Lunn, J. T. Edward, and S. Meyerson, 279.
Stereochemical studies. VI. Reactions of 3β-hydroxy-4-oxa-5α-estrane and 3α,17β-dihydroxy-4-oxa-5α-estrane. J. T. Edward and J.-M. Ferland, 1299.
Stereochemical studies. VII. Hydrogenation of some steroidal ketones over Adams' catalyst. J. T. Edward and J.-M. Ferland, 1311.
Stereochemical studies. VIII. Synthesis of *cis*-1-oxa-10-methyldecal-2-one. J. T. Edward and J.-M. Ferland, 1317.
Decomposition products of 5-oxo-3,5-seco-A-norcholestan-3-oic acid *p*-toluenesulfonylhydrazone. J. T. Edward, D. L'Anglais, and S. Meyerson, 1866.
Edwards, J. B.
The preparation of 9-hydroxypyrazolo[3,4-*b*]quinolines. R. T. Coutts and J. B. Edwards, 2009.
Edwards, O. E.
Investigation of the structure of 1,5-methylene-quinolizidinium ion. O. E. Edwards, G. Fodor, and L. Marion, 13.
The correlation of chasmanine with browniine. O. E. Edwards, L. Fonzes, and L. Marion, 583.
Eimutis, E.
Solvent shifts in charge-transfer spectra. Influence of donor strength. H. M. Rosenberg, E. Eimutis, and D. Hale, 2405.
Elofson, R. M.
The numerical analysis of electron spin resonance spectra with hyperfine structure. R. Newton, K. F. Schulz, and R. M. Elofson, 752.
Emslie, P. H.
Charge-transfer complexes of biphenylene. P. H. Emslie, R. Foster, and R. Pickles, 9.
Erichomovitch, L.
La synthèse de quelques nouvelles pyridazines bicycliques. L. Erichomovitch and F. L. Chubb, 2095.
Substitutions électrophiles en série naphtalènique. III. Sur le di-*t*-butyl-2,7 naphtalène. L. Erichomovitch, M. Ménard, F. L. Chubb, Y. Pépin, and J.-C. Richer, 2305.
Evans, F. J.
Reaction of thiols with epoxides of conjugated 1,4-diketones. H. S. Wilgus III, E. Frauenglass, P. P. Chiesa, G. H. Nawn, F. J. Evans, and J. W. Gates, Jr., 603.
Evans, M. J. B.
Kinetic studies of proton transfer from phenols to trinitrobenzyl anion. J. A. Blake, M. J. B. Evans, and K. E. Russell, 119.
Evers, W. J.
Steroids and related natural products. XXVIII. Stereochemistry of 3-hydroxy-4-oxa-5α-cholestane and related hemiacetals. G. R. Pettit, J. C. Knight, and W. J. Evers, 807.

Steroids and related natural products. XXIX. Sodium borohydride – boron trihalide reduction of 3-oxo-4-oxa-5α-cholestane. G. R. Pettit and W. J. Evers, 1097.
Steroids and related natural products. XXX. Selective reduction of esters. Part A. Benzoates. G. R. Pettit, B. Green, G. L. Dunn, P. Hofer, and W. J. Evers, 1283.
Steroids and related natural products. XXXI. Selective reduction of esters. Part B. Carbonates. G. R. Pettit and W. J. Evers, 1293.

Falk, M.
A gravimetric study of hydration of polynucleotides. M. Falk, 1107.
Infrared spectrum and structure of liquid water. M. Falk and T. A. Ford, 1699.
Studies on chitan (β-(1 → 4)-linked 2-acetamido-2-deoxy-D-glucan) fibers of the diatom *Thalassiosira fluviatilis* Hustedt. II. Proton magnetic resonance, infrared, and X-ray studies. M. Falk, D. G. Smith, J. McLachlan, and A. G. McInnes, 2269.

Falle, H. R.
A paramagnetic resonance study of hindered diarylmethyl radicals and related compounds. I. Analysis of the spectra. H. R. Falle and F. C. Adam, 1387.
A study of hindered diarylmethyl radicals. II. The benzhydryl model. F. C. Adam and H. R. Falle, 1397.

Fan, M.-L.
Alkaline permanganate decarboxylation of β-amino- and β-hydroxy-propionic acid. A. M. Unrau and M.-L. Fan, 2090.

Fathy, I.
Utilization of sulfur. Synthesis of symmetrical thiiranes from ketohydrazones. N. Latif, I. Fathy, N. Mishriky, and B. Haggag, 629.
Carbonyl and thiocarbonyl compounds. X. Synthetic experiments with coumarin-2-thione and benzoxanthiones. N. Latif and I. Fathy, 1075.

Faye, G. H.
A spectrophotometric study of hexa-, penta-, and tetra-coordinated halogenocopper(II) complexes in acetone – hydrohalic acid mixtures. G. H. Faye, 1643.
The correlation of absorption spectra and structure of pseudo-octahedral and trigonal bipyramidal copper(II)–1,10-phenanthroline complexes in acetone solutions. G. H. Faye, 2165.
The correlation of absorption spectra and structure of copper(II and I)–2,2′-biquinoline complexes in acetone media. G. H. Faye, 2729.

Ferland, J.-M.
Stereochemical studies. VI. Reactions of 3β-hydroxy-4-oxa-5α-estrane and 3α,17β-dihydroxy-4-oxa-5α-estrane. J. T. Edward and J.-M. Ferland, 1299.
Stereochemical studies. VII. Hydrogenation of some steroidal ketones over Adams' catalyst. J. T. Edward and J.-M. Ferland, 1311.
Stereochemical studies. VIII. Synthesis of *cis*-1-oxa-10-methyldecal-2-one. J. T. Edward and J.-M. Ferland, 1317.

Fetter, N. R.
Decarboxylation of strong acids by metal acetylacetonates. N. R. Fetter, 1463.

Feyns, V.
Potential anticancer agents. III. Urethane-type nitrogen mustards of some synthetic estrogens. I. Niculescu-Duvăz, V. Feyns, E. Grant, and E. Tărnăuceanu, 1102.

Filler, R.
Reaction of aroyl halides with aromatic aldehydes and acetophenones. R. Filler and F. N. Miller, 838.
Polyfluorinated aromatic esters. Preparation and carbonyl stretching frequencies. R. Filler, J. F. White, A. J. Kacmarek, and I. J. Solomon, 2346.

Fisher, I. P.
Free radicals by mass spectrometry. XXXIV. A flow reactor for measurement of fast thermal reactions. I. P. Fisher, J. B. Homer, B. Roberts, and F. P. Lossing, 2205.

Flanagan, T. B.
The kinetics of sorption and desorption of water vapor by lead styphnate. T. B. Flanagan, 2941.

Flengas, S. N.
Thermodynamic and electrochemical properties of zirconium chlorides in alkali chloride melts. B. Swaroop and S. N. Flengas, 199.

Fletcher, J. W.
γ-Radiation-induced hydrogen exchange reaction in liquid cyclohexane – hydrogen chloride solutions. J. W. Fletcher and G. R. Freeman, 2645.

Fliszár, S.
Étude quantitative des réactions d'ozonolyse. I. Ozonation du tétraphényléthylène. S. Fliszár, D. Gravel, and E. Cavalieri, 67.
Étude quantitative des réactions d'ozonolyse. II. Ozonation du *trans*-stilbène. S. Fliszár, D. Gravel, and E. Cavalieri, 1013.
Note sur le clivage de l'ozonide primaire du styrène. S. Fliszár, 2351.

Fodor, G.
Investigation of the structure of 1,5-methylene-quinolizidinium ion. O. E. Edwards, G. Fodor, and L. Marion, 13.

Fonzes, L.
The correlation of chasmanine with browniine. O. E. Edwards, L. Fonzes, and L. Marion, 583.

Forbes, W. F.
Organic and biological spectrochemical studies. XXII. The infrared, ultraviolet, and nuclear magnetic

resonance spectra of some substituted 2-indanones and reference compounds. E. J. Moriconi, J. P. St. George, and W. F. Forbes, 759.
The study of hydrogen bonding and related phenomena by spectroscopic methods. Part IX. The ultraviolet absorption spectrum of 3-trifluoromethyl-2-nitrophenol. A. Balasubramanian, W. F. Forbes, and J. C. Dearden, 961.
Organic and biological spectrochemical studies. XXIII. Conformation of the *p*-dimethoxybenzene cation radical in concentrated sulfuric acid. W. F. Forbes and P. D. Sullivan, 1501.

Ford, T. A.
Infrared spectrum and structure of liquid water. M. Falk and T. A. Ford, 1699.

Forman, A. G.
Rearrangement studies with ^{14}C. XXVI. Solvolyses of 2-(β-naphthyl)-1-^{14}C-ethyl *p*-toluenesulfonate. C. C. Lee and A. G. Forman, 841.

Forster, J. H.
Xenon yields in the fission of heavy elements by medium-energy protons. J. H. Forster, N. T. Porile, and L. Yaffe, 2951.

Foster, K. D.
The reactions of active nitrogen with ethylene and deuterated ethylenes. K. D. Foster, P. Kebarle, and H. B. Dunford, 2691.

Foster, R.
Charge-transfer complexes of biphenylene. P. H. Emslie, R. Foster, and R. Pickles, 9.

Frank, A. W.
Chloromethyl–phosphorus compounds. Synthesis and infrared spectra. A. W. Frank and I. Gordon, 2593.

Fraser, R. R.
The substituent effect on vicinal proton coupling constants in monosubstituted benzenes. R. R. Fraser, 2737.

Frauenglass, E.
Reaction of thiols with epoxides of conjugated 1,4-diketones. H. S. Wilgus III, E. Frauenglass, P. P. Chiesa, G. H. Nawn, F. J. Evans, and J. W. Gates, Jr., 603.

Freeman, G. R.
Comment: Definition of a biradical. G. R. Freeman, 245.
γ-Radiation-induced hydrogen exchange reaction in liquid cyclohexane – hydrogen chloride solutions. J. W. Fletcher and G. R. Freeman, 2645.

Frei, R. W.
Simultaneous analysis of two-component systems by diffuse reflectance spectroscopy. R. W. Frei, D. E. Ryan, and V. T. Lieu, 1945.
Some adsorption phenomena of nitroanilines on alkaline earth compounds. R. W. Frei, H. Zeitlin, and G. Fujie, 3051.

Friedel, P.
Chemistry of tetrahydrofuranone derivatives. II. A convenient procedure for the synthesis of 3-alkyl-substituted furans. M. A. Gianturco and P. Friedel, 1083.

Fritsch, A. J.
Nuclear magnetic resonance study of 2,3-quinoxalinedicarboxaldehyde and its cyclic monohydrate. E. J. Moriconi, J. W. Young, T. E. Brady, and A. J. Fritsch, 1596.

Fujie, G.
Some adsorption phenomena of nitroanilines on alkaline earth compounds. R. W. Frei, H. Zeitlin, and G. Fujie, 3051.

Fujisaki, H.
Mass spectrometric study of subliming selenium. H. Fujisaki, J. B. Westmore, and A. W. Tickner, 3063.

Fukushima, T.
Liquid-phase oxidation of cyclohexene in the presence of benzaldehyde. T. Ikawa, T. Fukushima, M. Muto, and T. Yanagihara, 1817.

Funt, B. L.
Electrolytic formation of living polymers from styrene. B. L. Funt, D. Richardson, and S. N. Bhadani, 711.

Galateanu, I.
Étude de la formation des complexes du protactinium avec les acides di- et poly-carboxyliques par la méthode d'échange d'ions. I. Galateanu, 647.

Gale, I. A. D.
A comment on the inadequacy of the correlation between phyllo-type spectrum and *meso*-substitution in the porphyrin series. R. Bonnett, I. A. D. Gale, and G. F. Stephenson, 2503.

Gamble, D. S.
Mean molal activity coefficient ratios of mixed Na^+–K^+ solutions of *p*-toluene and polystyrene sulfonates. D. S. Gamble, J. A. Marinsky, and J. P. Guptill, 2181.

Gandini, A.
Lifetime of the phosphorescence of hexafluoroacetone vapor. A. Gandini and K. O. Kutschke, 1720.

Anodic oxide films on indium antimonide. A. C. Harkness and L. Young, 641.
High resistance anodic oxide films on aluminium. A. C. Harkness and L. Young, 2409.

Harrison, A. G.
Reactions of thermal energy ions. II. Rates of some hydrogen transfer ion–molecule reactions. A. G. Harrison, A. Ivko, and T. W. Shannon, 1351.
Energetics of formation of some oxygenated ions and the proton affinities of carbonyl compounds. A. G. Harrison, A. Ivko, and D. Van Raalte, 1625.
Ion–molecule reactions in methyl alcohol and methyl-d_3 alcohol. J. C. J. Thynne, F. K. Amenu-Kpodo, and A. G. Harrison, 1655.
Total cross sections for ionization by electron impact. A. G. Harrison, E. G. Jones, S. K. Gupta, and G. P. Nagy, 1967.

Harvey, K. B.
Infrared absorption of single crystals of anhydrous sodium formate. T. L. Charlton and K. B. Harvey, 2717.

Haskins, R. H.
A new galactobiosyl glucose formed from lactose by *Chaetomium globosum*. P. A. J. Gorin, R. H. Haskins, and D. W. S. Westlake, 2083.

Hata, N.
Studies on hydrogen–oxygen systems in the electric discharge. I. The reactions of hydrogen atoms with hydrogen peroxide. N. Hata and P. A. Giguère, 869.

Hawton, L. D.
The thermal unimolecular isomerization of 1,2-dichloroethylene. L. D. Hawton and G. P. Semeluk, 2143.

Heacock, R. A.
The chemistry of the aminochromes. IX. The reactions of glutathione with some halogenated aminochromes. G. L. Mattok and R. A. Heacock, 565.
The chemistry of the indole Grignard reagent. I. The reaction of indole magnesium iodide with ethyl chloroformate. S. Kašpárek and R. A. Heacock, 2805.

Hefendehl, F. W.
Gas–liquid chromatography of terpenes. XV. The volatile oil of *Mentha arvensis* var. *glabrata* Ray. E. von Rudloff and F. W. Hefendehl, 2015.

Heitner, C.
Deuterium isotope effect on the racemization of a highly hindered biphenyl derivative. C. Heitner and K. T. Leffek, 2567.

Heppolette, R. L.
Effect of α-methylation on the parameters characterizing hydrolysis in water for a series of halides and sulfonates. R. L. Heppolette and R. E. Robertson, 677.

Heumann, W. R.
Heats of potassium–lithium ion exchange on sulfonated polystyrene resins. W. R. Heumann and D. Patterson, 2139.

Heyding, R. D.
The copper/selenium system. R. D. Heyding, 1233.
Arsenides of the transition metals. VIII. Some binary and ternary Group VIII diarsenides and their magnetic and electrical properties. S. L. Bennett and R. D. Heyding, 3017.
Hill, R. D.
The biosynthesis of fusaric acid from ^{14}C-labelled acetate in *Gibberella fujikuroi*. R. D. Hill, A. M. Unrau, and D. T. Canvin, 2077.
Hindmarsh, K. W.
Reaction of sodium *o*-nitrophenolates with ethyl 2-bromo-2-cyanoacetate. R. T. Coutts and K. W. Hindmarsh, 2092.
Organic sulfur compounds. III. Condensations involving *o*-nitrobenzenesulfenyl chloride. R. T. Coutts, K. W. Hindmarsh, and N. J. Pound, 2105.
Hirokami, S.
Intersystem crossing of the electronically excited dideuteroethylene molecules formed in benzene photosensitization. T. Terao, S. Hirokami, S. Sato, and R. J. Cvetanović, 2173.
Hirsch, A.
The synthesis of some iodophthalazines and phthalazinecarbonitriles. A. Hirsch and D. G. Orphanos, 1551.
On the formation of a peroxy phthalazine compound by the autoxidation of 1-methyl-1,2-dihydrophthalazine. A. Hirsch and D. G. Orphanos, 2109.
Hocking, M. B.
A 5-phosphafulvene Wittig reagent. M. B. Hocking, 1581.
Hodgkin, J. H.
The occurrence of 2,3-dibromobenzyl alcohol 4,5-disulfate, dipotassium salt, in *Polysiphonia lanosa*. J. H. Hodgkin, J. S. Craigie, and A. G. McInnes, 74.
Erratum: The occurrence of 2,3-dibromobenzyl alcohol 4,5-disulfate, dipotassium salt, in *Polysiphonia lanosa*. J. H. Hodgkin, J. S. Craigie, and A. G. McInnes, 1604.
Hofer, P.
Steroids and related natural products. XXX. Selective reduction of esters. Part A. Benzoates. G. R. Pettit, B. Green, G. L. Dunn, P. Hofer, and W. J. Evers, 1283.
Holmes, H. L.
Polarographic half-wave potentials of some 1,4-naphthoquinones. D. J. Currie and H. L. Holmes, 1027.
Polarographic half-wave potentials of some β-nitrostyrene and related compounds. R. F. Silver and H. L. Holmes, 1031.
Partition coefficients of some conjugated heteroenoid compounds and 1,4-naphthoquinones. D. J. Currie, C. E. Lough, R. F. Silver, and H. L. Holmes, 1035.
Holmes, O. G.
Visible and ultraviolet absorption spectra of rhodium(III) in fused alkali chlorides and nitrates. F. B. Ogilvie and O. G. Holmes, 447.
Holt, A. S.
Structures of *Chlorobium* chlorophylls (660). A. S. Holt, J. W. Purdie, and J. W. F. Wasley, 88.
Homer, J. B.
Effect of CO and N_2 on mercury-photosensitized reactions. J. B. Homer and F. P. Lossing, 143.
Free radicals by mass spectrometry. XXXIV. A flow reactor for measurement of fast thermal reactions. I. P. Fisher, J. B. Homer, B. Roberts, and F. P. Lossing, 2205.
Free radicals by mass spectrometry. XXXV. The heat of formation of allyl radical from biallyl pyrolysis. J. B. Homer and F. P. Lossing, 2211.
Hopkins, L. C.
Pyrrole chemistry. V. Friedel–Crafts isopropylations of some pyrrole derivatives. H. J. Anderson and L. C. Hopkins, 1831.
Horner, J. K.
The preparation of 5-alkylthio, branched tryptamines. J. K. Horner, J. I. DeGraw, and W. A. Skinner, 307.
A general method for selective N-methylation of substituted tryptamines. J. K. Horner and W. A. Skinner, 315.
Horswill, E. C.
The oxidation of phenols. I. The oxidation of 2,6-di-*t*-butyl-4-methylphenol, 2,6-di-*t*-butylphenol, and 2,6-dimethylphenol with peroxy radicals. E. C. Horswill and K. U. Ingold, 263.
The oxidation of phenols. II. The oxidation of 2,4-di-*t*-butylphenol with peroxy radicals. E. C. Horswill and K. U. Ingold, 269.
The oxidation of phenols. III. The stoichiometries for the oxidation of some substituted phenols with peroxy radicals. E. C. Horswill, J. A. Howard, and K. U. Ingold, 985.
Hoshino, S.
Ultraviolet, infrared, and Raman spectra of protonated carboxylic acids. S. Hoshino, H. Hosoya, and S. Nagakura, 1961.
Hosoya, H.
Ultraviolet, infrared, and Raman spectra of protonated carboxylic acids. S. Hoshino, H. Hosoya, and S. Nagakura, 1961.
Howard, A. S.
The essential oil of *Illicium anisatum* Linn. W. B. Cook and A. S. Howard, 2461.
Howard, J. A.
The oxidation of phenols. III. The stoichiometries for the oxidation of some substituted phenols with peroxy radicals. E. C. Horswill, J. A. Howard, and K. U. Ingold, 985.

Absolute rate constants for hydrocarbon autoxidation. III. α-Methylstyrene, β-methylstyrene, and indene. J. A. Howard and K. U. Ingold, 1113.
Absolute rate constants for hydrocarbon autoxidation. IV. Tetralin, cyclohexene, diphenylmethane, ethylbenzene, and allylbenzene. J. A. Howard and K. U. Ingold, 1119.

Hulyalkar, R. K.
Selective reduction of substituted aldonolactones to aldose derivatives. R. K. Hulyalkar, 1594.
The water-soluble polysaccharides of dermatophytes. VI. Glucans from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton Schönleinii*. C. T. Bishop, M. B. Perry, R. K. Hulyalkar, and F. Blank, 2299.

Humber, L. G.
The dehydration of amides to nitriles with lithium aluminium hydride. L. G. Humber and M. A. Davis, 2113.

Humphlett, W. J.
The thermal reversibility of the Michael reaction. V. The effect of the structure of certain thiol adducts on cleavage. C. F. H. Allen and W. J. Humphlett, 2315.

Hurst, D. T.
Erratum: The alcoholysis of trialkylalkoxysilanes. Part II. The preparation and chemistry of methyl 2,3,4-tri-*O*-trimethylsilyl-α-D-glucopyranoside. D. T. Hurst and A. G. McInnes, 103.

Hussain, H. A.
Solvent effects on the ultraviolet spectra of N,N-dimethylformamide. M. F. Mayahi, A. H. Al-Taiar, S. A. Al-Baldawi, and H. A. Hussain, 2224.

Hutchinson, D. A.
Dependence of bond angles on overlap integrals for some covalent hydrides. D. A. Hutchinson, 2711.

Hutton, H. M.
Solvent dependence of $^{29}Si—^{19}F$ coupling constant in silicon tetrafluoride. The importance of intermolecular dispersion interactions. H. M. Hutton, E. Bock, and T. Schaefer, 2772.

Hyne, J. B.
On the pressure dependence of reaction rates. H. S. Golinkin, W. G. Laidlaw, and J. B. Hyne, 2193.

Ikawa, T.
Liquid-phase oxidation of cyclohexene in the presence of benzaldehyde. T. Ikawa, T. Fukushima, M. Muto, and T. Yanagihara, 1817.

Inglefield, P. T.
The description and use of a spin-echo spectrometer to study chemical exchange. K. H. Abramson, P. T. Inglefield, E. Krakower, and L. W. Reeves, 1685.

Ingold, K. U.
The oxidation of phenols. I. The oxidation of 2,6-di-*t*-butyl-4-methylphenol, 2,6-di-*t*-butylphenol, and 2,6-dimethylphenol with peroxy radicals. E. C. Horswill and K. U. Ingold, 263.
The oxidation of phenols. II. The oxidation of 2,4-di-*t*-butylphenol with peroxy radicals. E. C. Horswill and K. U. Ingold, 269.
The inhibited autoxidation of styrene. Part V. The kinetics and deuterium isotope effect for inhibition by diphenylamine, phenyl-α-naphthylamine, and phenyl-β-naphthylamine. I. T. Brownlie and K. U. Ingold, 861.
The oxidation of phenols. III. The stoichiometries for the oxidation of some substituted phenols with peroxy radicals. E. C. Horswill, J. A. Howard, and K. U. Ingold, 985.
Absolute rate constants for hydrocarbon autoxidation. III. α-Methylstyrene, β-methylstyrene, and indene. J. A. Howard and K. U. Ingold, 1113.
Absolute rate constants for hydrocarbon autoxidation. IV. Tetralin, cyclohexene, diphenylmethane, ethylbenzene, and allylbenzene. J. A. Howard and K. U. Ingold, 1119.
Reactions of alkoxy radicals. I. Hydrogen atom abstraction from substituted toluenes. B. R. Kennedy and K. U. Ingold, 2381.

Isaacs, N. S.
The chemistry of episulfides. I. The reactivities of propylene sulfide and propylene oxide towards aniline. N. S. Isaacs, 395.
Concerning the reaction between maleic anhydride and indene. N. S. Isaacs, 415.

Ishikawa, T.
Preparation and stereochemistry of 1,2-*O*-(2′-hydroxyethylidene)- and 1,2-*O*-(hydroxyisopropylidene)-glycerols. P. A. J. Gorin and T. Ishikawa, 1787.

Ishitobi, H.
Polarography of 7-benzonorbornenones. H. Tanida, H. Miyazaki, and H. Ishitobi, 98.

Ito, T.
Synthesis and nuclear magnetic resonance spectrum of 3′,4′,6′-tri-*O*-acetyl-2-(methylthio)-D-glucopyrano-[2′,1′:4,5]-2-thiazoline. T. Ito, 94.

Ivko, A.
Reactions of thermal energy ions. II. Rates of some hydrogen transfer ion–molecule reactions. A. G. Harrison, A. Ivko, and T. W. Shannon, 1351.
Energetics of formation of some oxygenated ions and the proton affinities of carbonyl compounds. A. G. Harrison, A. Ivko, and D. Van Raalte, 1625.

Jacobs, P. W. M.
The photochemical decomposition of sodium azide. P. W. M. Jacobs and A. R. T. Kureishy, 703.
The infrared spectrum and thermal decomposition of hydrazine perchlorate hemihydrate. P. W. M. Jacobs and A. Russell-Jones, 2435.

James, B. R.
Kinetic studies of chloro complexes of rhodium as hydrogenation catalysts. B. R. James and G. L. Rempel, 233.
Kinetics and mechanism of complex formation between ethylene and ruthenium(II) chloride in aqueous solution. J. Halpern and B. R. James, 495.
Homogeneous catalysis of D_2–H_2O exchange by ruthenium(III) chloride: Evidence for the heterolytic splitting of hydrogen. J. Halpern and B. R. James, 671.
Jankowski, K.
Réactions de l'époxystyrène avec la glycine et ses dérivés. C. Berse and K. Jankowski, 1513.
Janzen, A. F.
The reaction of hexafluoroacetone with silanols. A. F. Janzen and C. J. Willis, 745.
Jobin, R. A.
A novel synthesis of some mixed arylmethyl–alkyl ethers. K. G. Rutherford, O. A. Mamer, J. M. Prokipcak, and R. A. Jobin, 2337.
Johns, S. R.
The role of aspartic acid in the biosynthesis of ricinine. S. R. Johns and L. Marion, 23.
Johnson, A. W.
The chemistry of ylids. XV. Mechanism of the reaction of iminophosphoranes with carbonyl compounds. A. W. Johnson and S. C. K. Wong, 2793.
Johnson, K. E.
Electrolytic reduction and Ellingham diagrams for oxy-anion systems. H. E. Bartlett and K. E. Johnson, 2119.
Johnson, R. L.
The preparation and characterization of *cis*- and *trans*-2-hydro-3-chlorohexafluoro-2-butene. D. J. Burton, R. L. Johnson, and R. T. Bogan, 635.
Joncich, M. J.
Preparation of metal nitrides by the exploding wire technique. M. J. Joncich, J. W. Vaughn, and B. F. Knutsen, 137.
Jones, E. G.
Total cross sections for ionization by electron impact. A. G. Harrison, E. G. Jones, S. K. Gupta, and G. P. Nagy, 1967.
Jones, J. B.
Steroids and steroidases. I. Long-range effects and the preparation of A-homosteroids. J. B. Jones and P. Price, 999.
Carcinogenicity of lactones. I. The reaction of 4-methylbuteno- and 4-methylbutano-γ-lactones with primary amines. J. B. Jones and J. M. Young, 1059.
Steroids and steroidases. III. Dicyclohexylcarbodiimide – dimethyl sulfoxide oxidations of alcohols and thiols. J. B. Jones and D. C. Wigfield, 2517.
Jones, J. K. N.
Selective nucleophilic substitution and preferential epoxide formation. A. J. Dick and J. K. N. Jones, 79.
Cholla gum. I. Structure of the degraded cholla gum. V. M. Parikh and J. K. N. Jones, 327.
The separation of aldopentose and aldohexose diethyl dithioacetal derivatives by gas–liquid partition chromatography. D. T. Williams and J. K. N. Jones, 412.
Erratum: Synthesis of 4-acetamido-4-deoxy-sugars. A. J. Dick and J. K. N. Jones, 639.
Reactions of sugar chlorosulfates. VII. Some conformational aspects. A. G. Cottrell, E. Buncel, and J. K. N. Jones, 1483.
Cholla gum. II. Structure of the undegraded cholla gum. V. M. Parikh and J. K. N. Jones, 1531.
A one-step conversion of cyclohexene oxide into *cis*-1,2-dichlorocyclohexane. J. R. Campbell, J. K. N. Jones, and S. Wolfe, 2339.
Jones, R. G.
The high resolution nuclear magnetic resonance spectrum of the nonrigid AB_2X_2 system. R. G. Jones, 1725.
Jones, R. N.
The specificity of hydrogen bond formation between derivatives of nucleic acid bases and some analogues. J. Pitha, R. N. Jones, and P. Pithova, 1045.
A comparison of optimization methods for fitting curves to infrared band envelopes. J. Pitha and R. N. Jones, 3031.
Joy, H. W.
Ionization potentials of alkyl free radicals and *n*-alkanes through $C_{17}H_{36}$ by energy-calibrated molecular orbital methods. C. E. Melton and H. W. Joy, 1455.
Jull, C. A.
Coordination compounds of olefins with anhydrous silver salts. III. Kinetics of the gas–solid reaction producing $AgBF_4.2C_3H_6$. C. A. Jull, R. J. Kominar, N. K. Mainland, and H. W. Quinn, 2663.
Just, G.
The photolysis of 4,4-dimethylandrost-5-en-17β-ol-3-one. R. T. Taylor and G. Just, 1847.
Electrophilic reactions of steroidal and other α-phenyl dienes. M. Douek and G. Just, 2233.
Synthesis of 6-methylcholesta-3,5-diene; solvolysis of 6-methylcholesteryl iodide. G. Just and E. Lee-Ruff, 2587.
Photochemical transformations of dienes. VII. Stereochemistry of addition of alcohol, and effect of substituents and acids on the photochemistry of cholesta-3,5-dienes. G. Bauslaugh, G. Just, and E. Lee-Ruff, 2837.
Metabolites of pathogenic fungi. V. Isolation and tentative structures of vioxanthin and viopurpurin, two colored metabolites of *Trichophyton violaceum*. F. Blank, A. S. Ng, and G. Just, 2873.

Kacmarek, A. J.
Polyfluorinated aromatic esters. Preparation and carbonyl stretching frequencies. R. Filler, J. F. White, A. J. Kacmarek, and I. J. Solomon, 2346.
Kallos, J.
Configuration of Diels–Alder adduct of furan and acetylene dicarboxylic acid. J. Kallos and P. Deslongchamps, 1239.
Kalnins, M. V.
Reactions of phthalimide and potassium phthalimide with sulfur monochloride. M. V. Kalnins, 2111.

Lalancette, J. M.
Boron sulfide as a source of acyloxyborane. J. M. Lalancette, F. Bessette, and J. M. Cliche, 1577.
Lane, J. E.
Diffusion in multicomponent aqueous systems. J. E. Lane and J. S. Kirkaldy, 477.
L'Anglais, D.
Decomposition products of 5-oxo-3,5-seco-A-norcholestan-3-oic acid *p*-toluenesulfonylhydrazone. J. T. Edward, D. L'Anglais, and S. Meyerson, 1866.
Latif, N.
Utilization of sulfur. Synthesis of symmetrical thiiranes from ketohydrazones. N. Latif, I. Fathy, N. Mishriky, and B. Haggag, 629.
Carbonyl and thiocarbonyl compounds. X. Synthetic experiments with coumarin-2-thione and benzoxanthiones. N. Latif and I. Fathy, 1075.
Cyanoesters and dinitriles. I. Synthesis of malononitriles from methylene ethers. N. Latif and N. Mishriky, 1271.
Lautenschlaeger, F.
The reaction of sulfur dichloride with *cis,cis*-1,5-cyclooctadiene. F. Lautenschlaeger, 2813.
L'Ecuyer, P.
Arylation des quinones par les sels de diazonium. VIII. Sur les 3-aryl-1,2-naphtoquinones. J. Asselin, P. Brassard, and P. L'Ecuyer, 2563.
Lee, C. C.
Rearrangement studies with ^{14}C. XXVI. Solvolyses of 2-(β-naphthyl)-1-^{14}C-ethyl *p*-toluenesulfonate. C. C. Lee and A. G. Forman, 841.
Rearrangement studies with ^{14}C. XXVIII. Solvolyses of 1-^{14}C-1-propyl *p*-toluenesulfonate. C. C. Lee and J. E. Kruger, 2343.
Solvolyses of 2-(2,4-dimethoxyphenyl)-1,1-d_2-ethyl and 2-(3,5-dimethoxyphenyl)-1,1-d_2-ethyl *p*-bromobenzenesulfonates; ion-pair returns in solvolyses of 2-arylethyl systems. C. C. Lee and L. Noszkó, 2481.
Secondary kinetic isotope effects in the solvolyses of 2-(2,4-dimethoxyphenyl)-1,1-d_2-ethyl and 2-(3,5-dimethoxyphenyl)-1,1-d_2-ethyl *p*-bromobenzenesulfonates. C. C. Lee and L. Noszkó, 2491.
Lee, J. B.
Sugar esters. III. New reagent for deoxyhalo sugar preparation. J. B. Lee and T. J. Nolan, 1331.
Lee-Ruff, E.
Synthesis of 6-methylcholesta-3,5-diene; solvolysis of 6-methylcholesteryl iodide. G. Just and E. Lee-Ruff, 2587.
Photochemical transformations of dienes. VII. Stereochemistry of addition of alcohol, and effect of substituents and acids on the photochemistry of cholesta-3,5-dienes. G. Bauslaugh, G. Just, and E. Lee-Ruff, 2837.
Leffek, K. T.
Deuterium isotope effect on the racemization of a highly hindered biphenyl derivative. C. Heitner and K. T. Leffek, 2567.
Lemberg, S.
Preparation of *cis*- and *trans*-ocimene from catalytic pyrolysis of linalyl acetate. B. M. Mitzner, S. Lemberg, and E. T. Theimer, 1090.
α-Nerol and α-geraniol. B. M. Mitzner, V. J. Mancini, and S. Lemberg, 2103.
Lemieux, R. U.
The proton magnetic resonance spectra and tautomeric equilibria of aldoses in deuterium oxide. R. U. Lemieux and J. D. Stevens, 249.
Reactions of 2-acetoxy-4,6-di-*O*-acetyl-3-*O*-(2,6-dichlorobenzoyl)-D-glucal, tri-*O*-acetyl-3-deoxy-α-D-*erythro*-hex-2-enopyranosyl chloride, and related compounds. R. U. Lemieux and R. J. Bose, 1855.
Li, N. C.
Preparation and characterization of some binary and ternary metal complexes of imidazole and amino acids. G. N. Rao and N. C. Li, 1637.
Preparation and characterization of some binary and ternary complexes of benzoyltrifluoroacetone and phosphorus esters. G. N. Rao and N. C. Li, 2775.
Lichtin, N. N.
Reactions of active nitrogen with organic substrates. IV. Isoprene. T. Hanafusa and N. N. Lichtin, 1230.
Lieu, V. T.
Simultaneous analysis of two-component systems by diffuse reflectance spectroscopy. R. W. Frei, D. E. Ryan, and V. T. Lieu, 1945.
Lim, T. K.
Automatic direct analysis of A_2B_2 nuclear magnetic resonance spectra. T. K. Lim, A. Taurins, and M. A. Whitehead, 1211.
Lin, M. C.
The thermal decomposition of ethane. Part I. Initiation and termination steps. M. C. Lin and M. H. Back, 505.
The reaction of hydrogen and ethylene in the gas phase. M. C. Lin, 1237.
The thermal decomposition of ethane. Part II. The unimolecular decomposition of the ethane molecule and the ethyl radical. M. C. Lin and M. H. Back, 2357.
The thermal decomposition of ethane. Part III. Secondary reactions. M. C. Lin and M. H. Back, 2369.
Kinetics of the decompositions of ethane and propane sensitized by azomethane. The decomposition of the normal propyl radical. M. C. Lin and K. J. Laidler, 2927.

Lin, M.-S.
The elucidation of the structures of ochotensine and ochotensimine. S. McLean, M.-S. Lin, and R. H. F. Manske, 2449.
Lin, W. S.
The electrolysis of *o*-halogenophenyl-substituted acids. R. G. Woolford and W. S. Lin, 2783.
Liotta, C. L.
The reaction of chloral with halobenzenes and with 2,4-dichlorophenol. Synthesis of halogenated ethylbenzenes and of α-methoxyphenylacetic acids. W. Reeve, J. P. Mutchler, and C. L. Liotta, 575.
Lister, M. W.
Ion pair effects in the reaction between potassium ferrocyanide and potassium persulfate. R. W. Chlebek and M. W. Lister, 437.
Heats of association of aqueous copper, nickel, and cobalt ions with halide ions. M. B. Kennedy and M. W. Lister, 1709.
Litvan, G. G.
Phase transitions of adsorbates. I. Specific heat and dimensional changes of the porous glass – water system. G. G. Litvan, 2617.
Loader, C. E.
Preparation and reactions of some pyrrylthiol esters. E. Bullock, T.-S. Chen, and C. E. Loader, 1007.
Lossing, F. P.
Effect of CO and N_2 on mercury-photosensitized reactions. J. B. Homer and F. P. Lossing, 143.
Free radicals by mass spectrometry. XXXIV. A flow reactor for measurement of fast thermal reactions. I. P. Fisher, J. B. Homer, B. Roberts, and F. P. Lossing, 2205.
Free radicals by mass spectrometry. XXXV. The heat of formation of allyl radical from biallyl pyrolysis. J. B. Homer and F. P. Lossing, 2211.
Lough, C. E.
Partition coefficients of some conjugated heteroenoid compounds and 1,4-naphthoquinones. D. J. Currie, C. E. Lough, R. F. Silver, and H. L. Holmes, 1035.
The reaction of *n*-butylamine and benzylamine with some β-nitrostyrenes, diethyl benzalmalonates, and cinnamalmalononitriles. C. E. Lough and D. J. Currie, 1563.
Low, M. J. D.
Sorption of hydrogen and oxygen by cadmium oxide. M. J. D. Low and A. M. Kamel, 1147.
Lown, J. W.
Quinodimethane chemistry. The generation and trapping of quinodimethanes from substituted aromatic hydrocarbons with high-potential quinones. J. W. Lown and A. S. K. Aidoo, 2507.
Lunelli, B.
An improved method of hydrogen isotopic exchange with deuterium sulfate, and the preparation of 9,10-anthraquinone-d_8. B. Lunelli and C. Pecile, 1633.
Lunn, W. H.
Stereochemical studies. V. Rearrangements accompanying attempts to epimerize 4-oxa-3-oxo-5α-cholestane and 4-oxa-3-oxo-5β-cholestane by Brewster and Kucera's method. W. H. Lunn, J. T. Edward, and S. Meyerson, 279.
McAdie, H. G.
Thermal decomposition of molecular complexes. IV. Further studies of the β-quinol clathrates. H. G. McAdie, 1373.
McCallum, K. J.
The radiolysis of trifluoroethanol. J. C. Russell and K. J. McCallum, 243.
MacDonald, S. F.
The synthesis of porphyrins derived from *Chlorobium* chlorophylls. J. L. Archibald, D. M. Walker, K. B. Shaw, A. Markovac, and S. F. MacDonald, 345.
The interconversion of 5-chloro- and 5-hydroxy-dipyrrylmethenes. A. Markovac, B. D. Kulkarni, K. B. Shaw, and S. F. MacDonald, 2329.
McDowell, C. A.
Molecular motion in weak charge transfer complexes. D. F. R. Gilson and C. A. McDowell, 945.
McGeachin, S. G.
The structures of two self-condensation products from *o*-aminobenzaldehyde. S. G. McGeachin, 2323.
McInnes, A. G.
The occurrence of 2,3-dibromobenzyl alcohol 4,5-disulfate, dipotassium salt, in *Polysiphonia lanosa*. J. H. Hodgkin, J. S. Craigie, and A. G. McInnes, 74.
Erratum: The alcoholysis of trialkylalkoxysilanes. Part II. The preparation and chemistry of methyl 2,3,4-tri-*O*-trimethylsilyl-α-D-glucopyranoside. D. T. Hurst and A. G. McInnes, 103.
Erratum: The occurrence of 2,3-dibromobenzyl alcohol 4,5-disulfate, dipotassium salt, in *Polysiphonia lanosa*. J. H. Hodgkin, J. S. Craigie, and A. G. McInnes, 1604.
Studies on chitan (β-(1 → 4)-linked 2-acetamido-2-deoxy-D-glucan) fibers of the diatom *Thalassiosira fluviatilis* Hustedt. II. Proton magnetic resonance, infrared, and X-ray studies. M. Falk, D. G. Smith, J. McLachlan, and A. G. McInnes, 2269.
McIntosh, R.
The dielectric constant of ethyl chloride adsorbed on porous silica glass treated to remove silanol groups. R. Shigeishi and R. McIntosh, 1153.
McIntyre, J. S.
Reactions of amides and related compounds. III. N.m.r. investigation of the protonation of N,N-dimethylnitrosoamine, N,N-diethylnitrosoamine, and N-nitrosopiperidine. S. J. Kuhn and J. S. McIntyre, 105.

Mackay, D.
Radicals derived from heteroaromatic systems. I. Thienyl radicals. D. Mackay, 2881.
MacKenzie, S. L.
Estimated molecular weight of amylose from the yeast *Rhodotorula peneaus*. P. A. J. Gorin, J. F. T. Spencer, and S. L. MacKenzie, 2087.
Mackie, W.
Pyranose–furanose and anomeric equilibria. Influence of solvent and of partial methylation. W. Mackie and A. S. Perlin, 2039.
McLachlan, J.
Studies on chitan (β-(1 $\rightarrow$ 4)-linked 2-acetamido-2-deoxy-D-glucan) fibers of the diatom *Thalassiosira fluviatilis* Hustedt. II. Proton magnetic resonance, infrared, and X-ray studies. M. Falk, D. G. Smith, J. McLachlan, and A. G. McInnes, 2269.
McLauchlan, K. A.
The nuclear magnetic resonance spectrum of vinylene carbonate. K. A. McLauchlan and T. Schaefer. 321.
The sign, temperature, and solvent dependence of the proton coupling constant and chemical shift in α-chloroacrylonitrile. K. A. McLauchlan, L. W. Reeves, and T. Schaefer, 1473.
MacLean, D. B.
Lycopodium alkaloids. XVII. Mass spectra of annotine and some annotine derivatives. D. B. MacLean and M. Curcumelli-Rodostamo, 611.
Mass spectra of oxygenated quinolines. D. M. Clugston and D. B. MacLean, 781.
MacLean, H.
Polyoxyphenols of western red cedar (*Thuja plicata* Donn). III. Structure of plicatic acid. J. A. F. Gardner, E. P. Swan, S. A. Sutherland, and H. MacLean, 52.
Lignans of western red cedar (*Thuja plicata* Donn). IV. Thujaplicatin and thujaplicatin methyl ether. H. MacLean and K. Murakami, 1541.
Lignans of western red cedar (*Thuja plicata* Donn). V. Hydroxythujaplicatin methyl ether. H. MacLean and K. Murakami, 1827.
McLean, S.
The elucidation of the structures of ochotensine and ochotensimine. S. McLean, M.-S. Lin, and R. H. F. Manske, 2449.
McVey, S.
Tetrasubstituted-cyclopentadienone and -*p*-benzoquinone complexes of rhodium(I). S. McVey and P. M. Maitlis, 2429.
Mahajan, J. R.
Conversion of neoabietic acid into manool. E. Wenkert, J. R. Mahajan, M. Nussim, and F. Schenker, 2575.
Mainland, N. K.
Coordination compounds of olefins with anhydrous silver salts. III. Kinetics of the gas–solid reaction producing $AgBF_4.2C_3H_6$. C. A. Jull, R. J. Kominar, N. K. Mainland, and H. W. Quinn, 2663.
Maitlis, P. M.
Tetrasubstituted-cyclopentadienone and -*p*-benzoquinone complexes of rhodium(I). S. McVey and P. M. Maitlis, 2429.
Cyclobutadiene–metal complexes. Part VIII. Synthesis of tetraphenylcyclobutadiene nickel halides by ligand-exchange reactions. D. F. Pollock and P. M. Maitlis, 2673.
Malli, G. L.
Relation between electrons and holes, and the vector-coupling coefficients for p^mf^q and d^mf^q configurations. G. L. Malli, 1451.
Mamer, O. A.
A novel synthesis of some mixed arylmethyl–alkyl ethers. K. G. Rutherford, O. A. Mamer, J. M. Prokipcak, and R. A. Jobin, 2337.
Mancini, V. J.
α-Nerol and α-geraniol. B. M. Mitzner, V. J. Mancini, and S. Lemberg, 2103.
Manning, P. G.
Rare-earth picolinate and picolinate-N-oxide complexes. P. G. Manning, 1471.
A correlation of stepwise stability constant ratios and some bonding properties of transition metal and zinc complexes. P. G. Manning, 1975.
Some complexes present in aqueous ferric chloride solutions. P. G. Manning, 1993.
Europium oxalate ion association in water. P. G. Manning, 3057.
Manske, R. H. F.
The alkaloids of fumariaceous plants. LV. The structure of cularidine. R. H. F. Manske, 561.
The alkaloids of papaveraceous plants. LV. A new alkaloid, eschscholtzidine, and its structure. R. H. F. Manske and K. H. Shin, 1259.
The elucidation of the structures of ochotensine and ochotensimine. S. McLean, M.-S. Lin, and R. H. F. Manske, 2449.
Marion, L.
Investigation of the structure of 1,5-methylene-quinolizidinium ion. O. E. Edwards, G. Fodor, and L. Marion, 13.
The role of aspartic acid in the biosynthesis of ricinine. S. R. Johns and L. Marion, 23.
The correlation of chasmanine with browniine. O. E. Edwards, L. Fonzes, and L. Marion, 583.
The role of β-alanine and of glycerate in the biosynthesis of ricinine. P. R. Thomas, M. F. Barnes, and L. Marion, 1997.

Marinsky, J. A.
Mean molal activity coefficient ratios of mixed Na^+–K^+ solutions of *p*-toluene and polystyrene sulfonates. D. S. Gamble, J. A. Marinsky, and J. P. Guptill, 2181.
Markovac, A.
The synthesis of porphyrins derived from *Chlorobium* chlorophylls. J. L. Archibald, D. M. Walker, K. B. Shaw, A. Markovac, and S. F. MacDonald, 345.
The interconversion of 5-chloro- and 5-hydroxy-dipyrrylmethenes. A. Markovac, B. D. Kulkarni, K. B. Shaw, and S. F. MacDonald, 2329.
Marsh, J. P., Jr.
Synthesis of possible actinomycin D precursors. J. P. Marsh, Jr. and L. Goodman, 799.
Marshall, R. M.
The initiation of propylene pyrolysis. R. M. Marshall, J. H. Purnell, and B. C. Shurlock, 2778.
Martin, E. A.
Étude de la fluorescence des dérivés de la phénothiazine. E. A. Martin, 1783.
Martin, J. G.
The Orton rearrangement in aprotic solvents. III. The acid-catalyzed chlorination of anisole by a series of 4-substituted *N*-chloroacylanilides. J. M. W. Scott and J. G. Martin, 2901.
Maruani, J.
Étude des spectres de résonance paramagnétique électronique de radicaux allyliques polyorientés. C. Chachaty and J. Maruani, 2631.
Maryk, W. B.
The systems sodium chlorate – water – dioxane and lithium chlorate – water – dioxane, at 25°. A. N. Campbell, E. M. Kartzmark, and W. B. Maryk, 935.
Masson, C. R.
Effect of thermionic emission on electrochemical measurements at high temperatures. S. G. Whiteway and C. R. Masson, 2421.
Mattok, G. L.
The chemistry of the aminochromes. IX. The reactions of glutathione with some halogenated aminochromes. G. L. Mattok and R. A. Heacock, 565.
Mayahi, M. F.
Solvent effects on the ultraviolet spectra of N,N-dimethylformamide. M. F. Mayahi, A. H. Al-Taiar, S. A. Al-Baldawi, and H. A. Hussain, 2224.
Medina, J. D.
Alkaloids of the seeds of *Aspidosperma fendleri* Woodson. R. H. Burnell, J. D. Medina, and W. A. Ayer, 28.
Melton, C. E.
Ionization potentials of alkyl free radicals and *n*-alkanes through $C_{17}H_{36}$ by energy-calibrated molecular orbital methods. C. E. Melton and H. W. Joy, 1455.
Ménard, M.
Substitutions électrophiles en série naphtalènique. III. Sur le di-*t*-butyl-2,7 naphtalène. L. Erichomovitch, M. Ménard, F. L. Chubb, Y. Pépin, and J.-C. Richer, 2305.
Meyerson, S.
Stereochemical studies. V. Rearrangements accompanying attempts to epimerize 4-oxa-3-oxo-5α-cholestane and 4-oxa-3-oxo-5β-cholestane by Brewster and Kucera's method. W. H. Lunn, J. T. Edward, and S. Meyerson, 279.
Decomposition products of 5-oxo-3,5-seco-A-norcholestan-3-oic acid *p*-toluenesulfonylhydrazone. J. T. Edward, D. L'Anglais, and S. Meyerson, 1866.
Miller, F. N.
Reaction of aroyl halides with aromatic aldehydes and acetophenones. R. Filler and F. N. Miller, 838.
Miller, J. M.
The relative acceptor power of boron trihalides toward acetonitrile by proton nuclear magnetic resonance measurements. J. M. Miller and M. Onyszchuk, 899.
Miller, O. A.
Charge transfer in the radiolysis of binary hydrocarbon mixtures. J. A. Stone, A. R. Quirt, and O. A. Miller, 1175.
Mishriky, N.
Utilization of sulfur. Synthesis of symmetrical thiiranes from ketohydrazones. N. Latif, I. Fathy, N. Mishriky, and B. Haggag, 629.
Cyanoesters and dinitriles. I. Synthesis of malononitriles from methylene ethers. N. Latif and N. Mishriky, 1271.
Mital, R. L.
Some new routes for the synthesis of aromatic fluorine compounds. H. L. Sharma, V. N. Sharma, and R. L. Mital, 1327.
Mitzner, B. M.
Preparation of *cis*- and *trans*-ocimene from catalytic pyrolysis of linalyl acetate. B. M. Mitzner, S. Lemberg, and E. T. Theimer, 1090.
α-Nerol and α-geraniol. B. M. Mitzner, V. J. Mancini, and S. Lemberg, 2103.
Miyazaki, H.
Polarography of 7-benzonorbornenones. H. Tanida, H. Miyazaki, and H. Ishitobi, 98.
Montalvo, R.
Gas chromatography of estrone and related compounds. R. Montalvo and O. H. Wheeler, 100.
Mori, T.
Diimide reduction of 12-membered cyclic olefins. H. Nozaki, Y. Simokawa, T. Mori, and R. Noyori, 2921.

Moriconi, E. J.
Organic and biological spectrochemical studies. XXII. The infrared, ultraviolet, and nuclear magnetic resonance spectra of some substituted 2-indanones and reference compounds. E. J. Moriconi, J. P. St. George, and W. F. Forbes, 759.
Nuclear magnetic resonance study of 2,3-quinoxalinedicarboxaldehyde and its cyclic monohydrate. E. J. Moriconi, J. W. Young, T. E. Brady, and A. J. Fritsch, 1596.
Morita, H.
Facile methylation of humic acids from organic soils. H. Morita, 1593.
Morton, J. R.
Paramagnetic centers in irradiated potassium sulfate. V. V. Gromov and J. R. Morton, 527.
Electron spin resonance spectra of ^{15}N-centered radicals at low temperatures. II. The radiolysis of potassium sulfamate. J. R. Morton and D. R. Smith, 1951.
Electron spin resonance spectra of $N_2H_4^+$ and PF_2. J. K. S. Wan, J. R. Morton, and H. J. Bernstein, 1957.
Moule, D. C.
A method for the determination of water in nonpolar liquids; the solubility of water in benzene. D. C. Moule and W. M. Thurston, 1361.
The deuterium isotope effect and the molecular dynamics of water in benzene. D. C. Moule, 3009.
Murakami, K.
Lignans of western red cedar (*Thuja plicata* Donn). IV. Thujaplicatin and thujaplicatin methyl ether. H. MacLean and K. Murakami, 1541.
Lignans of western red cedar (*Thuja plicata* Donn). V. Hydroxythujaplicatin methyl ether. H. MacLean and K. Murakami, 1827.
Mutchler, J. P.
The reaction of chloral with halobenzenes and with 2,4-dichlorophenol. Synthesis of halogenated ethylbenzenes and of α-methoxyphenylacetic acids. W. Reeve, J. P. Mutchler, and C. L. Liotta, 575.
Muto, M.
Liquid-phase oxidation of cyclohexene in the presence of benzaldehyde. T. Ikawa, T. Fukushima, M. Muto, and T. Yanagihara, 1817.
Muzzarelli, R. A. A.
La solubilité dans les mélanges éther éthylique – acides inorganiques de certains sels de fer, cobalt et manganèse. R. A. A. Muzzarelli, 747.
Nabih, I.
4-Hydroxyquinaldines in the Mannich reaction. I. Nabih and M. Nasr, 1863.
Nagakura, S.
Ultraviolet, infrared, and Raman spectra of protonated carboxylic acids. S. Hoshino, H. Hosoya, and S. Nagakura, 1961.
Nagata, I.
Kihara potential and Lennard-Jones and Devonshire equation of state of liquids and dense gases. I. Nagata, 2651.
Nagy, G. P.
Total cross sections for ionization by electron impact. A. G. Harrison, E. G. Jones, S. K. Gupta, and G. P. Nagy, 1967.
Naik, A. R.
Sulfonate esters of α-chloroaldoximes, aldoximes, and amidoximes via "sulfene" addition. W. E. Truce and A. R. Naik, 297.
Nair, M. R.
Electrophilic catalysis in solvolytic reactions. IX. Inductomeric effect. R. Anantaraman and M. R. Nair, 2415.
Narain, G.
Absorption spectra and configuration of some amine complexes of copper(II) acetate. G. Narain, 895.
Investigations on some amine complexes of iron(III) phthalimide. Infrared spectroscopic measurements. G. Narain, 975.
Nashed, Sh.
Adsorption of cylohexane and benzene on mixed hydroxides and oxides of magnesium and aluminium. R. I. Razouk, Sh. Nashed, and F. N. Antonious, 877.
Nasr, M.
4-Hydroxyquinaldines in the Mannich reaction. I. Nabih and M. Nasr, 1863.
Nawn, G. H.
Reaction of thiols with epoxides of conjugated 1,4-diketones. H. S. Wilgus III, E. Frauenglass, P. P. Chiesa, G. H. Nawn, F. J. Evans, and J. W. Gates, Jr., 603.
Nayak, U. G.
Reductive cleavage with metal in liquid ammonia. I. The selective cleavage of the benzylthio C—S bond versus the benzylidenedioxy C—O bond in methyl *S*-benzyl-4,6-*O*-benzylidene-2-thio-α-D-altropyranosides; the influence of the cosolvent 1,2-dimethoxyethane on the course of the reaction. U. G. Nayak and R. K. Brown, 591.
Neckers, D. C.
A study of the substitution reactions of benzo[*b*]thiophene and its derivatives. G. Van Zyl, C. J. Bredeweg, R. H. Rynbrandt, and D. C. Neckers, 2283.
Negoescu, I.
Nuclear recoil reactions in cyclopentadienylmanganese tricarbonyl. T. Costea, I. Negoescu, P. Vasudev, and D. R. Wiles, 885.

Newton, R.
The numerical analysis of electron spin resonance spectra with hyperfine structure. R. Newton, K. F. Schulz, and R. M. Elofson, 752.
Ng, A. S.
Metabolites of pathogenic fungi. V. Isolation and tentative structures of vioxanthin and viopurpurin, two colored metabolites of *Trichophyton violaceum*. F. Blank, A. S. Ng, and G. Just, 2873.
Nguyen-Thi-Thanh-Hoa
Études sur les phényl-5 cyclohexanediols-1,3 isomères. J.-C. Richer and Nguyen-Thi-Thanh-Hoa, 403.
Niculescu-Duvăz, I.
Potential anticancer agents. III. Urethane-type nitrogen mustards of some synthetic estrogens. I. Niculescu-Duvăz, V. Feyns, E. Grant, and E. Tărnăuceanu, 1102.
Nolan, T. J.
Sugar esters. III. New reagent for deoxyhalo sugar preparation. J. B. Lee and T. J. Nolan, 1331.
Noszkó, L.
Solvolyses of 2-(2,4-dimethoxyphenyl)-1,1-d_2-ethyl and 2-(3,5-dimethoxyphenyl)-1,1-d_2-ethyl *p*-bromobenzenesulfonates; ion-pair returns in solvolyses of 2-arylethyl systems. C. C. Lee and L. Noszkó, 2481.
Secondary kinetic isotope effects in the solvolyses of 2-(2,4-dimethoxyphenyl)-1,1-d_2-ethyl and 2-(3,5-dimethoxyphenyl)-1,1-d_2-ethyl *p*-bromobenzenesulfonates. C. C. Lee and L. Noszkó, 2491.
Noyori, R.
The stereoselective addition of dihalocarbenes to *cis,trans,trans*-cyclododeca-1,5,9-triene and the synthesis of cyclotridecanone. H. Nozaki, S. Katô, and R. Noyori, 1021.
Diimide reduction of 12-membered cyclic olefins. H. Nozaki, Y. Simokawa, T. Mori, and R. Noyori, 2921.
Nozaki, H.
The stereoselective addition of dihalocarbenes to *cis,trans,trans*-cyclododeca-1,5,9-triene and the synthesis of cyclotridecanone. H. Nozaki, S. Katô, and R. Noyori, 1021.
Diimide reduction of 12-membered cyclic olefins. H. Nozaki, Y. Simokawa, T. Mori, and R. Noyori, 2921.
Nussim, M.
Conversion of neoabietic acid into manool. E. Wenkert, J. R. Mahajan, M. Nussim, and F. Schenker, 2575.
O'Connell, J. P.
Second virial coefficients and intermolecular forces for the ammonia–acetylene system. H. Y. Cheh, J. P. O'Connell, and J. M. Prausnitz, 429.
Ogilvie, F. B.
Visible and ultraviolet absorption spectra of rhodium(III) in fused alkali chlorides and nitrates. F. B. Ogilvie and O. G. Holmes, 447.
Oliver, B. G.
The electrolytic conductances of sodium chlorate and of lithium chlorate in water and in water–dioxane. A. N. Campbell, E. M. Kartzmark, and B. G. Oliver, 925.
Olsen, F. P.
Linear free energy relationships concerning equilibria in moderately concentrated mineral acids. A simple method for estimating pK's of weak bases. J. F. Bunnett and F. P. Olsen, 1899.
Linear free energy relationships concerning reaction rates in moderately concentrated mineral acids. J. F. Bunnett and F. P. Olsen, 1917.
Onyszchuk, M.
The relative acceptor power of boron trihalides toward acetonitrile by proton nuclear magnetic resonance measurements. J. M. Miller and M. Onyszchuk, 899.
Orazi, O. O.
Studies on plants. XI. Alkaloids of *Aspidosperma spegazzinii*. O. O. Orazi, R. A. Corral, and M. E. Stoichevich, 1523.
Orphanos, D. G.
The synthesis of some iodophthalazines and phthalazinecarbonitriles. A. Hirsch and D. G. Orphanos, 1551.
The synthesis of some 6,7-methylenedioxy- and 6,7-dimethoxy-1,4-benzoxazin-2-ones. D. G. Orphanos and A. Taurins, 1795.
Preparation of 3,4-methylenedioxy- and 3,4-dimethoxy-6-aminophenol. D. G. Orphanos and A. Taurins, 1875.
On the formation of a peroxy phthalazine compound by the autoxidation of 1-methyl-1,2-dihydrophthalazine. A. Hirsch and D. G. Orphanos, 2109.
Page, J. A.
The chemistry of iridium in basic aqueous solution. A polarographic study. G. Van Loon and J. A. Page, 515.
Painter, E. P.
Substitution of acyclic sugar acetals. Rate of perchloric acid catalyzed acetolysis of 2,3,4,5,6-penta-*O*-acetyl-D-glucose diethyl dithioacetal and 1,2,3,4,5,6-hexa-*O*-acetyl-D-glucose *S*-ethyl monothioacetal. N. H. Kurihara and E. P. Painter, 1773.
Papadakis, P. E.
Long carbon chain carbohydrate polymers. 1,3-(Bis-5-aldoxylosylidene-1)-acetone and its polymer with 1,3-dicarbethoxyacetone. P. E. Papadakis and S. M. Philip, 1841.
Papee, H. M.
Aqueous solutions of "sodium pernitrite" from alkaline hydrogen peroxide and nitric oxide. G. L. Petriconi and H. M. Papee, 977.
Papineau-Couture, G.
Mass spectra and reaction mechanism studies. The Favorsky–Marker rearrangement of 17α-bromopregnenolones in deuterated methanol. R. Deghenghi, G. Schilling, and G. Papineau-Couture, 789.

Parikh, V. M.
Cholla gum. I. Structure of the degraded cholla gum. V. M. Parikh and J. K. N. Jones, 327.
Cholla gum. II. Structure of the undegraded cholla gum. V. M. Parikh and J. K. N. Jones, 1531.
Parkin, D. C.
The transmission of polar effects. IV. The kinetics of esterification with diazodiphenylmethane of substituted heterocyclic carboxylic acids. K. Bowden and D. C. Parkin, 1493.
Parmar, S. S.
Synthesis of quinazolone hydrazides as monoamine oxidase inhibitors. S. S. Parmar and R. C. Arora, 2100.
Parrick, J.
Azaindoles. I. Preparation of 7-azaindoles by thermal indolization of 2-pyridylhydrazones. A. H. Kelly and J. Parrick, 2455.
Patel, C. C.
Quinoline N-oxide complexes of titanyl, zirconyl, and thorium perchlorates. V. Krishnan and C. C. Patel, 972.
Patterson, D.
Heats of potassium–lithium ion exchange on sulfonated polystyrene resins. W. R. Heumann and D. Patterson, 2139.
Pearson, J. T.
The isotropic electron paramagnetic resonance spectrum of the 1-hydroxy-2,2,2-trifluoroethyl radical. P. Smith, J. T. Pearson, and R. V. Tsina, 753.
Pecile, C.
An improved method of hydrogen isotopic exchange with deuterium sulfate, and the preparation of 9,10-anthraquinone-d_8. B. Lunelli and C. Pecile, 1633.
Peeters, J. L.
Chemical reactions in electrical discharges. II. The structure of the positive column in d-c. glow discharges through fast-flowing gases. J. L. Peeters, H. W. Rundle, and J. M. Deckers, 2981.
Pépin, Y.
Substitutions électrophiles en série naphtalènique. III. Sur le di-*t*-butyl-2,7 naphtalène. L. Erichomovitch, M. Ménard, F. L. Chubb, Y. Pépin, and J.-C. Richer, 2305.
Pepper, J. M.
Acid-catalyzed reactions of vinyl compounds. IV. Mechanism of formation of the products of the reaction of vinyl acetate and benzene. J. M. Pepper and B. P. Robinson, 1809.
Perelman, D.
Études sur la triméthyl-2,4,4 cyclohexanone et ses produits de réduction. J.-C. Richer and D. Perelman, 2003.
Perlin, A. S.
Hydroxyl proton magnetic resonance in relation to ring size, substituent groups, and mutarotation of carbohydrates. A. S. Perlin, 539.
Nuclear magnetic resonance spectra of glycol-cleavage oxidation products of methyl aldopentopyranosides. A. S. Perlin, 1757.
Pyranose–furanose and anomeric equilibria. Influence of solvent and of partial methylation. W. Mackie and A. S. Perlin, 2039.
Perry, M. B.
The water-soluble polysaccharides of dermatophytes. V. Galactomannans II from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton schönleinii*. C. T. Bishop, M. B. Perry, and F. Blank, 2291.
The water-soluble polysaccharides of dermatophytes. VI. Glucans from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton Schönleinii*. C. T. Bishop, M. B. Perry, R. K. Hulyalkar, and F. Blank, 2299.
Petriconi, G. L.
Aqueous solutions of "sodium pernitrite" from alkaline hydrogen peroxide and nitric oxide. G. L. Petriconi and H. M. Papee, 977.
Pettit, G. R.
Steroids and related natural products. XXVIII. Stereochemistry of 3-hydroxy-4-oxa-5α-cholestane and related hemiacetals. G. R. Pettit, J. C. Knight, and W. J. Evers, 807.
Antineoplastic agents. XVII. N-(2-Bromoethyl)-N-(2-chloroethyl)amines. G. R. Pettit and M. R. Chamberland, 813.
Steroids and related natural products. XXVI. Synthesis of 3β-acetoxy-20-oxo-5β-pregna-14,16-diene. G. R. Pettit and D. M. Piatak, 844.
Steroids and related natural products. XXIX. Sodium borohydride – boron trihalide reduction of 3-oxo-4-oxa-5α-cholestane. G. R. Pettit and W. J. Evers, 1097.
Steroids and related natural products. XXX. Selective reduction of esters. Part A. Benzoates. G. R. Pettit, B. Green, G. L. Dunn, P. Hofer, and W. J. Evers, 1283.
Steroids and related natural products. XXXI. Selective reduction of esters. Part B. Carbonates. G. R. Pettit and W. J. Evers, 1293.
Structural biochemistry. II. Synthesis of 3β-hydroxy-17β-(L-prolyl-L-prolyl)amino-5α-androstane. G. R. Pettit, A. K. Das Gupta, and R. L. Smith, 2023.
Philip, S. M.
Long carbon chain carbohydrate polymers. 1,3-(Bis-5-aldoxylosylidene-1)-acetone and its polymer with 1,3-dicarbethoxyacetone. P. E. Papadakis and S. M. Philip, 1841.
Piatak, D. M.
Steroids and related natural products. XXVI. Synthesis of 3β-acetoxy-20-oxo-5β-pregna-14,16-diene. G. R. Pettit and D. M. Piatak, 844.

Pichler, D. E.
1,4-Diarylphthalazines and 1,3-diarylisobenzofurans. W. W. Zajac, Jr. and D. E. Pichler, 833.
Pickles, R.
Charge-transfer complexes of biphenylene. P. H. Emslie, R. Foster, and R. Pickles, 9.
Piers, E.
The absolute configuration of the Iboga alkaloids. J. P. Kutney, R. T. Brown, and E. Piers, 637.
Pinzuti, L.
Sur les spectres infrarouges des phtalocyanines. H. F. Shurvell and L. Pinzuti, 125.
Pitha, J.
The specificity of hydrogen bond formation between derivatives of nucleic acid bases and some analogues. J. Pitha, R. N. Jones, and P. Pithova, 1045.
A comparison of optimization methods for fitting curves to infrared band envelopes. J. Pitha and R. N. Jones, 3031.
Pithova, P.
The specificity of hydrogen bond formation between derivatives of nucleic acid bases and some analogues. J. Pitha, R. N. Jones, and P. Pithova, 1045.
Podesva, C.
Alkylation of cyclic amidines with Mannich bases. C. Podesva and K. Vagi, 1872.
Pollak, A.
The reaction of some compounds containing thioamide groups with 2,4,6-trichloro-1,3,5-triazine. A. Pollak, B. Stanovnik, and M. Tišler, 829.
Pollock, D. F.
Cyclobutadiene–metal complexes. Part VIII. Synthesis of tetraphenylcyclobutadiene nickel halides by ligand-exchange reactions. D. F. Pollock and P. M. Maitlis, 2673.
Porile, N. T.
Formation of ^{7}Be in nuclear reactions induced by 85-MeV protons. M. S. Lafleur, N. T. Porile, and L. Yaffe, 2749.
Xenon yields in the fission of heavy elements by medium-energy protons. J. H. Forster, N. T. Porile, and L. Yaffe, 2951.
Pound, N. J.
Organic sulfur compounds. III. Condensations involving *o*-nitrobenzenesulfenyl chloride. R. T. Coutts, K. W. Hindmarsh, and N. J. Pound, 2105.
Prasad, R. N.
Chemistry and synthesis of some dihydro-2*H*-1,4-benzothiazine derivatives. R. N. Prasad and K. Tietje, 1247.
Prausnitz, J. M.
Second virial coefficients and intermolecular forces for the ammonia–acetylene system. H. Y. Cheh, J. P. O'Connell, and J. M. Prausnitz, 429.
Preston, H. J. T.
A critique of Pauli repulsions and molecular geometry. R. F. W. Bader and H. J. T. Preston, 1131.
Preston, K. F.
On the possible contribution of a molecular mechanism to the photodecomposition of nitrogen dioxide. K. F. Preston and R. J. Cvetanović, 2445.
Price, P.
Steroids and steroidases. I. Long-range effects and the preparation of A-homosteroids. J. B. Jones and P. Price, 999.
Pritchard, G. O.
Some hydrogen abstraction reactions of perfluoroethyl radicals. G. O. Pritchard, J. R. Dacey, W. C. Kent, and C. R. Simonds, 171.
The photolysis of perfluoroazoethane at room temperature. J. R. Dacey, W. C. Kent, and G. O. Pritchard, 969.
Prokipcak, J. M.
A novel synthesis of some mixed arylmethyl–alkyl ethers. K. G. Rutherford, O. A. Mamer, J. M. Prokipcak, and R. A. Jobin, 2337.
Protz, E.
The photoinitiated halogenation reactions of N-bromoacetanilide and N-bromo-2,4,6-trichloroacetanilide. D. D. Tanner and E. Protz, 1555.
Purcell, T. C.
Photooxidation of propionaldehyde at low partial pressures of aldehyde. A. P. Altshuller, I. R. Cohen, and T. C. Purcell, 2973.
Purdie, J. W.
Structures of *Chlorobium* chlorophylls (660). A. S. Holt, J. W. Purdie, and J. W. F. Wasley, 88.
Purnell, J. H.
The initiation of propylene pyrolysis. R. M. Marshall, J. H. Purnell, and B. C. Shurlock, 2778.
Putnam, R. C.
Parachors and other properties of organotins. R. C. Putnam, 1343.
Quinn, H. W.
Coordination compounds of olefins with anhydrous silver salts. III. Kinetics of the gas–solid reaction producing $AgBF_4.2C_3H_6$. C. A. Jull, R. J. Kominar, N. K. Mainland, and H. W. Quinn, 2663.
Quirt, A. R.
Charge transfer in the radiolysis of binary hydrocarbon mixtures. J. A. Stone, A. R. Quirt, and O. A. Miller, 1175.

Raap, R.
Concerning *cis*- and *trans*-3-thiocyanopropenal and the synthesis of isothiazole. R. Raap, 1324.
Rae, I. D.
Stereochemistry of *o*-substituted formanilides. I. D. Rae, 1334.
Ramsden, E. N.
Kinetics and mechanisms of reactions catalyzed by pancreatic ribonuclease. E. N. Ramsden and K. J. Laidler, 2597.
Rand, M. J.
Evidence for the influence of traces of hydrogen halides in halogen exchange reactions. M. J. Rand and F. Reizman, 980.
Ranz, R. J.
The synthesis of substituted biurets. H. Stollar, R. J. Ranz, and F. L. Chubb, 846.
Rao, C. N. R.
Deuterium isotope effects on hydrogen bonding. S. Singh and C. N. R. Rao, 2611.
Kinetics of hydrogen abstraction from proton donors by DPPH. S. Singh, K. R. Bhaskar, and C. N. R. Rao, 2657.
Rao, G. N.
Preparation and characterization of some binary and ternary metal complexes of imidazole and amino acids. G. N. Rao and N. C. Li, 1637.
Preparation and characterization of some binary and ternary complexes of benzoyltrifluoroacetone and phosphorus esters. G. N. Rao and N. C. Li, 2775.
Rashid, M. H.
Ormosia alkaloids. III. Chemistry of ormosanine and ormojanine; dehydrogenation to 3,6,8-trialkylated quinolines. Z. Valenta, P. Deslongchamps, M. H. Rashid, R. H. Wightman, and J. S. Wilson, 2525.
Rauk, A.
A convenient method for the preparation of optically active benzyl-α-*d* alcohol. S. Wolfe and A. Rauk, 2591.
Rawling, J. R.
The thermodynamic properties of hydrogen selenide. J. R. Rawling and J. M. Toguri, 451.
Razouk, R. I.
Adsorption of cyclohexane and benzene on mixed hydroxides and oxides of magnesium and aluminium. R. I. Razouk, Sh. Nashed, and F. N. Antonious, 877.
Rees, C. E.
Selenium isotope effects in the reduction of sodium selenite and of sodium selenate. C. E. Rees and H. G. Thode, 419.
Reeve, W.
The reaction of chloral with halobenzenes and with 2,4-dichlorophenol. Synthesis of halogenated ethylbenzenes and of α-methoxyphenylacetic acids. W. Reeve, J. P. Mutchler, and C. L. Liotta, 575.
Reeves, L. W.
The sign, temperature, and solvent dependence of the proton coupling constant and chemical shift in α-chloroacrylonitrile. K. A. McLauchlan, L. W. Reeves, and T. Schaefer, 1473.
The description and use of a spin-echo spectrometer to study chemical exchange. K. H. Abramson, P. T. Inglefield, E. Krakower, and L. W. Reeves, 1685.
Chemical shift changes in fluoroanions of some diamagnetic salts. R. Haque and L. W. Reeves, 2769.
Reizman, F.
Evidence for the influence of traces of hydrogen halides in halogen exchange reactions. M. J. Rand and F. Reizman, 980.
Rempel, G. L.
Kinetic studies of chloro complexes of rhodium as hydrogenation catalysts. B. R. James and G. L. Rempel, 233.
Reymond, H.
Contribution à l'étude des spectres de vibration du dibenzofuranne. G. Davidovics, J. Chouteau, and H. Reymond, 3073.
Rhee, B.
Hydrogenolysis by lithium aluminium hydride – aluminium chloride of ether solutions of camphor ethylene ketal and norcamphor ethylene ketal. W. W. Zajac, Jr., B. Rhee, and R. K. Brown, 1547.
Richardson, D.
Electrolytic formation of living polymers from styrene. B. L. Funt, D. Richardson, and S. N. Bhadani, 711.
Richer, J.-C.
Études sur les phényl-5 cyclohexanediols-1,3 isomères. J.-C. Richer and Nguyen-Thi-Thanh-Hoa, 403.
Études sur la triméthyl-2,4,4 cyclohexanone et ses produits de réduction. J.-C. Richer and D. Perelman, 2003.
Études conformationnelles en série cyclopentanique. II. Sur la stéréochimie des alcools tertiaires dérivés de la *t*-butyl-3 cyclopentanone. J.-C. Richer and P. Bélanger, 2057.
Études conformationnelles en série cyclopentanique. III. L'addition de dérivés organomagnésiens sur la *t*-butyl-3 cyclopentanone. J.-C. Richer and P. Bélanger, 2067.
Substitutions électrophiles en série naphtalènique. III. Sur le di-*t*-butyl-2,7 naphtalène. L. Erichomovitch, M. Ménard, F. L. Chubb, Y. Pépin, and J.-C. Richer, 2305.
Roberts, B.
Free radicals by mass spectrometry. XXXIV. A flow reactor for measurement of fast thermal reactions. I. P. Fisher, J. B. Homer, B. Roberts, and F. P. Lossing, 2205.

Roberts, W. J.
The addition of carboxylic acids to acetylenic compounds. J. DiPietro and W. J. Roberts, 2241.
Robertson, R. E.
The solvent isotope effect and the partial molar volume of ions. R. E. Robertson, S. E. Sugamori, R. Tse, and C.-Y. Wu, 487.
Effect of α-methylation on the parameters characterizing hydrolysis in water for a series of halides and sulfonates. R. L. Heppolette and R. E. Robertson, 677.
The hydrolysis of substituted methyl benzenesulfonates in water. R. E. Robertson, A. Stein, and S. E. Sugamori, 685.
The hydrolysis of dimethylsulfate and diethylsulfate in water. R. E. Robertson and S. E. Sugamori, 1728.
Robinson, B. P.
Acid-catalyzed reactions of vinyl compounds. IV. Mechanism of formation of the products of the reaction of vinyl acetate and benzene. J. M. Pepper and B. P. Robinson, 1809.
Robinson, E. A.
The sulfuric acid solvent system. Part VII. Solutions of some tin(IV) and lead(IV) compounds. R. J. Gillespie, R. Kapoor, and E. A. Robinson, 1197.
The sulfuric acid solvent system. Part VIII. Solutions of some phosphorus(V) and vanadium(V) compounds. R. J. Gillespie, R. Kapoor, and E. A. Robinson, 1203.
The reaction of methanesulfonic acid with sulfur trioxide. E. A. Robinson and V. Silberberg, 1437.
Rosenberg, H. M.
Solvent shifts in charge-transfer spectra. Influence of donor strength. H. M. Rosenberg, E. Eimutis, and D. Hale, 2405.
Rowland, S. P.
Structural components in methyl vinyl sulfone modified cotton cellulose. S. P. Rowland, V. O. Cirino, and A. L. Bullock, 1051.
Rumfeldt, R. C.
^{60}Co γ-radiolysis of hydrogen halides at 77 °K. R. C. Rumfeldt and D. A. Armstrong, 191.
The radiation-induced addition of HBr to olefins in the liquid phase. R. C. Rumfeldt and D. A. Armstrong, 2219.
Rundle, H. W.
Chemical reactions in electrical discharges. II. The structure of the positive column in d-c. glow discharges through fast-flowing gases. J. L. Peeters, H. W. Rundle, and J. M. Deckers, 2981.
Chemical reactions in electrical discharges. III. The positive column in d-c. glow discharges through oxygen. H. W. Rundle, K. A. Gillespie, R. M. Yealland, R. Sova, and J. M. Deckers, 2995.
Russell, J. C.
The radiolysis of trifluoroethanol. J. C. Russell and K. J. McCallum, 243.
Russell, K. E.
Kinetic studies of proton transfer from phenols to trinitrobenzyl anion. J. A. Blake, M. J. B. Evans, and K. E. Russell, 119.
Russell-Jones, A.
The infrared spectrum and thermal decomposition of hydrazine perchlorate hemihydrate. P. W. M. Jacobs and A. Russell-Jones, 2435.
Rutherford, K. G.
A novel synthesis of some mixed arylmethyl–alkyl ethers. K. G. Rutherford, O. A. Mamer, J. M. Prokipcak, and R. A. Jobin, 2337.
Ryan, D. E.
Simultaneous analysis of two-component systems by diffuse reflectance spectroscopy. R. W. Frei, D. E. Ryan, and V. T. Lieu, 1945.
Rynbrandt, R. H.
A study of the substitution reactions of benzo[*b*]thiophene and its derivatives. G. Van Zyl, C. J. Bredeweg, R. H. Rynbrandt, and D. C. Neckers, 2283.
Saha, M.
Aromatic substitution. XIV. The homolytic phenylation of 3- and 4-picoline. A quantitative study of isomer and total rate ratios. R. A. Abramovitch and M. Saha, 1765.
Erratum: Aromatic substitution. XIV. The homolytic phenylation of 3- and 4-picoline. A quantitative study of isomer and total rate ratios. R. A. Abramovitch and M. Saha, 2926.
Saito, Y.
Erratum: ^{35}Cl and ^{37}Cl magnetic resonance of simple chlorine compounds. Y. Saito, 2780.
Salomon, M.
Isotope effects in mixtures of liquid H_2O and T_2O. M. Salomon, 689.
Salvador, R. L.
Amélioration de la synthèse des di- et tri-bromhydrines du pentaérythritol. M. Saucier, C. Sauriol, and R. L. Salvador, 1599.
A study of the Mannich reaction with propargyl alcohol. R. L. Salvador and D. Simon, 2570.
Sankhla, B. S.
Organic compounds of samarium. II. Reactions of samarium isopropoxide with ethyl acetoacetate. B. S. Sankhla and R. N. Kapoor, 1369.
Halide alkoxides of samarium. III. Reactions of samarium alkoxides with acetyl chloride and acetyl bromide. B. S. Sankhla and R. N. Kapoor, 2131.
Saran, A.
Multicomponent diffusion in the ^{85}Kr–SO_2–Kr system. A. Saran and Y. Singh, 2222.

Sato, S.
Intersystem crossing of the electronically excited dideuteroethylene molecules formed in benzene photosensitization. T. Terao, S. Hirokami, S. Sato, and R. J. Cvetanović, 2173.
Saucier, M.
Amélioration de la synthèse des di- et tri-bromhydrines du pentaérythritol. M. Saucier, C. Sauriol, and R. L. Salvador, 1599.
Sauriol, C.
Amélioration de la synthèse des di- et tri-bromhydrines du pentaérythritol. M. Saucier, C. Sauriol, and R. L. Salvador, 1599.
Savoie, J. Y.
Sur les présumés *cis*-dihalogénures de quinones. J. Y. Savoie and P. Brassard, 2867.
Schaefer, T.
The nuclear magnetic resonance spectrum of vinylene carbonate. K. A. McLauchlan and T. Schaefer, 321.
The sign, temperature, and solvent dependence of the proton coupling constant and chemical shift in α-chloroacrylonitrile. K. A. McLauchlan, L. W. Reeves, and T. Schaefer, 1473.
Double and triple resonance experiments on 2-bromo-5-chlorotoluene. Signs of the ring and ring-methyl proton coupling constants. G. Kotowycz and T. Schaefer, 2743.
Solvent dependence of $^{29}Si—^{19}F$ coupling constant in silicon tetrafluoride. The importance of intermolecular dispersion interactions. H. M. Hutton, E. Bock, and T. Schaefer, 2772.
Schenker, F.
Conversion of neoabietic acid into manool. E. Wenkert, J. R. Mahajan, M. Nussim, and F. Schenker, 2575.
Schiff, H. I.
The photolysis of CO_2 at 1 470 Å. A.-Y. Ung and H. I. Schiff, 1981.
Schilling, G.
Mass spectra and reaction mechanism studies. The Favorsky–Marker rearrangement of 17α-bromopregnenolones in deuterated methanol. R. Deghenghi, G. Schilling, and G. Papineau-Couture, 789.
Schlesinger, D. H.
Synthesis and chromatographic properties of *N*-alkyl-L-asparagines. R. Walter, I. L. Schwartz, L. J. Trauth, M. C. Berman, and D. H. Schlesinger, 2348.
Schmid, G. H.
The influence of temperature on the stereochemistry of the addition of *p*-chlorobenzenesulfenyl chloride to *cis*- and *trans*-2-butene. G. H. Schmid and V. M. Csizmadia, 1338.
The structure of succinyl dichloride. G. H. Schmid, 2917.
Schulz, K. F.
The numerical analysis of electron spin resonance spectra with hyperfine structure. R. Newton, K. F. Schulz, and R. M. Elofson, 752.
Schwartz, I. L.
Synthesis and chromatographic properties of *N*-alkyl-L-asparagines. R. Walter, I. L. Schwartz, L. J. Trauth, M. C. Berman, and D. H. Schlesinger, 2348.
Scott, J. M. W.
The Orton rearrangement in aprotic solvents. III. The acid-catalyzed chlorination of anisole by a series of 4-substituted *N*-chloroacylanilides. J. M. W. Scott and J. G. Martin, 2901.
Semeluk, G. P.
The photolytic and photosensitized decomposition of chloroform. I. Unger and G. P. Semeluk, 1427.
The thermal unimolecular isomerization of 1,2-dichloroethylene. L. D. Hawton and G. P. Semeluk, 2143.
Shanker, R.
Kinetics of the oxidation of glycollic acid by vanadium(V). G. V. Bakore and R. Shanker, 1717.
Shannon, T. W.
Reactions of thermal energy ions. II. Rates of some hydrogen transfer ion-molecule reactions. A. G. Harrison, A. Ivko, and T. W. Shannon, 1351.
Sharma, H. L.
Some new routes for the synthesis of aromatic fluorine compounds. H. L. Sharma, V. N. Sharma, and R. L. Mital, 1327.
Sharma, M.
The preparation of 4,6-*O*-benzylidene-D-glucal and the reaction of methyllithium with methyl 2,3-anhydro-4,6-*O*-benzylidene-α-D-allopyranoside. M. Sharma and R. K. Brown, 2825.
Sharma, V. N.
Some new routes for the synthesis of aromatic fluorine compounds. H. L. Sharma, V. N. Sharma, and R. L. Mital, 1327.
Shaw, K. B.
The synthesis of porphyrins derived from *Chlorobium* chlorophylls. J. L. Archibald, D. M. Walker, K. B. Shaw, A. Markovac, and S. F. MacDonald, 345.
The interconversion of 5-chloro- and 5-hydroxy-dipyrrylmethenes. A. Markovac, B. D. Kulkarni, K. B. Shaw, and S. F. MacDonald, 2329.
Shigeishi, R.
The dielectric constant of ethyl chloride adsorbed on porous silica glass treated to remove silanol groups. R. Shigeishi and R. McIntosh, 1153.
Shin, K. H.
The alkaloids of papaveraceous plants. LV. A new alkaloid, eschscholtzidine, and its structure. R. H. F. Manske and K. H. Shin, 1259.
Shulman, G. P.
Pyrolysis of dimethylethanolamine oxide monohydrate. G. P. Shulman, 1601.

Shurlock, B. C.
The initiation of propylene pyrolysis. R. M. Marshall, J. H. Purnell, and B. C. Shurlock, 2778.
Shurvell, H. F.
Sur les spectres infrarouges des phtalocyanines. H. F. Shurvell and L. Pinzuti, 125.
Siddall, T. H. III
Some studies of slow rotations around bonds in amides. T. H. Siddall III and R. H. Garner, 2387.
Sidhu, K. S.
Benzophenone-sensitized photolysis of cyclopentene. Preparation of *meso*- and DL-3,3′-bicyclopentenyl. K. S. Sidhu, O. P. Strausz, and H. E. Gunning, 531.
Silberberg, V.
The reaction of methanesulfonic acid with sulfur trioxide. E. A. Robinson and V. Silberberg, 1437.
Silver, R. F.
Polarographic half-wave potentials of some β-nitrostyrene and related compounds. R. F. Silver and H. L. Holmes, 1031.
Partition coefficients of some conjugated heteroenoid compounds and 1,4-naphthoquinones. D. J. Currie, C. E. Lough, R. F. Silver, and H. L. Holmes, 1035.
Simokawa, Y.
Diimide reduction of 12-membered cyclic olefins. H. Nozaki, Y. Simokawa, T. Mori, and R. Noyori, 2921.
Simon, D.
A study of the Mannich reaction with propargyl alcohol. R. L. Salvador and D. Simon, 2570.
Simonds, C. R.
Some hydrogen abstraction reactions of perfluoroethyl radicals. G. O. Pritchard, J. R. Dacey, W. C. Kent, and C. R. Simonds, 171.
Singh, J.
Kinetic aspects of the copolymerization of tetrahydrofuran with propylene oxide. I. L. P. Blanchard, J. Singh, and M. D. Baijal, 2679.
Singh, R. P.
Preparation of Fremy's salt, potassium nitrosodisulfonate. R. P. Singh, 1994.
Singh, S.
Deuterium isotope effects on hydrogen bonding. S. Singh and C. N. R. Rao, 2611.
Kinetics of hydrogen abstraction from proton donors by DPPH. S. Singh, K. R. Bhaskar, and C. N. R. Rao, 2657.
Singh, Y.
Multicomponent diffusion in the ^{85}Kr–SO_2–Kr system. A. Saran and Y. Singh, 2222.
Sisti, A. J.
Molecular rearrangement of diazotized *o*-aminophenylcarbinols. A. J. Sisti and R. L. Cohen, 2580.
Skinner, W. A.
The preparation of 5-alkylthio, branched tryptamines. J. K. Horner, J. I. DeGraw, and W. A. Skinner, 307.
A general method for selective N-methylation of substituted tryptamines. J. K. Horner and W. A. Skinner, 315.
Slessor, K. N.
Synthesis of 6′-substituted maltoses. G. G. S. Dutton and K. N. Slessor, 1069.
Smith D. G.
Studies on chitan (β-(1 → 4)-linked 2-acetamido-2-deoxy-D-glucan) fibers of the diatom *Thalassiosira fluviatilis* Hustedt. II. Proton magnetic resonance, infrared, and X-ray studies. M. Falk, D. G. Smith, J. McLachlan, and A. G. McInnes, 2269.
Smith, D. R.
Electron spin resonance spectra of ^{15}N-centered radicals at low temperatures. II. The radiolysis of potassium sulfamate. J. R. Morton and D. R. Smith, 1951.
Smith, E. M.
Organic sulfur compounds. II. Catalyzed sodium borohydride reductions of selected α-(*o*-nitrophenylthio) acids. R. T. Coutts, D. L. Barton, and E. M. Smith, 1733.
Smith, J. G.
1,2,3,4-Tetraphenyldiazetidine. A reexamination. J. G. Smith, 59.
The reactions of disodium adduct of benzophenone anil. J. G. Smith and C. D. Veach, 2245.
The reductive dimerization of *N*-benzylidene aniline. J. G. Smith and C. D. Veach, 2497.
Smith, P.
The isotropic electron paramagnetic resonance spectrum of the 1-hydroxy-2,2,2-trifluoroethyl radical. P. Smith, J. T. Pearson, and R. V. Tsina, 753.
A study by electron paramagnetic resonance spectroscopy of radicals formed from acetamide and formamide. P. Smith and P. B. Wood, 3085.
Smith, P. J.
Isotope effect studies on elimination reactions. V. The mechanism of the carbonyl elimination reaction of 9-fluorenyl nitrate with acetate ion. P. J. Smith and A. N. Bourns, 2553.
Smith, R. L.
Structural biochemistry. II. Synthesis of 3β-hydroxy-17β-(L-prolyl-L-prolyl)amino-5α-androstane. G. R. Pettit, A. K. Das Gupta, and R. L. Smith, 2023.
Solomon, I. J.
Polyfluorinated aromatic esters. Preparation and carbonyl stretching frequencies. R. Filler, J. F. White, A. J. Kacmarek, and I. J. Solomon, 2346.

Sova, R.
Chemical reactions in electrical discharges. III. The positive column in d-c. glow discharges through oxygen. H. W. Rundle, K. A. Gillespie, R. M. Yealland, R. Sova, and J. M. Deckers, 2995.
Sowa, W.
The oxidation of 1,2;5,6-di-*O*-isopropylidene-D-glucose by dimethyl sulfoxide – acetic anhydride. W. Sowa and G. H. S. Thomas, 836.
Spencer, J. F. T.
Exocellular alginic acid from *Azotobacter vinelandii*. P. A. J. Gorin and J. F. T. Spencer, 993.
Estimated molecular weight of amylose from the yeast *Rhodotorula peneaus*. P. A. J. Gorin, J. F. T. Spencer, and S. L. MacKenzie, 2087.
Srinivasan, V.
Treibs' 119° glycol; transannular attack at the tertiary carbon of a secondary–tertiary epoxide. E. W. Warnhoff and V. Srinivasan, 2259.
Stanovnik, B.
The reaction of some compounds containing thioamide groups with 2,4,6-trichloro-1,3,5-triazine. A. Pollak, B. Stanovnik, and M. Tišler, 829.
Stein, A.
The hydrolysis of substituted methyl benzenesulfonates in water. R. E. Robertson, A. Stein, and S. E. Sugamori, 685.
Stephenson, G. F.
A comment on the inadequacy of the correlation between phyllo-type spectrum and *meso*-substitution in the porphyrin series. R. Bonnett, I. A. D. Gale, and G. F. Stephenson, 2503.
Stevens, J. D.
The proton magnetic resonance spectra and tautomeric equilibria of aldoses in deuterium oxide. R. U. Lemieux and J. D. Stevens, 249.
St. George, J. P.
Organic and biological spectrochemical studies. XXII. The infrared, ultraviolet, and nuclear magnetic resonance spectra of some substituted 2-indanones and reference compounds. E. J. Moriconi, J. P. St. George, and W. F. Forbes, 759.
Stiles, D. A.
Photolysis of solid carbonyl selenide and carbon diselenide. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 1677.
Photolysis of Group VI hydrides. I. Solid H_2S, H_2S_2, and D_2S. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 2149.
Stoichevich, M. E.
Studies on plants. XI. Alkaloids of *Aspidosperma spegazzinii*. O. O. Orazi, R. A. Corral, and M. E. Stoichevich, 1523.
Stollar, H.
The synthesis of substituted biurets. H. Stollar, R. J. Ranz, and F. L. Chubb, 846.
Stone, J. A.
Charge transfer in the radiolysis of binary hydrocarbon mixtures. J. A. Stone, A. R. Quirt, and O. A. Miller, 1175.
Stothers, J. B.
Nuclear magnetic resonance studies. VIII. Determination of the thermodynamic parameters governing associations of substituted benzaldehydes in toluene solution. R. E. Klinck and J. B. Stothers, 37.
Nuclear magnetic resonance studies. IX. The chemical shift of the formyl proton in aliphatic aldehydes. R. E. Klinck and J. B. Stothers, 45.
^{13}C n.m.r. studies. VIII. ^{13}C spectra of some substituted anisoles. K. S. Dhami and J. B. Stothers, 2855.
Strausz, O. P.
The Hg $6(^3P_1)$ photosensitization of spiropentane. G. R. De Maré, L. G. Walker, O. P. Strausz, and H. E. Gunning, 457.
Benzophenone-sensitized photolysis of cyclopentene. Preparation of *meso*- and DL-3,3′-bicyclopentenyl. K. S. Sidhu, O. P. Strausz, and H. E. Gunning, 531.
The Hg $6(^3P_1)$ photosensitized decomposition of methylenecyclobutane vapor. G. R. De Maré, O. P. Strausz, and H. E. Gunning, 953.
Photolysis of solid carbonyl selenide and carbon diselenide. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 1677.
Photolysis of Group VI hydrides. I. Solid H_2S, H_2S_2, and D_2S. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 2149.
Streng, A. G.
An improved preparation, analysis, and some properties of tetraoxygen difluoride. A. G. Streng, 1476.
Strunz, G. M.
The structure of the maleic anhydride – acetylacetone adduct. R. D. Bailey and G. M. Strunz, 2584.
Styan, G. E.
Dimethyltrifluoroacetylarsine and related compounds. W. R. Cullen and G. E. Styan, 1225.
Sugamori, S. E.
The solvent isotope effect and the partial molar volume of ions. R. E. Robertson, S. E. Sugamori, R. Tse, and C.-Y. Wu, 487.
The hydrolysis of substituted methyl benzenesulfonates in water. R. E. Robertson, A. Stein, and S. E. Sugamori, 685.
The hydrolysis of dimethylsulfate and diethylsulfate in water. R. E. Robertson and S. E. Sugamori, 1728.

Sullivan, P. D.
Organic and biological spectrochemical studies. XXIII. Conformation of the *p*-dimethoxybenzene cation radical in concentrated sulfuric acid. W. F. Forbes and P. D. Sullivan, 1501.
Sutherland, S. A.
Polyoxyphenols of western red cedar (*Thuja plicata* Donn). III. Structure of plicatic acid. J. A. F. Gardner, E. P. Swan, S. A. Sutherland, and H. MacLean, 52.
Swan, E. P.
Polyoxyphenols of western red cedar (*Thuja plicata* Donn). III. Structure of plicatic acid. J. A. F. Gardner, E. P. Swan, S. A. Sutherland, and H. MacLean, 52.
Swaroop, B.
Thermodynamic and electrochemical properties of zirconium chlorides in alkali chloride melts. B. Swaroop and S. N. Flengas, 199.
Sweet, F.
2-Alkoxy-3-hydroxytetrahydropyrans and 2-alkoxy-3-hydroxytetrahydrofurans. I. Preparation, structure, and some derivatives. F. Sweet and R. K. Brown, 1571.
A convenient methylation procedure. U. E. Diner, F. Sweet, and R. K. Brown, 1591.
Sweeting, L. M.
The ionization behavior of amides in concentrated sulfuric acids. III. Indicator activity coefficient variation. L. M. Sweeting and K. Yates, 2395.
Symons, E. A.
Hydrogen exchange in *s*-trinitrobenzene. E. Buncel and E. A. Symons, 771.
Tanida, H.
Polarography of 7-benzonorbornenones. H. Tanida, H. Miyazaki, and H. Ishitobi, 98.
Tanner, D. D.
The photoinitiated halogenation reactions of N-bromoacetanilide and N-bromo-2,4,6-trichloroacetanilide. D. D. Tanner and E. Protz, 1555.
Tărnăuceanu, E.
Potential anticancer agents. III. Urethane-type nitrogen mustards of some synthetic estrogens. I. Niculescu-Duvăz, V. Feyns, E. Grant, and E. Tărnăuceanu, 1102.
Taurins, A.
Automatic direct analysis of A_2B_2 nuclear magnetic resonance spectra. T. K. Lim, A. Taurins, and M. A. Whitehead, 1211.
The synthesis of some 6,7-methylenedioxy- and 6,7-dimethoxy-1,4-benzoxazin-2-ones. D. G. Orphanos and A. Taurins, 1795.
Preparation of 3,4-methylenedioxy- and 3,4-dimethoxy-6-aminophenol. D. G. Orphanos and A. Taurins, 1875.
Thiazoloisoquinolines. I. The synthesis of thiazolo[4,5-*c*]isoquinoline. C. E. Hall and A. Taurins, 2465.
Thiazoloisoquinolines. II. The synthesis of thiazolo[5,4-*c*]isoquinoline. C. E. Hall and A. Taurins, 2473.
Tavares, D. F.
1,8-Diacetylnaphthalene and 3-methylphenalenone. D. F. Tavares and J. P. Borger, 1323.
Taylor, R. T.
The photolysis of 4,4-dimethylandrost-5-en-17β-ol-3-one. R. T. Taylor and G. Just, 1847.
Terao, T.
Intersystem crossing of the electronically excited dideuteroethylene molecules formed in benzene photosensitization. T. Terao, S. Hirokami, S. Sato, and R. J. Cvetanović, 2173.
Theimer, E. T.
Preparation of *cis*- and *trans*-ocimene from catalytic pyrolysis of linalyl acetate. B. M. Mitzner, S. Lemberg, and E. T. Theimer, 1090.
Theophanides, T.
Platinum(II) complexes containing α-hydroxyacetylenes. A. D. Allen and T. Theophanides, 2703.
Thode, H. G.
Selenium isotope effects in the reduction of sodium selenite and of sodium selenate. C. E. Rees and H. G. Thode, 419.
Thomas, G. H. S.
The oxidation of 1,2;5,6-di-*O*-isopropylidene-D-glucose by dimethyl sulfoxide – acetic anhydride. W. Sowa and G. H. S. Thomas, 836.
Thomas, P. R.
The role of β-alanine and of glycerate in the biosynthesis of ricinine. P. R. Thomas, M. F. Barnes, and L. Marion, 1997.
Thurston, W. M.
A method for the determination of water in nonpolar liquids; the solubility of water in benzene. D. C. Moule and W. M. Thurston, 1361.
Thyagarajan, B. S.
On the condensation of *p*-cresol with glyoxal. B. S. Thyagarajan, K. K. Balasubramanian, and R. Bhima Rao, 633.
Thynne, J. C. J.
Ion–molecule reactions in methyl alcohol and methyl-d_3 alcohol. J. C. J. Thynne, F. K. Amenu-Kpodo, and A. G. Harrison, 1655.
Tickner, A. W.
Mass spectrometric study of subliming selenium. H. Fujisaki, J. B. Westmore, and A. W. Tickner, 3063.

Tietje, K.
Chemistry and synthesis of some dihydro-2*H*-1,4-benzothiazine derivatives. R. N. Prasad and K. Tietje, 1247.
Tišler, M.
The reaction of some compounds containing thioamide groups with 2,4,6-trichloro-1,3,5-triazine. A. Pollak, B. Stanovnik, and M. Tišler, 829.
Toguri, J. M.
The thermodynamic properties of hydrogen selenide. J. R. Rawling and J. M. Toguri, 451.
Trauth, L. J.
Synthesis and chromatographic properties of *N*-alkyl-L-asparagines. R. Walter, I. L. Schwartz, L. J. Trauth, M. C. Berman, and D. H. Schlesinger, 2348.
Truce, W. E.
Sulfonate esters of α-chloroaldoximes, aldoximes, and amidoximes via "sulfene" addition. W. E. Truce and A. R. Naik, 297.
Tsai, J. H.
The reactivity of metal–metal bonds. I. The Sn—Sn bond. H. C. Clark, J. D. Cotton, and J. H. Tsai, 903.
Tse, R.
The solvent isotope effect and the partial molar volume of ions. R. E. Robertson, S. E. Sugamori, R. Tse, and C.-Y. Wu, 487.
Tsina, R. V.
The isotropic electron paramagnetic resonance spectrum of the 1-hydroxy-2,2,2-trifluoroethyl radical. P. Smith, J. T. Pearson, and R. V. Tsina, 753.
Tyerman, W. J. R.
Photolysis of solid carbonyl selenide and carbon diselenide. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 1677.
Photolysis of Group VI hydrides. I. Solid H_2S, H_2S_2, and D_2S. D. A. Stiles, W. J. R. Tyerman, O. P. Strausz, and H. E. Gunning, 2149.
Ung, A.-Y.
The photolysis of CO_2 at 1 470 Å. A.-Y. Ung and H. I. Schiff, 1981.
Unger, I.
The photolytic and photosensitized decomposition of chloroform. I. Unger and G. P. Semeluk, 1427.
Unrau, A. M.
The biosynthesis of fusaric acid from ^{14}C-labelled acetate in *Gibberella fujikuroi*. R. D. Hill, A. M. Unrau, and D. T. Canvin, 2077.
Alkaline permanganate decarboxylation of β-amino- and β-hydroxy-propionic acid. A. M. Unrau and M.-L. Fan, 2090.
Vagi, K.
Alkylation of cyclic amidines with Mannich bases. C. Podesva and K. Vagi, 1872.
Valenta, Z.
Ormosia alkaloids. III. Chemistry of ormosanine and ormojanine; dehydrogenation to 3,6,8-trialkylated quinolines. Z. Valenta, P. Deslongchamps, M. H. Rashid, R. H. Wightman, and J. S. Wilson, 2525.
Ormosia alkaloids. IV. Stereochemistry of ormojanine; structure and stereochemistry of piptanthine, dasycarpine, and ormosinine. P. Deslongchamps, Z. Valenta, and J. S. Wilson, 2539.
Van Loon, G.
The chemistry of iridium in basic aqueous solution. A polarographic study. G. Van Loon and J. A. Page, 515.
Van Raalte, D.
Energetics of formation of some oxygenated ions and the proton affinities of carbonyl compounds. A. G. Harrison, A. Ivko, and D. Van Raalte, 1625.
Van Zyl, G.
A study of the substitution reactions of benzo[*b*]thiophene and its derivatives. G. Van Zyl, C. J. Bredeweg, R. H. Rynbrandt, and D. C. Neckers, 2283.
Vasudev, P.
Nuclear recoil reactions in cyclopentadienylmanganese tricarbonyl. T. Costea, I. Negoescu, P. Vasudev, and D. R. Wiles, 885.
Vaughn, J. W.
Preparation of metal nitrides by the exploding wire technique. M. J. Joncich, J. W. Vaughn, and B. F. Knutsen, 137.
Veach, C. D.
The reactions of disodium adduct of benzophenone anil. J. G. Smith and C. D. Veach, 2245.
The reductive dimerization of *N*-benzylidene aniline. J. G. Smith and C. D. Veach, 2497.
Von Rudloff, E.
Gas–liquid chromatography of terpenes. XV. The volatile oil of *Mentha arvensis* var. *glabrata* Ray. E. von Rudloff and F. W. Hefendehl, 2015.
Wagemann, R.
The system: aluminium–indium–silver. Part I. The binary and ternary miscibility gaps. A. N. Campbell and R. Wagemann, 657.
Walker, D. C.
Production of hydrated electrons. D. C. Walker, 2226.
Walker, D. M.
The synthesis of porphyrins derived from *Chlorobium* chlorophylls. J. L. Archibald, D. M. Walker, K. B. Shaw, A. Markovac, and S. F. MacDonald, 345.

Walker, L. G.
The Hg $6(^3P_1)$ photosensitization of spiropentane. G. R. De Maré, L. G. Walker, O. P. Strausz, and H. E. Gunning, 457.
Wall, M. E.
The synthesis of 1,4-dichloro-1,4-dinitro-1,3-butadiene. F. I. Carroll, S. C. Kerbow, and M. E. Wall, 2115.
Walter, R.
Synthesis and chromatographic properties of *N*-alkyl-L-asparagines. R. Walter, I. L. Schwartz, L. J. Trauth, M. C. Berman, and D. H. Schlesinger, 2348.
Walton, R. A.
Complexes of alkyl and aryl cyanides. Part III. The far-infrared spectra (500–200 cm^{-1}) and assignment of the metal–nitrogen stretching frequency in complexes with palladium(II), platinum(II), and rhodium(III) halides. R. A. Walton, 1480.
Wan, J. K. S.
Electron spin resonance spectra of $N_2H_4^+$ and PF_2. J. K. S. Wan, J. R. Morton, and H. J. Bernstein, 1957.
Warnhoff, E. W.
The reaction of caryophyllene and diazoacetic ester; some observations on cyclopropanes. E. W. Warnhoff and V. Dave, 621.
Treibs' 119° glycol; transannular attack at the tertiary carbon of a secondary–tertiary epoxide. E. W. Warnhoff and V. Srinivasan, 2259.
Wasley, J. W. F.
Structures of *Chlorobium* chlorophylls (660). A. S. Holt, J. W. Purdie, and J. W. F. Wasley, 88.
Wenkert, E.
Conversion of neoabietic acid into manool. E. Wenkert, J. R. Mahajan, M. Nussim, and F. Schenker, 2575.
Westlake, D. W. S.
A new galactobiosyl glucose formed from lactose by *Chaetomium globosum*. P. A. J. Gorin, R. H. Haskins, and D. W. S. Westlake, 2083.
Westmore, J. B.
Mass spectrometric study of subliming selenium. H. Fujisaki, J. B. Westmore, and A. W. Tickner, 3063.
Wheeler, O. H.
Gas chromatography of estrone and related compounds. R. Montalvo and O. H. Wheeler, 100.
Radiation-induced bromination of 2,3-dimethylbutane. O. H. Wheeler and H. B. de Pabon, 407.
White, J. F.
Polyfluorinated aromatic esters. Preparation and carbonyl stretching frequencies. R. Filler, J. F. White, A. J. Kacmarek, and I. J. Solomon, 2346.
Whitehead, M. A.
Automatic direct analysis of A_2B_2 nuclear magnetic resonance spectra. T. K. Lim, A. Taurins, and M. A. Whitehead, 1211.
Coulomb parameters in simple Huckel and omega technique molecular orbital methods. N. C. Baird and M. A. Whitehead, 1933.
Whiteway, S. G.
Effect of thermionic emission on electrochemical measurements at high temperatures. S. G. Whiteway and C. R. Masson, 2421.
Wigfield, D. C.
Steroids and steroidases. III. Dicyclohexylcarbodiimide – dimethyl sulfoxide oxidations of alcohols and thiols. J. B. Jones and D. C. Wigfield, 2517.
Wightman, R. H.
Ormosia alkaloids. III. Chemistry of ormosanine and ormojanine; dehydrogenation to 3,6,8-trialkylated quinolines. Z. Valenta, P. Deslongchamps, M. H. Rashid, R. H. Wightman, and J. S. Wilson, 2525.
Wiles, D. M.
Proton magnetic resonance line width as a function of polymer tacticity. S. Brownstein and D. M. Wiles, 153.
The anionic polymerization of allyl acrylate and of allyl methacrylate. S. Bywater, P. E. Black, and D. M. Wiles, 695.
Wiles, D. R.
Nuclear recoil reactions in cyclopentadienylmanganese tricarbonyl. T. Costea, I. Negoescu, P. Vasudev, and D. R. Wiles, 885.
Wilgus, H. S. III
Reaction of thiols with epoxides of conjugated 1,4-diketones. H. S. Wilgus III, E. Frauenglass, P. P. Chiesa, G. H. Nawn, F. J. Evans, and J. W. Gates, Jr., 603.
Willi, A. V.
Calculations of kinetic isotope effects for the iodide exchange and for the solvolysis of methyl iodide. A. V. Willi, 1889.
Williams, D. T.
The separation of aldopentose and aldohexose diethyl dithioacetal derivatives by gas–liquid partition chromatography. D. T. Williams and J. K. N. Jones, 412.
Willis, C. J.
The reaction of hexafluoroacetone with silanols. A. F. Janzen and C. J. Willis, 745.
Wilson, J. S.
Ormosia alkaloids. III. Chemistry of ormosanine and ormojanine; dehydrogenation to 3,6,8-trialkylated quinolines. Z. Valenta, P. Deslongchamps, M. H. Rashid, R. H. Wightman, and J. S. Wilson, 2525.
Ormosia alkaloids. IV. Stereochemistry of ormojanine; structure and stereochemistry of piptanthine, dasycarpine, and ormosinine. P. Deslongchamps, Z. Valenta, and J. S. Wilson, 2539.

Wilson, R.
Electron spin resonance studies of photolytically generated aromatic ketyls. R. Wilson, 551.
Wolfe, S.
A one-step conversion of cyclohexene oxide into *cis*-1,2-dichlorocyclohexane. J. R. Campbell, J. K. N. Jones, and S. Wolfe, 2339.
A convenient method for the preparation of optically active benzyl-α-*d* alcohol. S. Wolfe and A. Rauk, 2591.
Wong, P. T. T.
Studies of metal complexes of pyridine derivatives. The effects of coordination upon infrared intensity of the functional group in β-cyanopyridine. D. G. Brewer and P. T. T. Wong, 1407.
Wong, S. C. K.
The chemistry of ylids. XV. Mechanism of the reaction of iminophosphoranes with carbonyl compounds. A. W. Johnson and S. C. K. Wong, 2793.
Wood, P. B.
A study by electron paramagnetic resonance spectroscopy of radicals formed from acetamide and formamide. P. Smith and P. B. Wood, 3085.
Woolford, R. G.
The electrolysis of *o*-halogenophenyl-substituted acids. R. G. Woolford and W. S. Lin, 2783.
Worsfold, D. J.
The polymerization of styrene by anhydrous perchloric acid and the spectra of benzylic carbonium ions. S. Bywater and D. J. Worsfold, 1671.
Wu, C.-Y.
The solvent isotope effect and the partial molar volume of ions. R. E. Robertson, S. E. Sugamori, R. Tse, and C.-Y. Wu, 487.
Yaffe, L.
Formation of ^{7}Be in nuclear reactions induced by 85-MeV protons. M. S. Lafleur, N. T. Porile, and L. Yaffe, 2749.
Xenon yields in the fission of heavy elements by medium-energy protons. J. H. Forster, N. T. Porile, and L. Yaffe, 2951.
Yanagihara, T.
Liquid-phase oxidation of cyclohexene in the presence of benzaldehyde. T. Ikawa, T. Fukushima, M. Muto, and T. Yanagihara, 1817.
Yates, K.
The importance of inductive effects in α-silyl and α-germyl ketones. K. Yates and F. Agolini, 2229.
The ionization behavior of amides in concentrated sulfuric acids. III. Indicator activity coefficient variation. L. M. Sweeting and K. Yates, 2395.
Yealland, R. M.
Chemical reactions in electrical discharges. III. The positive column in d-c. glow discharges through oxygen. H. W. Rundle, K. A. Gillespie, R. M. Yealland, R. Sova, and J. M. Deckers, 2995.
Yonemoto, T.
A perturbation calculation of the effect of electric interaction on proton magnetic shielding. T. Yonemoto, 223.
Young, J. M.
Carcinogenicity of lactones. I. The reaction of 4-methylbuteno- and 4-methylbutano-γ-lactones with primary amines. J. B. Jones and J. M. Young, 1059.
Young, J. W.
Nuclear magnetic resonance study of 2,3-quinoxalinedicarboxaldehyde and its cyclic monohydrate. E. J. Moriconi, J. W. Young, T. E. Brady, and A. J. Fritsch, 1596.
Young, L.
Anodic oxide films on indium antimonide. A. C. Harkness and L. Young, 641.
High resistance anodic oxide films on aluminium. A. C. Harkness and L. Young, 2409.
Young, R.
The synthesis of D-*glycero*-L-*altro*-heptose, D-*glycero*-L-*allo*-heptose, and *meso*-*glycero*-*altro*-heptitol. R. Young and G. A. Adams, 32.
Young, R. A.
Reaction of $N_2(A^3\sum_u^+)$ with atomic nitrogen. R. A. Young, 1171.
Zador, M.
Étude cinétique de l'oxydation de la tribenzylamine par la *N*-bromosuccinimide. M. Zador, 2031.
Zajac, W. W., Jr.
1,4-Diarylphthalazines and 1,3-diarylisobenzofurans. W. W. Zajac, Jr. and D. E. Pichler, 833.
Hydrogenolysis by lithium aluminium hydride–aluminium chloride of ether solutions of camphor ethylene ketal and norcamphor ethylene ketal. W. W. Zajac, Jr., B. Rhee, and R. K. Brown, 1547.
Zeitlin, H.
Some adsorption phenomena of nitroanilines on alkaline earth compounds. R. W. Frei, H. Zeitlin, and G. Fujie, 3051.
Zitko, V.
Structure of a galacturonan from sunflower pectic acid. V. Zitko and C. T. Bishop, 1275.
Oxidation of polysaccharides by lead tetraacetate in dimethyl sulfoxide. V. Zitko and C. T. Bishop, 1749.
